WILLIAM BULL, F.L.S.,

BEGS TO ANNOUNCE THAT HE IS NOW OFFERING FOR THE FIRST TIME MANY

BEAUTIFUL PLANTS,

WHICH ARE

PERFECTLY NEW TO THIS COUNTRY,

COMPRISING INTRODUCTIONS FROM

SOUTH SEA ISLANDS, EAST INDIES, CELEBES, BORNEO, BRAZIL,
UNITED STATES OF COLOMBIA, AMBOINA, SIERRA LEONE,
WEST AFRICA, FIJI ISLANDS, SOUTH AMERICA, &c., &c.,

An Inspection of which is invited.

THE PRINCE CONSORT'S GOLD MEDAL,

THE LINDLEY MEDAL,

MANY GOLD MEDALS,

UPWARDS OF ONE THOUSAND PRIZES AND AWARDS

HAVE BEEN MADE TO

WILLIAM BULL, F.L.S.,

FOR NEW AND RARE PLANTS ALONE,

AT THE PRINCIPAL LONDON AND INTERNATIONAL FLOWER SHOWS.

Mr. W. BULL mentions this as conveying some idea of the importance of his collection.

Telegraphic Address—"WILLIAM BULL, LONDON."

NOTICE.

The Illustrations in Mr. W. B.'s Catalogues have been carefully drawn and engraved by eminent artists, from plants introduced at great expense from their native habitats; the Catalogue has, therefore, been registered and the copyright is reserved, and any infringement will be proceeded against.

IMPATIENS HAWKERII

For description and price, *vide* page 8.

EUCHARIS MASTERSII.

For description and price, *vide* page 8.

ANTHURIUM CHELSEIENSE.

For description and price, *vide* page 7.

ARISTOLOCHIA ELEGANS.

For description and price, *vide* page 7.

NEW PLANTS

ANNOUNCED FOR THE FIRST TIME

BY
WILLIAM BULL, F.L.S.

ANTHURIUM CHELSEIENSE.

An extremely handsome hybrid between *A. Veitchii* and *A. Andreanum*, with leaves resembling those of the first named. The spathe is broadly cordate, cuspidate at the apex, about 5 inches long by $3\frac{1}{2}$ inches broad, of an intense shining rich crimson colour. The spadix is about two-thirds the length of the spathe, and slightly tapering, the basal part white, the tip tinged with a yellowish shade. From the free manner in which the beautiful spathes are produced and the long time which they last in perfection, combined with the ornamental character of the foliage, this handsome hybrid is a most desirable acquisition. For illustration *vide* page 5. 2 and 3 guineas.

ARISTOLOCHIA ELEGANS.

A beautiful free-flowering species of neat growth, imported from Brazil. It has smooth slender terete stems with cordate ovate leaves, smooth above, and glaucous beneath. The handsome and elegant flowers are borne on long stalks and have a slightly distended tube, which is suddenly bent upwards, the upper part dilated into a cordate cup-shaped limb of a rich dark purple colour, ornamented throughout with irregular branched markings of a creamy white, and having a golden yellow eye surrounded by rich velvety purple. Its blossoms are produced in the greatest profusion, even on small plants, and are entirely free from the objectionable odour peculiar to the genus. It has been certificated by the Royal Horticultural Society, and is described and figured in the *Gardeners' Chronicle* for September 5, 1885. For illustration *vide* page 6. 21s.

BEGONIA COMPTA.

A pretty ornamental species from Brazil. Its leaves have palish pink footstalks, which are five to six inches long, remarkable for the unequal development of their two halves, the one side being narrowed to the base, and the other developed into a roundish angular lobe. The colour is satiny green with a silvery tinge along the course of the mid-rib; this coloration with the satiny surface being of a very pleasing character. 7s. 6d.

BEGONIA DECORA.

A shrubby decorative variety, with dark green obliquely lanceolate leaves, profusely marked with oblong spots or dots of a silvery-grey colour; somewhat of the character of *B. argyrostigma*, but with the spots more minute. It has been introduced from Brazil. 5s.

CLERODENDRON MINAHASSÆ.

This species has been introduced from Celebes. It has erect tetragonal stems with opposite obovate serrated leaves. The flowers form a broad terminal cymose panicle, and have a large leafy calyx, the lobes of which are tipped with red; the corolla is four inches long, yellowish white, with a limb of lanceolate lobes, and exerted purple anthers. In its fruiting state it is very ornamental, as the calyx grows much larger after the flowers fall, spreading out so as to resemble a flower three inches across, sanguineous red, with a round blue berry in the centre. 21s.

COTONEASTER FONTANESII.

A compact growing hardy shrub, with terete brown pubescent stems and branches, bearing dark green alternate leaves, orbicular in outline. The flowers, which are white, grow in small corymbose glomerules, and are succeeded by large round coral-red berries. It is an effective shrub from the abundant clusters of brilliant red berries which it produces. 5s.

DENDROBIUM PARTHENIUM.

A lovely new species, with flowers of the purest white; it has been introduced from Borneo, and has been named and described by Professor Reichenbach in the *Gardeners' Chronicle*, October 17th, 1885. It has long slender stems, furnished with tapering blunt bilobed leaves. The chaste white flowers are borne on long white pedicels, and there are three purple blotches at the base of the anther. The petals are oblong, blunt, surpassing in extent the sepals which have obscure keels. It is named *Parthenium*, in allusion to the virginal whiteness of its flowers. Price on application.

ERANTHEMUM MACROPHYLLUM.

A very desirable winter flowering stove plant introduced from India. Its pretty light blue flowers are borne in terminal and axillary spikes, the two upper petals and the lateral ones being reflexed on the sides of the long whitish tube, the lower petal or lip extends horizontally and is of a deep bright blue colour, forming a pleasing contrast to the celestial blue of the upper petals. Blooming as it does in the winter, when flowers are so scarce, this will be found a welcome addition to our stoves. It is very free flowering and of good habit. 10s. 6d.

ERANTHEMUM VELUTINUM.

A distinct stove species introduced from Brazil. Its leaves are of a rich deep velvety olive-green, traversed by sunken veins so that the surface forms a series of ridges and furrows which serve to show off with advantage the velvety texture of the surface. The inflorescence forms spikes of blossom eight inches in length; the numerous flowers have a slender curved tubular base about an inch long, and are of a deep rosy pink colour. 10s. 6d.

EUCHARIS MASTERSII.

This new and beautiful *Eucharis* has been imported from the United States of Colombia. Its deliciously fragrant flowers, which are from $2\frac{1}{2}$ to 3 inches in diameter, are of the most snowy whiteness and are borne in umbels on erect scapes. It has the same habit and leaf as *E. Sanderii*, but is entirely distinct from it in the staminal cup or corona, the free portion of which forms a narrow but united collar-like rim to the perianth tube. This species will be found a desirable acquisition, it being very free flowering and the blooms admirably adapted for cutting. It has been awarded a First Class Certificate by the Floral Committee of the Royal Horticultural Society. For illustration *vide* page 4. 3s. 6d. each; 30s. per dozen.

GYMNADENIA MACRANTHA.

A pretty terrestrial orchid, with sheathing three-nerved leaves, imported from Sierra Leone. The upper part of the stem is furnished with bracts, and from the axils of these are developed the flowers six to ten on a spike; the sepals and petals are of a dark brown, the lip roundish and emarginate, of a pretty purplish lilac with dark purple streaks and speckles on the base and disc. 10s. 6d.

IMPATIENS HAWKERII.

A more lovely flowering plant than this new species it would be difficult to imagine. It is a native of the South Sea Islands where it was discovered by Lieutenant Hawker. The sharply serrate leaves are elliptic acuminate. The magnificent flowers are very large, flatly expanded, and of the most brilliant rich deep carmine colour, this is relieved by a lustrous bluish tinge round the small white eye; the dorsal sepal is roundish and the two lateral lobes oblong and bilobed, the spur is red and about two inches long. The handsome flowers of this superb new *Impatiens* are produced in the greatest profusion from March until October, the plant is of free growth and of good habit, and cannot fail to become one of the most useful of decorative plants. For illustration *vide* page 3. 10s. 6d. each; 3 plants for 1 guinea. Orders are now being booked. Date of distribution will be announced hereafter by advertisement.

IXORA CONSPICUA.

This handsome stove plant bears in the freest manner, fine trusses of flowers, buff-yellow on opening, afterwards changing to bright orange. The blooms are large and of good substance, the lobes being round and well formed. A very desirable variety and fine exhibition plant. 21s.

IXORA SPECIOSA.

A beautiful addition to these handsome and showy stove plants. The colour of the flowers on opening is buff, afterwards changing to bright orange-salmon, the individual lips are large and borne in good compact trusses, added to which it is extremely free flowering. 15s.

PALICOUREA JUGOSA.

An ornamental Brazilian stove plant, with opposite elliptic oblong leaves, which are of a dark satiny green, with a striking pink midrib and veins. The veins are depressed, so that the leaf-surface presents a series of ridges and furrows, which serve to show off to advantage the satiny tints of their colour. The under surface is of a wine-purple colour. 10s. 6d.

PINANGA SPECTABILIS.

An ornamental Stove Palm, introduced from the East Indies. The leaves have short petioles with long sheathing bases, which in the young state are bilobed, and in the more mature state pinnate, of a dark green colour, mottled with light green, the nerves being prominently raised on the upper surface; the under surface of the leaves have a silvery appearance. 21s.

SELAGINELLA FLAGELLIFERA.

A very elegant species of a bright cheerful green colour, introduced from the Fiji Islands. The leaves on the main rachis are spreading, broadly cordate, with a stout midrib and entire margins. The fructification is terminal on the branchlets, the spikelets tetragonal, from a quarter to half an inch long. From the free manner in which this species produces long flagelliform rooting stems or runners, it is particularly adapted for rockwork or basket-culture. 7s. 6d.

SMILAX DISCOLOR.

A bold growing semi-scandent species, introduced from South America. The leaves are about nine inches long and four inches broad, oblong ovate and suddenly acuminate; they are of a firm leathery texture, and of a rich green colour irregularly blotched in a young state with patches of purplish-brown varying much in size and form; they are five-nerved, the three central ones being very strongly marked, and the two exterior ones less distinctly developed. It is a bright cheerful clean-looking plant, desirable on account of the ornamental character of its blotched foliage. 10s. 6d.

TECOMA AMBOINENSIS.

This handsome free-flowering stove climber has been introduced from the Island of Amboina. Its leaves are impari-pinnate with the leaflets generally in pairs, acuminate. The flowers are produced in racemes from the axils of the leaves, the orange-red corolla tube being from three to four inches long. It is a very showy species and well adapted for furnishing trellises and pillars in stoves. 15s.

THUNIA MARSHALLIANA IONOPHLEBIA.

A distinct variety of the beautiful *T. Marshalliana*, with erect leafy reed-like stems, and oblong lanceolate acuminate leaves, about six inches long, pale green, and glaucous beneath. Its large and handsome flowers are pure white, differing from the type, however, in the colouring on the disc and crest of the lip, which is sulphur-yellow, instead of orange-yellow. Price on application.

ZALACCA NITIDA.

A handsome Stove Palm from Western Africa. It forms a noble head of handsome pinnate leaves, with a spiny trunk. In the young plants the leaves, which are of a shining rich dark green colour, are only biparted, with broad divisions. It is a highly ornamental species. 15s.

NEW GLOXINIAS.

LYDIA, very large drooping flower, upper lobes deep rose, lower lobes rose shaded with deep crimson; light throat, prettily speckled with crimson. 5s.

MODIOLA, flowers erect, deep rich velvety crimson, the lobes margined with rose, the mouth being shaded with dark maroon; light throat, freckled with crimson. 5s.

For general collection, *vide* Index.

NEW SPOTTED PELARGONIUM.

GLOVIS, upper petals blackish maroon edged with bright crimson, lower petals bright rosy crimson blotched with maroon. 10s. 6d.

For general collection, *vide* Index.

NEW DOUBLE-FLOWERED IVY-LEAVED PELARGONIUMS.

COMUS, soft rosy purple flower, upper petals feathered with dark maroon. 5s.

SABINE, bright rosy carnine, a large well-formed round flower of a most pleasing colour. 5s.

For general collection, *vide* Index.

ALOCASIA SANDERIANA.

A remarkably handsome and truly grand Arad, from the Eastern Archipelago, forming one of the finest of variegated-leaved stove plants. The colour of the young leaves is bright glossy green, and on the older leaves the surface has a metallic blue reflection. The leaf-blade is arrow-shaped, the front portion with about three triangular lobes on each side, the basal portion with one or two smaller lobes; the thick costa and the stout cross veins are white, conspicuously bordered with ivory-white, the margins also being white. This is certainly the most beautiful of all the Alocasias, and a most magnificent foliage plant. 1 and 1½ guinea.

NEW, RARE & DESIRABLE STOVE PLANTS.

ABROMA SINUOSA.

An interesting plant from Madagascar. The leaves, which grow on slender petioles, are broadly ovate, with oblong obtuse lobes and broad open sinuses, and from their peculiar and remarkable character, the plant is very pleasing and attractive. 5s.

ACACIA SPILEROCEPHALA, 7s. 6d.

ACALYPHA ILLUSTRATA, 2s. 6d. and 3s. 6d.

MACAFEEANA, 2s. 6d. and 3s. 6d.

ACALYPHA MACROPHYLLA, 2s. 6d. and 3s. 6d.

MARGINATA, 2s. 6d. and 3s. 6d.

MUSAICA, 2s. 6d. and 3s. 6d.

ACALYPHA OBOVATA.

The beauty of the *Acalyphas* is sufficiently familiar, and the present form is a handsome addition to the genus. The leaves are obovate, in the earlier stages of development green with creamy edges, later on olive-green with the margins rosy pink, and eventually having a bronzy centre with broad rosy crimson margins. It is very distinct and effective. 3s. 6d.

ACANTHUS MONTANUS, 3s. 6d.

ACHIMENES, *vide* Index.

ÆCHMEA AMAZONICA, 5s. and 7s. 6d.

DISCOLOR, *vide* *Lamprococcus discolor*

ÆCHMEA FULOENS, *vide* *Lamprococcus fulgens*

MINIATA, *vide* *Lamprococcus miniata*

MARIE REGINÆ, 10s. 6d.

VEITCHII, *vide* *Chevaliera Veitchii*

ÆCHMEA PANICULIGERA.

A very handsome Bromeliad, imported from the West Indies. The flower scape is several feet high, of a reddish purple colour, and clothed with white down; this supports a large compound panicle, one to two feet long, of numerous rose-coloured flowers, the petals of which project beyond the sepals, and are of a deep bright purple, the inflorescence being highly attractive. 10s. 6d.

ÆCHMEA WEILBACHII, *vide* *Lamprococcus*

Weilbachii

ÆSCHYNANTHUS ORANDIFLORUS, 3s. 6d.

of sorts, 2s. 6d. and 3s. 6d.

CANDIDUM, 3s. 6d.

ANTHURIUM CARNEUM.

A handsome and attractive new hybrid, between *Anthurium ornatum* and *A. Andreanum*. The spathe is heart-shaped, from six to seven inches long and five to six inches broad, and is of a charming rosy-carmine colour. Of vigorous growth, this splendid variety freely produces its grand flowers, each spathe remaining in beauty several months, thus rendering it of the greatest value for decorative purposes. 10s. 6d. and 15s.; strong plants, 1½ and 2 guineas.

ANTHURIUM CHANTRIERI, 10s. 6d. and 15s.;

HYBRIDUM, 5s. and 7s. 6d.

ANTHURIUM INSIGNE.

A noble and striking Aroid imported from the United States of Colombia. The leaf-blade is three-lobed, deflexed at first, the middle lobe lanceolate, and the two lateral lobes semi-ovate. The young leaves have a bronzy tinge before taking on the full green of the mature foliage. This was one of the New Plants with which Mr. W. B. gained the First Prize at the International Horticultural Exhibition, held at Ghent, and the First Prize at the Great Show of the Royal Horticultural Society, held at Kensington in 1880. 15s. and 1 guinea; fine plants, 2 and 3 guineas.

ANTHURIUM INTERMEDIUM.

We have in this the result of the intercrossing of *A. hybridum* and *A. crystallinum*. The leaf-blades are deflexed, over a foot long, oblong ovate, cordate at the base, with an open rounded sinus, the upper surface of a velvety green, with a slight olive tinge, the costa and principal veins being whitish. The spathe is lanceolate, and of a pale reddish hue, with a rosy red spadix. 7s. 6d. & 10s. 6d.

ANTHURIUM LIEVENSII.

A bold and striking Aroid. The leaf-blades are ovate-acuminate, with rounded basal lobes and an acute sinus, and are traversed by raised slightly-curved veins. It has a reddish-tinted spathe and bright red spadix. 1 guinea.

ANTHURIUM ANDREANUM.

**ANTHURIUM ANDREANUM.**

The flower-spathes of this magnificent Araceous plant are heart shaped and of a most brilliant scarlet colour, the surface irregularly corrugated and traversed by deep sinuous veins; the spadix is ivory-white at the base, and greenish-yellow at the tip. An extremely attractive plant, each inflorescence remaining in perfection about three months. 5s., 7s. 6d., 10s. 6d. and 1 guinea.

ANTHURIUM SCHERZERIANUM MAXIMUM.

A magnificent variety of this attractive flowering plant, producing gigantic flower spathes, which measure about nine inches in length by four inches in breadth, and are of a most brilliant scarlet colour. As a decorative and exhibition plant, this splendid variety will always occupy a foremost place. 3, 5 and 7 guineas.

**ANTHURIUM SPLENDIDUM.**

A strikingly beautiful stove Aroid, imported from South America, quite distinct from anything previously in cultivation, the surface of the cordate leaves being remarkably peculiar. The course of the nerves is marked by a broadish band of deep lustrous velvety green, the intervening spaces being of a pale yellowish green. The leaf surface is scabrous, and the portions between the ribs strongly bullate, as if raised in papillose blisters. 1 guinea.

**ARISÆMA FIMBRIATUM.**

A very remarkable and distinct species, introduced from the Philippine Islands. The leaves are deeply divided into three ovate acute segments. The spathes are acuminate, brownish purple, reticulated and very effectively striped with narrow whitish bands. The spadix terminates in a long whip-like extremity furnished throughout its length with long purplish filaments, imparting to the plant a distinct and novel character. Described and illustrated in the *Gardeners' Chronicle*, November 29th, 1884, pages 680 and 689. 10s. 6d.

**BIGNONIA MAGNIFICA.**

A free-growing plant, of scandent habit, introduced from the United States of Colombia. The flowers, which are produced in large branching panicles, are of great size (about $3\frac{1}{2}$ inches across), and of an exceedingly attractive colour, ranging from delicate mauve to rich purplish crimson, relieved by a conspicuous throat of light primrose colour. 5s. and 7s. 6d.

CHIRITA ZEYLANICA.

A handsome species with opposite fleshy ovate entire leaves, and panicles of showy flowers. The individual flowers are handsome and of a rich reddish purple colour, having on the lower side of the tube two golden yellow lines. 10s. 6d.

**CAMOËNSIA MAXIMA.**

One of the most gorgeously beautiful of tropical climbers, a native of West Africa. The splendid bunches of pendulous milk-white flowers, tinged with gold on the edges of the petals, grow in drooping racemes from the axils of the leaves; the petals are white, venose, frilled at the margin, where they are tinted with golden yellow. Certainly one of the most striking and noble flowering plants lately introduced. This plant has been described and illustrated in Vol. XXV of the Transactions of the Linnean Society, p. 301, t. 36. 5 guineas.

CIENKOWSKIA KIRKII.

This handsome and interesting plant is a native of Eastern Tropical Africa; its blossoms are exceedingly attractive and beautiful; they are produced on a many-flowered scape, and are of a soft purplish rose colour, with a bifid golden spot in the centre. It has received a First Class Certificate from the Floral Committee of the Royal Horticultural Society. 10s. 6d.

CROTON BROOMFIELDII.

A richly-marked golden variegated variety of great beauty. The leaves are nine or ten inches long, and about two and a half inches broad in the widest part. The green ground colour is very dark, but everywhere broken up by irregular yellow lines, spots, and blotches. The mid-rib has a slight tint of red, with a yellow central band, and the margins are similarly tinted. 7s. 6d. and 10s. 6d.

CRINUM SANDERIANUM.

CRINUM SANDERIANUM.

A very distinct new species introduced from Sierra Leone. It has globose bulbs about two inches in diameter, ensiform leaves, thin in texture and much undulated towards the margins. The flowers are produced in umbels and consist of six lanceolate, acuminate white segments with a broad and conspicuous band of reddish erimson down the centre of each. 3s. 6d.

CROTON CRÆSUS.

One of the series of Crotons or Codiaums with golden variegation. The leaves are bright green, with a yellow costa, and freely blotched with bright yellow in irregular patches or freckled markings, occupying half or sometimes more than half the leaf surface. 10s. 6d.

CROTON EMINENS.

A dense-habited free-growing hybrid variety. The leaves are closely set, broadly lance-shaped, tapered at the apex to an acute point; they are of a bright glossy green, with an ivory-coloured mid-rib, and a portion of the lateral veins of the same colour. The contrast is very striking. 10s. 6d.

CROTON EXCURRENS.

A peculiar variety, which is characterised by its oblong-stalked leaves having the mid-rib or costa excurrent in the form of a small horn near the apex of the leaf. The colours are green and yellow, very regularly disposed. A distinct and attractive plant. 15s.

ORESTES, 7s. 6d.

**CROTON ELEGANTISSIMUS.**

One of the most charming and elegant varieties yet offered. The leaves are narrow, and of considerable length. The variegation is of a rich, bright golden colour, which contrasts strongly with the bright red tint of the petioles, producing a very pretty effect. This variety was one of the new plants with which Mr. W. B. gained the First Prize at the International Horticultural Exhibition, held at Brussels. 7s. 6d. and 10s. 6d.

CROTON ILLUSTRIS.

10. A singularly grotesque-looking variety. The leaves are mostly three-lobed on purplish petioles, the lobes being twisted or curved, so as to acquire a sort of forked appearance. The colour is green, richly mottled with golden yellow; the central bar yellow, and the variegation irregularly distributed, so that sometimes the points are almost wholly golden. It is an extremely distinct and attractive plant. 10s. 6d.

CROTON ORNATUS.

An attractive and distinct variety. The leaves deep green, with a narrow central band of creamy yellow, and long parallel veins of the same colour, the surface being here and there marked by blotches of yellow, the yellow parts becoming tinged with crimson. In some conditions the lines and blotches are rosy pink, and the mid-rib of a deeper rosy crimson. 10s. 6d.

CROTON RECURVATUS.

An exceedingly pretty variety, remarkable for its elegantly recurved leaves. The stems are purplish, and the petioles deep blood-crimson. The colouration is striking, there being a yellow central band with a crimson mid-rib, and yellow veins; the yellow being more or less suffused, so that it predominates over the green of the remaining parts. It is a good example of a race of small-growing *Crotouns*, which are found very useful for decoration. 10s. 6d.

CROTON ROSEO-PICTUS, *vide* page 26.

| **CROTON RUBESCENS**, 7s. 6d. and 10s. 6d.

CROTON RUBERRIMUS.

Probably the reddest of all the bright red varieties yet known. The leaves are narrow and elegantly drooping; in the young state they are green at the edge, with creamy yellow on each side the red costa, the green parts spotted with cream; then the creamy parts become suffused with red, and the costa changes to a deep crimson; the yellow finally being replaced by deep rosy crimson. 10s. 6d.

CROTON SCEPTRE.

One of the ribbon-leaved forms of *Croton*. The colouring consists of a crimson costa, on each side of which comes the dark bottle-green ground colour, and added to this are irregular spots, and a few patches of fiery orange with some spots of yellow. A pretty and distinct variety. 10s. 6d.

CROTON TRIUMPHANS (HARWOODIANUS).

A fine variety from the New Hebrides. The leaves are deep green, with a golden line on each side the mid-rib, the principal veins also golden, running into a net-work of the same colour towards the point. The costa is rich bright crimson, and forms a pretty contrast with the colour on either side. In the fully matured state the leaves become rich greenish bronze, and the costa a rosy crimson, very bright and effective. This was one of the twelve New Plants with which Mr. W. B. Guinard the First Prize at the International Horticultural Exhibition, held at Carlisle. 7s. 6d.

VEITCHIANUS, 3s. 6d.

CROTON VITTATUS.

A very handsome *Croton* of bold and striking habit. The colour of the leaf-blade is a clear full green, with a broad band of creamy yellow, which runs out laterally along the bases of the distant primary veins. The mid-rib in the older and more matured leaves takes on the same bright ruby-red as the petioles, which adds much to the brilliancy of the marking. 7s. 6d.

Clauseniana.

CUPANIA GRANDIDENS

An erect shrubby plant, introduced from Zanzibar. It has downy stems, pinnate *Aralia*-like leaves, having four pairs of leaflets with an odd one, the leaflets three to four inches long, oblong acuminate, and sinuately lobate. It is a handsome ornamental decorative plant. 1 guinea.

CROTON ROSEO-PICTUS.

CROTON ROSEO-PICTUS.

A very pretty and distinct Croton of compact habit, densely leafy, and from its pleasing colouration one of the most useful for decorative purposes. The primary ground colour is green, the mid-rib and its border being pale yellow, as are also the principal veins, which are marked in an arcuate manner, while between and beyond them the surface is broken up in yellow reticulations. These markings take on a pretty rose tint, which is most decided near the margins. 5s.

A most remarkable *Arad*, introduced from the Solomon Islands. The leaf-stalks are furnished with irregular whorls of stiff spines, the stem is darkly mottled, and has flesh-coloured bands just above the spines; the leaf-blade is semi-erect, arrow-shaped, prettily variegated and strikingly veined with bright rosy red. This plant is altogether unique and very attractive. 1 guinea.

DALECHAMPIA ROEZLIANA ALBA, 3s. 6d.**DALECHAMPIA ROEZLIANA ROSEA**, 2s. 6d. & 3s. 6d.**DAVIDSONIA PRURIENS.**

A noble-looking and desirable ornamental plant, with alternate leaves, nearly two feet long. There are five or six pairs of pinnæ, the terminal one about nine inches long. In the young state the leaves are of a bright red colour, from which they pass to a deepish green. It produces a succulent edible fruit, and is one of the most interesting plants in Queensland. 15s., 1 and 1½ guinea.

DIOSCOREA SPECIOSA.

A free growing climber, with decorative foliage. It has slender angular stems, which bear cordate-sagittate dark green seven-nerved leaves, marked with an irregular band of silvery grey between the ribs; the under surface of the leaves is of a purplish colour. 5s.

DIPLADENIA AMABILIS, 3s. 6d.

DIPLADENIA AMENA, 3s. 6d.

DIPLADENIA BREARLEYANA.

This splendid variety is one of the best exhibition plants extant. It is an evergreen stove climber with dark green leaves, serving as a fine contrast for the superbly-coloured flowers, which are of the largest size, opening pink and changing to the richest crimson colour. They have this remarkable peculiarity, that the colour increases in intensity with the age of the flowers. The plant is of free growth, and of the most floriferous character. 3s. 6d., 5s. and 7s. 6d.

**DIEFFENBACHIA REGINA.**

A very distinct and striking variety from South America. It has oblong elliptic greenish-white leaves, mottled with blotches of pale green, and having a narrow margin, and a few streaky markings of a deeper shade. From its distinct markings, the plant is very effective and well entitled to be regarded as the Queen of the Dieffenbachias. This beautiful plant has frequently been shown in Mr. W. B.'s winning collections of New Plants. 1 guinea.

DIEFFENBACHIA REX.

DIEFFENBACHIA REX.

If *D. regina* may be considered as the Queen, we have in this the King of the genus—a very handsomely marked plant of free and vigorous habit. The leaves are of a very deep green colour, thickly covered with oblique-elongate angular white blotches, which take the same direction as the venation, and are here and there slightly veined and suffused with green. It was introduced from South America. This was one of the twelve New Plants with which Mr. W. B. gained the First Prize at several of the Royal Horticultural Society's Exhibitions. 1 guinea.

**DIEFFENBACHIA SPLENDENS.**

A striking plant of great beauty, remarkable for the lustre of its colouring. The stem is faintly mottled with dark and light green. The leaves have a thick ivory-white mid-rib, and the ground colour is of a rich deep velvety bottle-green, with a resplendent lustrous surface, freely marked with whitish striated blotches. It is a remarkably fine and telling plant, imported from the United States of Colombia. This was one of the twelve New Plants with which Mr. W. B. gained the First Prize at the International Horticultural Exhibition held at Ghent. 7s. 6d.

DRACÆNA LINDENI.

The most distinct and striking *Dracæna* announced since *D. Goldieana*. In habit it is somewhat similar to the handsome variegated form of *D. fragrans*, but differs from it in the variegation being marginal instead of central. Mr. W. B. imported this beautiful and attractive plant from Brazil. Its elegantly recurved leaves are of a deep green colour, and are traversed their entire length by bands of creamy-white and various shades of yellow; the diverse forms of the variegation and the blending of the colours render the plant of the highest value for decoration. 1, 1½ and 2 guineas.

DRACÆNA GOLDIEANA.

One of the most magnificent ornamental-foliaged plants ever introduced, and altogether unique in character and aspect. It is a native of Western Tropical Africa. The plant is of erect habit, the leaves being marbled and irregularly banded with dark green and silver-grey in alternate straight or furcate transverse bands, the colours being about equally distributed. The back of the unfolded leaves is a pale reddish purple or wine colour, and the stem where visible at the upper joints is of similar hue. It is, without doubt, one of the most superb of ornamental stove plants, and indispensable in all first-class collections. This beautiful species has been frequently shown in Mr. W. B.'s winning collections of New Plants. 7s. 6d., 10s. 6d., 15s. and 1 guinea.

DRYMONIA MARMORATA.

An erect-growing Gesneraceous plant, with the stems obscurely tetragonal, bearing large opposite leaves, having long reddish purple petioles, the blade ovate, bullate, dark green, with the convex portions between the veins of a glistening grey; the margin erenate, the under surface purplish. The flowers, which grow in the leaf-axils, are creamy white and fimbriated. 7s. 6d.

ERYTHROXYLON COCA.

This extremely interesting plant is of great official importance in South America, where its leaves are largely employed as a masticatory, under the name of Coca. When taken internally it acts as a powerful stimulant of the nervous system; and, when under its influence, persons are able to perform long and rapid journeys without exhaustion. "Four times a day, whatever the nature of his occupation—whether employed in the mines, the fields, as a muleteer, or domestic servant, the Indian resigns himself to the pleasures of Coca chewing." 10s. 6d.

EUADENIA EMINENS.

A remarkably distinct and interesting plant, discovered in Liberia by one of my collectors; it is especially notable on account of its peculiar inflorescence, which resembles a caudellabrum in its ramification, the yellow petals looking like a pair of gas jets on each branch. The plant is of branching habit, with alternate trifoliate glabrous leaves; the inflorescence is terminal and erect; the dorsal petals about four inches long, and of a clear sulphur-yellow colour. Figured in the *Botanical Magazine* for September, 1881. 1 guinea.

EUCHARIS AMAZONICA, 2s. 6d. and 3s. 6d.;
18s. and 30s. per dozen.

ERYTHRINA VESPERTILIO.

A very distinct and grotesque looking warm greenhouse shrub, from Western Australia. The leaflets are very remarkable and unusual in form, and it is this which imparts grotesqueness to the aspect of the plant; they are obversely triangular, the base being cuneate, and the front side deeply hollowed out, so as to leave the two front angles projecting, the hollowed portion having sometimes a central apiculus. The flowers are numerous in showy erect racemes, pendulous, with an ovate standard nearly an inch and a half long. 10s. 6d.

FICUS EXSCULPTA.

FICUS EXSCULPTA.

A handsome plant, furnished with evergreen leaves of a peculiarly elegant form. It has been introduced from the South Sea Islands. The leaves are shortly stalked, lanceolate in outline, and sinuately lobed, the lobes are again sinuate so as to produce a prettily cut margin, the curious crenations giving the leaf the appearance of having been stamped or punched out. This was one of the twelve New Plants with which Mr. William Bull gained the First Prize at the Provincial Show of the Royal Horticultural Society, held at Preston. 5s. and 7s. 6d.

**GUSTAVIA GRACILLIMA.**

This magnificent plant was discovered in the United States of Colombia by M. Roehl. The flowers grow from the axils of the leaves in the young plants; they are solitary or in pairs, four inches in diameter, of a charming rose colour, consisting of eight obovate oblong petals, with a yellow incurved staminal tube bearing numerous densely packed purple anthers, in a ring of an inch or more across. It was figured in the *Botanical Magazine*, tab. 6151. 1 guinea.

HIBISCUS ROSA SINENSIS FULGIDUS.

This magnificent variety, which was obtained from the South Sea Islands, is remarkable alike for the size, colour and marking of its brilliant flowers. The leaves are broadly ovate, with coarsely serrated margins. The flowers are of very large size (five inches in diameter), composed of fine broad, rounded and beautifully undulated petals, of an intense carmine scarlet, paler and somewhat rosy-tinted towards the base, where on each petal is an oblong blotch of deep crimson, forming a blunt-rayed star in the centre of the flower. It is one of the finest varieties yet introduced. 3s. 6d.

HIBISCUS ROSA SINENSIS KERMESINUS.

A grand flowering stove plant, with the foliage and general habit of other varieties of this extremely ornamental species. The flowers are large and showy, full double, the petals broad, rounded, and undulated, the three or four outer series reflexed, the central ones erect, the innermost consisting of the transformed column developed into numerous petaliferous lobes bearing stamens on their margins. The colour is a fine rich carmine crimson. The plant has been imported from the South Sea Islands. 5s.

HIBISCUS ROSA SINENSIS MINIATUS SEMI-PLENUS.

This remarkably showy stove plant has firm, almost leathery, ovate leaves, which are coarsely toothed, and brilliant flowers of a vermillion scarlet colour, darker towards the base of the petals. The flowers are semi-double, the petals very much waved and recurved, forming an irregular undulated mass four inches across, from which the partially petaloid staminal column projects two inches. The brilliant and attractive flowers are remarkable for the absence of formality, the shape being wild, and abounding in fantastic curves, but nevertheless they are remarkably handsome. It has been imported from the South Sea Islands. 3s. 6d.

HIBISCUS ROSA SINENSIS VIVICANS.

A fine free-flowering stove plant of vigorous habit, with ovate stalked leaves, and remarkably large flowers, four and a half to five inches in diameter, full double, the centre being completely filled up with broad convolute petals, having tufts of stamens intermixed. The colour is a brilliant crimson scarlet. It is a very showy variety, and was imported from the South Sea Islands. 5s.

HOYA CUMINGIANA.

A very pretty stove climber, native of the Eastern Archipelago. It has terete branches with leathery leaves; the flowers grow in stalked umbels, and are of a tawny yellow colour with the segments recurved, while the lobes of the staminal crown have each a purple-crimson spot. 10s. 6d.

HOYA GLOBULOSA.

A distinct and handsome species, producing profusely large trusses of flowers of a bright straw colour, the coronal protuberances white, the interstices pink, forming a pleasing contrast. 5s.

IXORA AMBROSIA.

A distinct and very free-blooming variety, producing fine trusses of flowers of a bright orange-salmon colour. 7s. 6d.

IXORA AURORA.

Fine trusses of large attractive flowers, orange-buff on opening, changing afterwards to bright salmon. 15s.

IXORA BELLA.

An exceedingly pretty and effective variety, producing fine trusses of flowers of a salmon-pink colour, shading off to light salmon. 10s. 6d.

IXORA CHELSONI.

The flower pips of this splendid variety are of large size, and of exceptionally good form and great substance; they are produced in immense round full trusses; colour bright orange-salmon, flushed and shaded with pink. From its profuse flowering habit, dwarf-branching growth, and the rich tint of its blossoms, this variety will be found exceedingly useful and effective. 7s. 6d.

IXORA COCCINEA SUPERBA, 3s. 6d.

CONSPICUA, *vide* page 8

IXORA CROCATA RUTILANS, 3s. 6d. and 5s.

IXORA CONCINNA.

A splendid variety producing large and compact trusses of fine flowers, which on first expanding are of a bright salmon colour, but gradually change to deep salmon-pink; extremely beautiful. 10s. 6d.

IXORA DECORA.

Yellow flaked with rosy crimson; remarkably attractive; a magnificent variety producing noble trusses of very large fine flowers. 10s. 6d.

IXORA SPLENDIDA.

IXORA SPLENDIDA.

A magnificent variety producing profusely very large and handsome trusses of flowers of a rich bright orange-crimson colour; remarkable showy and attractive. 1 guinea.

IXORA EMINENS.

A splendid variety of exceptional merit, giving trusses of fine, large, well-formed flowers, clear buff on opening, changing afterwards to light salmon pink. 21s.

IXORA EXIMIA.

— This variety produces fine large trusses of pips with very long tubes; the colour on opening is buff, changing afterwards to salmon-pink. 7s. 6d.

IXORA GEMMA.

A fine addition to this showy and effective genus. It has round and well-formed pips of a rich orange yellow colour, produced in large and compact trusses. This variety will be found of the greatest value for exhibition purposes. 15s.

IXORA ILLUSTRIS.

A splendid variety, producing immense trusses of flowers of a fine bright orange-salmon colour; extremely showy and ornamental. 10s. 6d.

IXORA INSIGNIS.

A fine variety of close dwarf habit; deep rosy crimson flowers shaded with orange, borne in a compact truss. 15s.

PALICOUREA JUGOSA, *vide* page 8.**PALISOTA** BARTEII, 7s. 6d.**PALMS**, of sorts, *vide* Index**PANAX DIFFISSUM.**

An interesting compact-growing stove plant, a native of the South Sea Islands. It has pale bright green leaves, which are triangular, bipinnate, and crispate, the primary divisions with spiny-toothed, bluntish secondary divisions, the teeth turned upwards, which gives to the surface of the leaf its crispy appearance. 5s. and 7s. 6d.

PANAX DISSECTUM.

An evergreen plant of branching habit; the leaves are numerous, drooping, and bipinnate, having the obovate cuneate leaflets very greatly varied in size and outline, all of them being furnished with long marginal teeth. This plant from its plumose character and elegant habit, is exceedingly pretty for table decoration and other ornamental purposes. 7s. 6d.

PANAX DUMOSUM.

A remarkably neat and pleasing dwarf stove plant, with short-jointed stems, thickly clothed with deeply divided cheerful green leaves. The petioles are olive-green, mottled with brighter green, and terminating in a roundish-ovate pinnately divided blade of numerous variously-shaped lobes, the pinnae furnished at the margins with incurved spiny teeth. Extremely ornamental. 5s. and 7s. 6d.

PANAX FISSUM.

A very elegant and ornamental stove shrub, with an erect branched stem, flecked with small elongate pallid spots, the leaf-stalks being of the same colour. The leaves are tripinnately divided, with a few incurved whitish teeth on each margin. 5s. and 7s. 6d.

PANAX PLUMATUM.

PANAX PLUMATUM.

A very elegant plant, from the South Sea Islands. The leaves form a crispy head of foliage, and are very elegantly divided. It is a plant of pleasing character, having the aspect of *P. laciniatum*, but many degrees more finely cut. This was one of the twelve New Plants with which Mr. W. B. gained the First Prize at the International Horticultural Exhibition at Ghent. *6s.*

A very distinct and beautiful species from the West Indies; its flowers are pure white, very fragrant, and most useful for cutting for bouquets and other decorative purposes. 2*s.* 6*d.* and 3*s.* 6*d.*

PANAX VICTORIE.

PANAX VICTORIE.

A distinct and very graceful stove plant, thickly furnished with leaves of a remarkably elegant character, forming a recurving mass of pleasing variegated foliage. The leaf-blade is ternate, the leaflets being prettily margined with white, which gives the plant a remarkably lively and pictorial character. It is a native of the South Pacific Islands, and is one of the most elegant variegated plants of modern introduction. 5s., 7s 6d. and 10s. 6d.

PHILODENDRON CARDERI.

PHILODENDRON CARDERI.

This exquisitely coloured Arad is a native of South America. The leaves are of a dark shaded bottle-green, with a satiny lustre, the principal ribs being marked out by bright green lines of a glaucous or metallic hue; at the back the leaves are of a shaded wine-purple, the course of the veins being marked by broad green lines. The glossy shaded satiny surface of the leaves imparts to them a wondrous degree of beauty. 10s. 6d.

PHILODENDRON NOBILE.

A distinct species from South America. It has obovate lanceolate leaves of a firm leathery texture. The large and attractive inflorescence is axillary, the lower portion of the handsome spathe being of a deep rosy crimson colour, both inside and out; the upper part, white internally, outside prettily marked with deep-rose stellate spots, the larger ones being surrounded by numerous smaller dots of the same colour. 2 guineas.

RADIATUM, 7s. 6d.

PHYLLAGATHIS GYMNANTHA.

A handsome stove perennial, with a short erect stem, furnished with ovate leaves, which are seven-nerved, cordate at the base, ciliate at the margins; the surface bright glossy green. The peduncles, which spring from the upper axils, are tinged with red below, each bearing a compact head of pink flowers, which have obliquely bilobed petals. It has been imported from Borneo. 7s. 6d.

POTHOS AUREUS.

POTHOS AUREUS.

This remarkably distinct Aroid, which is of climbing habit, has been imported from the Solomon Islands. The leaves are strikingly variegated, heart-shaped, and unequal sided, of a dark green, boldly and irregularly marked by bands or blotches of creamy yellow, here and there suffused with pale yellowish green. Being of free growth, it will be an ornamental object in the tropical plant stove, where it will find itself at home on walls and artificial rockwork. 3s. 6d. and 5s.

**POTHOS FLEXUOSUS.**

An interesting Araceous plant, which has been introduced from India. It has flattened rooting stems, the leaves being alternately directed to the right and to the left, the larger ones six inches long; the lamina oblong, with an acuminate deflexed apex, pale green, with a few alternate elongated ribs. From the peculiar character of the leaves, which lie flat upon the surface it climbs over, it is well adapted for covering walls, or for other ornamental purposes. 10s. *Ed.*

PITCAIRNIA ALTA.

An attractive plant, of graceful habit, with very long and narrow recurved drooping foliage; it bears a tall branching spike of bright coral red blossoms: the flowers individually are from 2 to 2½ inches long, and have bright yellow stamens, forming an effective contrast. 10s. 6d., 15s. & 1 guinea.

TILLANDSIA HIEROGLYPHICA.

A beautiful Bromeliaceous plant, with very attractive foliage. The leaves are recurved, and at first sight have the appearance of being hieroglyphical inscriptions. The markings are of a pale green colour, traversed transversely by distinct irregular bands of deeper green, repeated on the under surface of a deep chocolate-purple colour. 5s., 7s. 6d. and 10s. 6d.

TILLANDSIA LINDENIANA VERA.

One of the most beautiful of the Bromeliads; a native of Ecuador, of dwarf compact growth, with recurved olive-green leaves. The flower scape bears an ovate flattened spike of a bright rosy hue, from the bracts of which issue in succession the beautiful lilac-blue flowers; the contrast of which with the rose-coloured scape presents a most charming appearance. 15s., 1 and 1½ guinea.

AGAPANTHUS UMBELLATUS CANDIDUS.

A variety with pure white flowers, extremely useful for bouquets, and very suitable for most decorative purposes; it makes an excellent companion to the blue kinds. 3s. 6d.

ASPARAGUS PLUMOSUS NANUS

An exceedingly graceful evergreen plant, very useful for all kinds of decorations, and from its exquisite beauty, particularly well adapted for furnishing cut sprays for intermixing with flowers; it is also charmingly elegant when grown in pots as a table plant. Mr. W. B. having imported a large quantity from South Africa, is enabled to offer good plants at 5s., 7s. 6d. and 10s. 6d.

AGAPANTHUS UMBELLATUS FLORE-PLENO.

This distinct plant has been introduced from the Cape of Good Hope. It differs materially from the normal type by producing umbels of dark blue double flowers. 10s. 6d.

ASPARAGUS PLUMOSUS.

An elegant evergreen climber, from South Africa, with slender smooth stems, and numerous spreading branches; the hermaphrodite white flowers are produced from the tip of the branchlets. It is an exceedingly handsome ornamental plant for the greenhouse or conservatory, and its pretty feathery growths are extremely useful for cutting for decoration. 3s. 6d., 5s. and 7s. 6d.

- ASPARAGUS PLUMOSUS NANUS**, *vide* page 54 | **ASPARAGUS TENUSSIMUS**, 5s.

ASPARAGUS VIRGATUS.

This remarkably elegant feathery-looking plant of fruticose habit has been recently introduced from the Cape of Good Hope. The stems bear at the upper end a corymbosoid head of erect branches, of which the lowest is the youngest or most recently developed. 3s. 6d. and 5s.

AZALEA INDICA.

The great value of Indian Azaleas for decorative purposes can hardly be over-estimated. The varieties of this effective plant can be had in blossom for four months of the year; well selected plants affording such a magnificent display of colour and wealth of bloom, that the low price at which beautiful kinds are now offered, should ensure a place for them in every greenhouse and conservatory.

Good selections can be made by Mr. W. B. at 30s., 42s. and 60s. per dozen.

New varieties, 5s., 7s. 6d. and 10s. 6d. each.

 PRINCEPS, *vide* page 57

BLANDFORDIA CUNNINGHAMII.

The late Dr. Lindley, in describing the previously known species of this genus, thus refers to *Blandfordia Cunninghamii*:—"None of them are to be compared for beauty with the plant of which the late Allan Cunningham gave me a specimen, the flowers of which are fully twice as large as *B. marginata* (*grandiflora*). The flowers are of a deep rich red tint, except at the end of the petals, where they are yellow. 5s., 7s. 6d. and 10s. 6d.

AZALEA BALSAMINÆFLORA.

This distinct species has been imported from Japan. In general character it is quite unique; its flowers are bright salmony red, beautifully double, rosette-like, and regularly imbricated, similar to those of a Camellia-flowered Balsam. Being very double, it lasts in perfection a long time, and is invaluable for bouquets as well as for general decoration. 10s. 6d., 15s. and 1 guinea.

**BLANDFORDIA PRINCEPS.**

A very handsome greenhouse perennial. The scape is a foot high, bearing a corymb of many flowers, which are $2\frac{1}{2}$ inches long, pendent, regularly funnel-shaped, with a bright crimson tube and deep golden yellow limb. It must be regarded as the most beautiful of the *Blandfordias* yet known. It has been figured in the *Botanical Magazine*, tab. 6209. 2 and 3 guineas.

**BOMAREA CARDERI.**

An extremely handsome climber, sent from the United States of Colombia by one of my collectors. It is a glabrous twining plant, producing large heads of charming pendulous bell-shaped flowers. The individual flowers, in size and shape, remind one somewhat of those of *Lapageria rosea*, but are rather more contracted towards the mouth, and of a lighter rose-pink colour, while the tips of the segments are spotted with purplish brown. 15s. ; extra strong plants, 2 and 3 guineas.

BOMAREA KALBREYERI.

A new and beautiful species, introduced from South America. The flowers which are borne in terminal umbels, are of an orange-yellow colour, the exterior sepals being bright red. 1½ guinea.

BOMAREA PATAOCENSIS (CONFERTA).

A beautiful new crimson-flowered species from the United States of Colombia, producing immense heads of blossom, composed of from thirty to sixty flowers, each of which is from 2 to 2½ inches long. It is a splendid addition to our greenhouse climbers, its lovely many-flowered bunches of rich crimson Lapageria-like flowers rendering it especially attractive. 15s. and 1 guinea.

CYCADS, *vide* Index

CRINUM PEDUNCULATUM PACIFICUM.

A noble species, known as the Wedding Lily, introduced from Lord Howe's Island, producing immense umbels of deliciously scented, pure white blossoms. The individual flowers are from four to five inches in diameter, and as many as from twenty to thirty are produced in each umbel. The plant is of bold habit, with cylindrical-shaped bulbs. The delightful fragrance of its large and handsome heads of chaste blossoms makes this plant a most desirable acquisition. 10s. 6d. & 15s.

DEYEUXIA ELEGANS VARIEGATA.

DEYEUXIA ELEGANS VARIEGATA.

A very elegant variegated greenhouse plant, introduced from New South Wales. It has a thick rootstock, from which spring numerous leaves, a foot to a foot and a half in length, and about a quarter of an inch in breadth, the colour a deep bright green, with a broad clear edge of creamy yellow. This is one of the Twelve New Plants with which Mr. W. B. gained the First Prize at the Great Show of the Royal Horticultural Society, held at Kensington in 1881. 7s. 6d. and 10s. 6d.

CYCAS REVOLUTA.

This exceedingly handsome decorative plant can be supplied in various sizes; small plants of it are pretty, but large specimens are extremely ornamental and well adapted for decorating either greenhouses or conservatories. It is known as the Chinese Sago Plant. 7s. 6d., 10s. 6d., 15s. and 1 guinea; fine specimens, 3, 4 and 5 guineas each.

CYCLAMEN PERSICUM.

Too much can scarcely be said in favour of the superb varieties of this plant, of which the old *C. persicum* is the type, whether they are regarded as objects for the ornamentation of the greenhouse or conservatory, or for table decoration, for which their compact floriferous character eminently fits them. The flowers are also extremely useful for bouquets, and when plucked, if kept in water, they will last in freshness and beauty for some weeks. Plants full of buds and flowers can be supplied during the winter season, and are then charmingly pretty. 18s., 30s. and 42s. per dozen.

DIANELLA INTERMEDIA.

A free-growing plant, inhabiting the northern and middle Islands of New Zealand. It has linear-ensiform leaves, and much branched panicles, ten to eighteen inches long, bearing numerous whitish flowers, which are succeeded by bunches of pretty dark blue berries. 5s. and 7s. 6d.

DIONÆA MUSCIPULA.

(THE FLY-TRAP PLANT, OR VENUS' FLY-TRAP.)

One of the most wonderful illustrations of vegetable structure and design known among plants, the formation of its leaf organs being singularly adapted for entrapping insects. 2s. 6d. and 3s. 6d.

DORYANTHES EXCELSA, 10s. 6d.

DORYANTHES PALMERI, 3s. 6d. and 5s.

DRACÆNA AUSTRALIS.

This handsome ornamental plant is exceedingly useful for the decoration of the greenhouse or conservatory, where its effective habit always imparts a tropical aspect to the house. It is also well adapted for the purposes of sub-tropical gardening, either in groups or as single specimens, where its graceful mode of growth is very effective. 3s. 6d. to 10s. 6d.; fine plants, 15s., 1, 1½ & 2 guineas.

DRACÆNA AUSTRALIS LINEATA.

An exceedingly handsome and ornamental plant, with fine broad foliage, gracefully recurving. It is strikingly effective for conservatory and greenhouse decoration. 10s. 6d., 15s. and 1 guinea.

DRACÆNA AUSTRALIS VEITCHII, 7s. 6d., 10s. 6d., 15s. and 1 guinea

EPACRIS ONOSMÆFLORA FLORE-PLENO ALBA.

A most beautiful flowering plant from Australia, producing pretty double blush-white blossoms; with the interior not quite covering up the original corolla lobes, which causes them to look like guard petals surrounding the inner petals. The plant is a charming acquisition, and was awarded a First Class Certificate by the Royal Horticultural Society. 10s. 6d., 15s. and 1 guinea.

EPACRIS ONOSMÆFLORA FLORE-PLENO NIVALIS.

This exceedingly desirable and attractive plant is a native of Australia. The flowers have a tubular base ending in the five usual acute corolla lobes, while the interior organs are transformed into a rosette of white petals, forming a fine rosette-shaped flower. These flowers are pure white and very beautiful, the spikes being often as much as a foot long. It has received a First Class Certificate from the Royal Botanic Society. 10s. 6d., 15s. and 1 guinea.

ERYTHRINA COMPACTA.

This magnificent variety is the best and most useful in every respect of all the Erythrinas. It is of compact bushy growth, producing most profusely its splendid attractive bunches of coral-like blossoms. It will be found effective for sub-tropical gardening, and is a truly desirable plant for most decorative purposes, as it blooms very freely in quite a small state. 5s.

EUCALYPTUS CITRIODORA.

The pleasant fragrance of the foliage of this plant renders it a desirable acquisition. The strong lemon-scent, which is emitted when the leaves are gently rubbed, is equally powerful and agreeable with that of the lemon-scented Verbena (*Aloysia citriodora*). The plant is of slender habit, with oblong leaves, clothed with glandular hairs, which give off the powerful and grateful odour above referred to. It is a native of Australia. 3s. 6d.

EUCALYPTUS FICIFOLIA.

This beautiful new crimson-flowered Eucalyptus is not a large-growing species like most others of the family, but is of quick growth, and plants of it are soon covered with its magnificent trusses of crimson-coloured flowers; its leaves yield an essential oil which has proved a valuable febrifuge. 5s.

HIBISCUS CHRYSANTHUS.

A free-growing shrubby plant introduced from Natal. It has hairy stems and roundish sub-trilobate pale green serrated leaves. The flowers are of large size, campanulate, with broad obovate petals, yellow with a purple-crimson spot at the base, forming a dark-coloured eye. This, from its large-sized golden flowers and free habit, will prove a plant of very ornamental character. 5s.

HIBISCUS PEDUNCULATUS.

A very pretty Hibiscus of erect branched habit, the stems hairy and the leaves three-lobed, with toothed margins. The campanulate flowers are showy, the petals bluish or rose coloured, with an involucre of about eight linear segments. It has been imported from Natal. 5s.

KNIPHOFIA QUARTINIANA.

A handsome greenhouse or half-hardy perennial, introduced from Abyssinia. It has an erect simple spike of densely crowded flowers forming a pyramidal raceme terminating the flower scape. The flowers are pendulous and orange-coloured; the leaves are very much recurved. 5s.

LACHENALIA NELSONI, 2s. 6d.

of sorts, 1s. to 2s. 6d.

LAGERSTREEMIA INDICA, 3s. 6d.

of sorts, 3s. 6d. and 5s.

LAPAGERIA ALBA.

This extremely beautiful climber produces numerous fine large bell-shaped pure white flowers. It is a neat-growing plant of free habit. 10s. 6d., 15s. and 1 guinea; fine specimens, 2, 3 and 5 guineas and upwards.

LAPAGERIA ROSEA.

Various sizes of this well-known and extremely useful conservatory climber, 5s., 7s. 6d. and 10s. 6d.; fine specimens, 1, 2 and 3 guineas and upwards.

LAPAGERIA ROSEA SUPERBA.

A magnificent variety, producing fine large flowers of an exceedingly rich and brilliant crimson colour; it is one of the most highly attractive of ornamental climbers for the greenhouse and conservatory. 10s. 6d., 15s. and 1 guinea; fine specimens, 2, 3 and 5 guineas and upwards.

LASIANDRA MACRANTHIA, 3s. 6d.

| **LASIANDRA MACRANTHIA FLORIBUNDA**, 5s. & 7s. 6d.

LATHYRUS SPLENDENS.

A splendid perennial climber, producing a profusion of large and gay scarlet-purple blossoms in clusters of from ten to twelve. The individual flowers are one and a half to two inches in size, the keel almost an inch long, and half as deep, with large banner-like petals. The plant is allied to the common Everlasting Pea, but the blossoms are larger and more abundant, and their colour is much brighter. It is a native of the Mountains of Lower California. 5s.

LEUCOPOGON CUNNINGHAMII, 3s. 6d.

LIBERTIA GRANDIFLORA.

A very handsome herbaceous perennial from New Zealand, which proves to be nearly hardy, and an abundant flowerer. The plant is an evergreen, with tufts of distichous grassy leaves. The flower stems are 3 feet high, bearing spike-like panicles of showy pure white flowers, produced in succession for a month or six weeks. It is a very ornamental plant for the summer flower borders. 5s.

| **LILIUM**, of sorts, *vide* pages 78 to 80

LINUM TRIGYNUM, 2s. 6d.

LITTONIA MODESTA.

A pretty Liliaceous plant of a genus allied to *Gloriosa*; it produces charming golden-yellow bell-shaped flowers, which are highly elegant and attractive. 3s. 6d.

LOMATIA FERRUOINEA, 5s. and 7s. 6d.

| **LUCULIA GRATISSIMA**, 5s. and 7s. 6d.

MACKAYA BELLA.

This beautiful Acanthaceous plant is a native of Natal. The flowers have a pale lilac corolla nearly two inches long, the throat ornamented with delicately pencilled reticulated purple veins, tubular below, campanulate upwards, with a deeply five-lobed spreading limb. The plant is very floriferous, and when in full bloom, appears a mass of most delicate, pendent, campanulate flowers. This charming plant has been figured in the *Botanical Magazine*, tab. 5797. 3s. 6d. and 5s.

An erect-growing hybrid from *S. atropurpurea* crossed by *S. Drummondii*. The pitchers are erect and have rather a narrow wing. The upper end, as well as the roundish incurved undulated lid, is strongly blotched with white and reticulated with crimson veins. 10s. 6d.

SARRACENIA ILLUSTRATA.

This very striking hybrid was raised from *S. flava picta* crossed with *S. Stevensii*. It is a handsome erect-growing sort, with the habit of *S. flava*, and having long funnel-shaped pitchers strongly marked with crimson ribs united by veins of a similar colour. The lid is distinctly marked by strong red curved veins, the throat being prettily veined. 10s. 6d.

SARRACENIA FLAVA, 5s.

FLAVA ORNATA, vide page 71

SARRACENIA FLAVA PICTA, 10s. 6d.

MOOREANA, 10s. 6d.

SARRACENIA MADDISONIANA.

A hybrid between *S. variolaris* and *S. psittacina*, dwarf in habit, with erectish, incurving, short broad pitchers, which are green with dull red veins externally. The lid is large, incurved over the tube, ovate and wavy, strongly ribbed with deep purple red veins. 10s. 6d.

SARRACENIA DRUMMONDII.

A very beautiful plant, belonging to the family of the Side-saddle flowers, and inhabiting the marshes of Florida. The leaves or pitchers grow from $1\frac{1}{2}$ to $2\frac{1}{2}$ feet high, the upper expanded end being variegated with white, red and green, the hood or lid being similarly marked. The flowers are handsome and attractive, of a rich crimson purple colour. 10s. 6d., 15s. and 1 guinea.

S. SWANIANA.

S. MITCHELLIANA.

SARRACENIA SWANIANA.

SARRACENIA MITCHELLIANA.

For description and prices, *vide* page 70.

SARRACENIA MITCHELLIANA.

An elegant hybrid between *S. Drummondii rubra* and *S. purpurea*. It is graceful in its aspect, the pitchers traversed by a profuse network of fine red veins, the whole changing later on to reddish-crimson. The lid is undulated, with a bold reticulation of deep crimson-red. For Illustration, *vide* page 69. 10s. 6d.

SARRACENIA PSITTACINA, 1 guinea.
PURPUREA, 3s. 6d. and 5s.

SARRACENIA RUBRA, 5s. and 7s. 6d.
RUBRA-ACUMINATA, 10s. 6d.

SARRACENIA SWANIANA.

A very handsome hybrid between *S. variolaris* and *S. purpurea*. Awarded a First Class Certificate by the Royal Horticultural Society. It partakes most of the aspect of *S. purpurea*, but is more erect. The pitchers are slightly incurved and greenish purple, the lid and the inside of the tube being reticulated with crimson veins. For Illustration *vide* page 69. 10s. 6d.

SARRACENIA STEVENSII, 7s. 6d.

SARRACENIA VARIOLARIS, 7s. 6d.

SARRACENIA TOLLIANA.

A very handsome hybrid raised between *S. Drummondii alba* and *S. flava*. It is remarkable for its long, slender, funnel-shaped pitchers and very broad wing. The funnel is either wholly deep purple-red with darker ribs and veins, or greenish with dark purple ribs and veins. The lid is broad and reticulated with reddish purple. 10s. 6d.

SARRACENIA WILSONIANA.

A very distinct and striking plant, a hybrid between *S. purpurea* and *S. flava*, so distinct and pleasing as to have won a First Class Certificate from the Royal Horticultural Society. The pitchers are erect, with deep purple-crimson ribs, more or less united by cross-veins. The wing and lid, are veined and closely reticulated with deep purple-crimson. 10s. 6d.

 season.

SARRACENIA FLAVA ORNATA.

This is a very distinct and handsome plant, remarkable for its bold and strongly-pronounced venation. The upper part of the pitcher is strongly marked with well-defined reticulations of dark purplish red, which are continued over the lid. It is a very handsome form, the contrast between its clear green and the bold red venation being striking and effective. The flowers are large and very attractive, of a bright yellow colour. Introduced from North America. 10s. 6d.

TURRÆA HETEROPHYLLA.

A small-growing slender-branched shrub, a native of Natal. It has glabrous branches, and ovate undivided or three-lobed leaves, which fall away before the flowering season. The flowers are white, five-petalled, clustered at the end of the branches. 7s. 6d. and 10s. 6d.

VERONICAS.

ANNETTE, pale bluish-purple, with distinct white eye. 1s. 6d.

BELLE FIANCEE, very long spikes of large pure rose flowers, dark carmine eye, very floriferous, 2s. 6d.

BLUE GEM, a variety of neat habit, producing spikes of beautiful blue flowers. 1s.

CAROLINE, light lilac-blue, with small white eye; exceedingly free-flowering. 1s. 6d.

DISPLAY, rosy-crimson, with small white eye; free, and of good habit. 1s. 6d.

EVA, a compact growing variety, producing fine spikes of pretty pink flowers. 1s. 6d.

FLEUR D'AUTOMNE, long spikes of rosy-violet flowers, dark rose centres. 2s. 6d.

IMPERIALE, brilliant amaranth-red, changing to carmine-magenta. 1s. 6d.

JARDIN FLEURI, long spikes of dark carmine red flowers. 2s. 6d.

LA FÉE AUX ROSES, very long spike of bright rose flowers, very floriferous. 2s. 6d.

MADAME MOULINS, lavender violet, large carmine centre, shaded with amaranth, a remarkable variety. 2s. 6d.

M. J. MOULINS, immense spikes of pure rose flowers, edged with white; dark carmine rose centre. 2s. 6d.

THÉOPHILE ROQUES, a very floriferous dwarf variety, long spikes of soft rose flowers edged with white, white eye. 2s. 6d.

REINE DES BLEUES, immense spike of very bright blue flowers, very free. 2s. 6d.

RUBENS, flowers large and fine, of a beautiful magenta colour. 1s. 6d.

VESTA, exceedingly floriferous; beautiful light blue, with attractive white centre. 1s. 6d.

GREENHOUSE RHODODENDRONS.

ÆRUGINOSUM, 3s. 6d. and 5s.

ANDERSONI, a handsome introduction from the Himalayas, giving very large and fine trusses of blossoms, which are of a bright rich carmine colour. 3s. 6d. and 5s.

ASSAMICUM, a free-growing evergreen species, with narrow lanceolate densely-set leaves. The flowers are about 3½ inches broad, pure milk-white, with a cream-coloured stain at the base of the upper lobe near the mouth of the tube. This distinct, free-flowering and handsome Rhododendron, as its name indicates, has been imported from Assam. 5s.

BARBATUM, bright scarlet flowers, distinct and effective. 5s.

BLANDFORDÆFLORUM. 3s. 6d. and 5s.

CALOPHYLLUM, a handsome species, producing large funnel-shaped pure white flowers. 5s.

CILIATUM, bluish white; very free flowering. 2s. 6d.

CINNABARINUM. 3s. 6d. and 5s.

CINNAMOMEUM, the under surface of the leaves of this variety is covered with a very thick woolly tomentum of an intense cinnamon colour. 5s.

COUNTESS OF DERBY, bell-shaped flowers of great substance and large size; pure white and most deliciously fragrant; a very free-blooming variety. 7s. 6d.

COUNTRESS OF HADDINGTON, large bluish-white flowers; exceedingly beautiful. 5s. and 7s. 6d.

DALHOUSIANUM. 5s.

DAVIESII, a free-growing hybrid of bushy habit, producing freely its trusses of beautiful flowers of a lustrous orange-red colour. 10s. 6d., 15s. and 1 guinea.

DUCHESS OF CONNAUGHT, bright vermilion-red flowers of great substance; compact truss. 15s. and 1 guinea.

DUCHESS OF EDINBURGH, large scarlet flowers, very beautiful. 15s. and 1 guinea.

DUCHESS OF SUTHERLAND, a robust growing variety, producing pure white sweet-scented flowers, with a beautifully fringed margin. 5s.

DUCHESS OF TECK, buff-yellow, shaded with scarlet, very fine. 15s. and 1 guinea.

EDGORTHII, a handsome free-flowering species, with large pure white spreading cup-shaped fragrant flowers. 3s. 6d. and 5s.

EMBLEM, this produces immense heads of long-tubed flowers; the tube bluish and the segments of a beautiful rich bright pink colour; exceedingly handsome and attractive. 7s. 6d., 10s. 6d. & 15s.

FALCONERI, magnificently ornamental; this species has the largest leaves in the genus. 5s. & 7s. 6d.

FORMOSUM GRANDIFLORUM, a free-blooming variety, with finely formed pure white flowers; a neat growing kind, and very useful for conservatory decoration. 3s. 6d. and 5s.

GREENHOUSE RHODODENDRONS—continued.

- FRAGRANTISSIMUM**, deliciously fragrant flowers, of the purest white, lightly spotted with ochre on the upper segment; the back of the flower pencilled and shaded with rose. 5s. and 7s. 6d.
- FULGENS**, rich fiery crimson; extremely showy and effective; compact habit. 3s. 6d. and 5s.
- GIBSONI**, 3s. 6d.
- HIMALAICUM**, this variety produces fine large handsome trusses of bright carmine flowers. 3s. 6d.
- HODGSONI**, a splendid species, producing superb bouquets of rose-coloured flowers. 10s. 6d.
- JAMESONI**, this variety produces large terminal trusses of handsome bright red flowers. 3s. 6d. & 5s.
- JASMINIFLORUM**, an elegant free-blooming species, with fragrant white flowers, borne successively in clusters. 3s. 6d. and 5s.
- JAVANICUM**, a beautifully golden-yellow flowering species. 5s.
- JENKINSII**, flowers exceedingly large, funnel-shaped, and of snowy whiteness; the handsome wax-like attractive blossoms render it a most beautiful plant for conservatory decoration. 5s.
- LADY ALICE FITZWILLIAM**, clusters of white blooms, each flower three and a half to four inches across. 2s. 6d., 3s. 6d. and 5s.
- LADY SKELMERSDALE**, pure white trumpet-shaped fragrant flowers; very handsome 5s.
- MRS. JAMES SHAWE**, a variety of bushy habit, producing in profusion pure white sweet-scented flowers, which are cup-shaped and of great substance. 5s.
- MULTIFLORUM**, bears a profusion of beautiful white flowers; of dwarf habit, 2s. 6d. and 3s. 6d.
- NILAGIRICUM**, a splendid species from the Neilgherry Hills and Nepal, producing immense terminal trusses of fine large showy flowers, of a beautiful blush colour, blended with deep rich rose and shaded with soft rose; light throat. 3s. 6d. and 5s.
- NIVEUM**, beautiful flowers of a pale lilac colour, spotted with darker lilac on the upper lobe; tube of the corolla yellowish; foliage shining green, the under surface white. 5s.
- NUTTALLII**, a magnificent species; flowers pure white, the largest of the genus. 5s.
- OCRACEUM**, the under surface of the foliage of this variety is ochre-coloured. 5s.
- PINK BEAUTY**, *vide* page 72
- PRINCE LEOPOLD**, a beautiful flower; fawn and rose with rose centre. 15s. and 1 guinea.
- PRINCE OF WALES**, a fine variety producing reddish orange flowers. 7s. 6d. and 10s. 6d.
- PRINCESS ALEXANDRA**, a pretty hybrid variety, of compact growth, with similar flowers to those of *R. jasminiflorum*, but larger and longer tubed, pure white, with pink stamens. 5s. and 7s. 6d.
- PRINCESS ALICE**, a neat dwarf bushy-growing variety of the *ciliatum* type, producing clusters of deliciously-scented bell-shaped white flowers, flushed with pink. 3s. 6d. and 5s.
- PRINCESS HELENA**, this pretty hybrid form, with *R. Princess Alexandra*, was obtained from a cross with *R. jasminiflorum*, but is readily distinguished from it by its much longer tubed flowers, of a delicately tinted soft pink colour, streaked with dark shades. 5s. and 7s. 6d.
- PRINCESS ROYAL**, a handsome and distinct variety of neat compact growth, with clusters of richly-shaded, rose coloured, funnel-shaped flower tubes. 5s. and 7s. 6d.
- RETUSUM**, this distinct species produces clusters of tubular orange-coloured flowers. 5s. and 7s. 6d.
- ROSALIND**, a charming hybrid of neat compact habit, and very free blooming; it produces fine clusters of beautiful long-tubed flowers of a delicate soft pink shade; a most pleasing and effective variety. 7s. 6d., 10s. 6d. and 15s.
- ROSY GEM**, a charmingly attractive hybrid, producing large heads of long-tubed flowers of a rich rose colour, the edges of the segments deep pink, the exterior of the tube bluish-white. This will be found a most desirable acquisition for the greenhouse. 7s. 6d., 10s. 6d. and 15s.
- SESTERIANUM**, fine large fragrant white flowers. 3s. 6d. and 5s.
- TAYLORI**, rich bright pink flowers with white tube; a splendid variety producing fine large trusses. 10s. 6d. and 15s.
- THIBAUDIENSE**, this remarkable Rhododendron has been introduced from Bhotan; its bright red tubular flowers are produced in terminal trusses, in form somewhat resembling those of the *Correas* and *Thibandias*, and having the same alabaster-like translucent lustre, hence its name. 3s. 6d. and 5s.
- THOMSONI**, bright scarlet cup-like flowers of good form. 5s.
- TUBULATUM**, a fine variety, with large tubular pure white flowers; it is a most useful plant for the decoration of the greenhouse or conservatory. 5s.
- VEITCHIANUM**, a beautiful species, with very large white flowers, relieved by a yellow centre or base, and elegantly fringed or frilled on the margin. 5s. and 7s. 6d.
- VIRGATUM**, tube of the corolla short and obconical, with the limb segments spreading; in the different plants that have been raised from seed, the flowers vary in hue from blush to white. 5s.
- VIRGATUM HYBRIDUM**, a neat-habited bushy-growing variety, producing fine trusses of beautiful pure white flowers of good form. 5s.
- VIRGINALE**, the pure white flowers of this beautiful variety are large and funnel-shaped; it has leathery dark green foliage, and forms a splendid plant for conservatory decoration, the great size and snowy whiteness of its blossoms rendering it extremely attractive. 5s.

RHODODENDRON PINK BEAUTY.

RHODODENDRON PINK BEAUTY.

A remarkably beautiful hybrid, producing immense trusses of fine large flowers, of a delicate soft pink colour, with long blush-white tube. This handsome hybrid belongs to the perpetual-blooming section of greenhouse Rhododendrons. 7s. 6d., 10s. 6d. and 15s.

ABUTILONS.

- ALBERT DÉLAUX**, very dwarf variety, large rosy mauve flowers, with dark rose nervations; suitable for growing in pots. 3s. 6d.
- AMARANTINA**, fine well-formed flowers, brilliant purple-amaranth; very floriferous. 3s. 6d.
- ARMAND CAUVY**, large, well-made, clear golden yellow flowers, veined with violet; dwarf, and very free flowering. 7s. 6d.
- AURELIA**, bright golden yellow. 1s. 6d.
- BLANDIL**, deep yellow, veined dark crimson, and reticulated light crimson. 1s. 6d.
- BOULE DE NEIGE**, white. 1s.
- BOULE D'OR**, golden yellow, 1s. 6d.
- CERISE UNIQUE**, immense bright cerise flowers, of perfect shape, with purplish crimson nervations at the base of petals. 3s. 6d.
- CLOCHETTE FLEURIE**, dark violet-amaranth, with purple centre and veins. 2s. 6d.
- CLOTH OF GOLD**, fine smooth golden flowers of great substance. First Class Certificate from the Royal Horticultural Society. 1s. 6d.
- CONQUETE**, a beautiful and very dwarf growing variety, whitish rose, throat dark carmine, with bright rose nervations. 3s. 6d.
- COURONNE D'OR**, downy leaves, large bell-shaped flowers of a beautiful deep sulphur-yellow colour. 1s. 6d.
- DARWINII**, 1s.
- **SUPERBUM**, 1s.
- DESBOISI**, bright rose colour. 1s. 6d.
- ECLIPSE**, a fine large round flower of a rich orange-scarlet colour, shaded crimson, and veined purple. 1s.
- EDOUARD LAYEILLON**, deep rich golden yellow, flushed with rose. 1s. 6d.
- ELEPHANTA**, freely produces on dwarf, compact plants, brilliant chamois yellow flowers, shaded with rose, and veined with violet red. 7s. 6d.
- EMPEROR**, fine large dark crimson flowers. Received First Class Certificate. 1s. 6d.
- EVELINE**, bluish, shaded with pink, and beautifully veined with deep rose. 1s. 6d.
- FLEUR DE NEIGE**, a very large brilliant snow white flower, veined with rose; described by the raiser as the most remarkable variety known in the genus; very free and dwarf. 7s. 6d.
- FUTURE FAME**, deep rose shaded crimson. 1s. 6d.
- G. DÉLAUX**, rich reddish carmine, shaded with violet. 1s. 6d.
- GLOIRE DE SAINT-MARTIN**, a large globular flower of a bright chamois-salmon colour, veined with violet-rose. 2s. 6d.
- HIBISCUS**, canary yellow flowers, the exterior shaded with dark rosy violet; dwarf and distinct. 7s. 6d.
- KING OF CRIMSONS**, deep rich crimson flowers of great substance, extra fine. 1s. 6d.
- KING OF ROSES**, flowers rich deep rose, of great substance. 1s. 6d.
- LA CANDEUR**, a large well-formed pure white flower of globular shape. 1s. 6d.
- LA LORRAINE**, bright red. 1s. 6d.
- LE GRELOT**, delicate rose colour. 1s. 6d.
- LOUISE DÉLAUX**, an extremely dwarf and very floriferous variety, with beautiful white flowers of good shape. 3s. 6d.
- LUSTROUS**, freely produces fine-shaped bright red flowers. 1s.
- L. VAN HOUTTE**, mauve-purple. 1s. 6d.
- LYDIA**, light yellow, flushed crimson, and reticulated with bright crimson. 1s. 6d.
- MDLLE. ANNA DÉLAUX**, rose, marked with white, and veined dark rose. 1s. 6d.
- MARSHAL**, reddish cinnamon, shaded with orange, and veined with crimson. 1s. 6d.
- MEGAPOTAMICUM VARIEGATUM**. 1s. 6d.
- MISS TERRY**, deep yellow, with rose veins, very distinct. 1s. 6d.
- MR. IRVING**, deep scarlet, shaded crimson, a very attractive colour. 1s. 6d.
- MODIOLA**, bright rosy crimson, veined with dark crimson. 1s. 6d.
- M. B. MODESTE**, rich bright crimson-red, veined with dark crimson; showy and attractive. 1s. 6d.
- M. ED. PYNAERT VAN GEERT**, amaranth-purple, veined with very dark brownish carmine, pure white throat. 2s. 6d.
- M. J. B. LEVIS**, a dwarf vigorous variety, produces a multitude of dark chamois flowers, veined with violet cerise; small foliage. 7s. 6d.
- M. LOUIS MARNIGNAC**, rose; reverse of petals of a silvery hue. 1s. 6d.
- M. MOULINS**, cream colour, distinctly veined with violet-rose; throat reddish chocolate; dwarf and free. 1s.
- M. PERPIGNAN**, fine large flower of a bright reddish orange colour, veined yellow and crimson, with yellow throat. 2s. 6d.
- M. PETIT**, rich reddish crimson colour, shaded with crimson-violet, and veined with dark crimson. 1s. 6d.
- M. VIVIAND-MOREL**, a very large fine flower of a violet-colour, shaded with amaranth, and darkly veined. 2s. 6d.
- PHYLLIS**, a large round flower, of a very pale lemon-yellow colour. 1s. 6d.
- PROGNE**, a large well-formed flower of a rich magenta-rose colour. 1s. 6d.
- PURPUREUM**, very fine purple-coloured flowers, shaded with magenta. 1s.
- RICHESE**, bright rose, marked with silvery white, and veined with dark rose; very fine. 1s. 6d.
- ROSEUM ALBUM**, silver-white, shaded with rose; flowers of perfect shape, very dwarf, and most floriferous. 7s. 6d.
- ROSEUM COMPACTUM**, deep rose, very dwarf and compact. 1s. 6d.
- ROSY MORN**, a beautiful flower of a bright rose colour. 1s. 6d.
- ROYAL SCARLET**, a beautiful waxy flower of a brilliant fiery scarlet; dwarf habit. 1s. 6d.
- SCARLET GEM**, very distinct, produces its brilliant red flowers when only a few inches high. 1s.
- SELLOWIANUM VARIEGATUM**, 2s. 6d.
- SERAPH**, pure white. 1s. 6d.
- SILVER BELL**, French white, with deep red veins, very distinct and pretty. 1s. 6d.
- STRIATUM SPLENDIDUM**, bright orange, striped with rich crimson. 1s.

ABUTILONS—continued.

- THE PREMIER**, very large rosy purple flowers of intense brightness. 1s. 6d.
THOMSONI PLENUM, fine double deep rich orange flowers, shaded and streaked with crimson. 1s.
TRIBUTE, bluish pink, veined with rose, and flushed with lilac. 1s. 6d.
TROPHY, yellow, veined with carmine. 1s. 6d.
VENOSUM ROSEUM, soft rose. 1s. 6d.

- VILLE SOLEIL**, a very floriferous dwarf variety; dark carmine cerise flowers, shaded and darkly veined with rich orange brown. 7s. 6d.
VEXILLARIUM GRANDIFLORUM, a hybrid variety, producing a profusion of dark cerise flowers with crimson throat, very distinct. 7s. 6d.
VIVID COMPACTUM, large bright scarlet flowers, compact habit. 1s. 6d.
ZARA, clear lemon-yellow. 1s. 6d.

NEW, RARE, AND DESIRABLE HARDY PLANTS.

- ACER PLATANOIDES PURPUREA**, remarkable for its large dark purple leaves and vigorous growth, making one of the largest trees with purple leaves. 2s. 6d.

- ACER PLATANOIDES SCHWEDLERI**, 3s. 6d.
POLYMORPHUM ATROPURPUREUM, 3s. 6d.
ACIPHYLLA SQUAREOSA, 2s. 6d. and 3s. 6d.
ACORUS JAPONICUS SIEBOLDII STRIATUS, 2s. 6d.

AGAVE UTAHENSE.

A distinct hardy species from the Rocky Mountains, with narrow silvery leaves, radiating, and as it were, forming a star. 3s. 6d.

ALPINE PLANTS.

Choice selections of these pretty plants, suitable for Rock-work, &c. 9s. and 12s. per dozen.

PÆONIA ARBOREA (Tree Pæony), choice sorts, 5s. each, 42s. per dozen.
PASSIFLORA CÆRULEA, 1s. 6d. and 2s. 6d.
PHELLODENDRON AMURENSE, "The Cork Tree of the Amoor," 3s. 6d.

PASSIFLORA "CONSTANCE ELIOTT."

This charming Passiflora has been awarded a first-class certificate by the Royal Horticultural Society. It is hardy, a free grower, and produces in the greatest profusion sweet scented, pure ivory-white flowers, almost without a trace of the bluish tinge peculiar to the type. The inner surface of the sepals and the petals is white; the coronal rays being ivory-white, tinged with yellow towards the tips. 3s. 6d.

PHILADELPHUS GRANDIFLORUS SPECIOSISSIMUS PLENUS.

An extremely beautiful and ornamental hardy shrub, producing very large white flowers, which have a full double centre, and are deliciously scented. 5s.

PHILADELPHUS KETLEERI FLORE-PLENO, 2s. 6d.

PHILADELPHUS MULTIFLORUS PLENUS, 1s. 6d.
 PRIMULÆFLORUS, 3s. 6d.

PHILADELPHUS MICROPHYLLUS.

A small-leaved species of dwarf and compact habit, introduced from California, freely produces large white flowers, most deliciously scented. 2s. 6d.

PHILADELPHUS ROSÆFLORUS PLENUS.

A splendid variety, producing fine large flowers which are very full and double, composed of large imbricated pure white petals. 3s. 6d.

PHLOXES (HERBACEOUS).

Selections of good and choice kinds at 12s. and 18s. per doz.

PIERIS OVALIFOLIA DENSIFLORA.

An evergreen shrub of elegant character and vigorous constitution, introduced from Assam. The leaves are acuminate, of firm texture, and slightly scabrous. The flowers are white, and grow in racemes at the ends of the branches. 3s. 6d. and 5s.

PIPER FUTOKADURA, 3s. 6d. and 5s.

| **POLYCARPA** MAXIMOWICZII, *vide* Idesia polycarpa

POLYGONUM MULTIFLORUM.

A free-growing climbing or trailing plant, of slender habit, with a tuberous root and terete stems, bearing on slender purplish petioles, cordate-ovate acuminate glabrous leaves of a shining satiny green colour, tinted with purple beneath. The flowers are small but very numerous, whitish, and borne in loose spreading panicles. The plant is a native both of China and Japan, but although the young shoots die down in winter, the rootstock has proved quite hardy. 2s. 6d. and 3s. 6d.

POLYGONUM SACHALINENSE.

A free-growing perennial herbaceous plant, producing stout erect branched stems, furnished with large ovate oblong leaves, cordate at the base, having red footstalks, and traversed by a red mid-rib. The flowers grow in small compound racemes. It will form a distinct plant for the herbaceous border, and coming from the Amoor country is perfectly hardy. 1s. 6d. and 2s. 6d.

POPULUS CANADENSIS AUREUS VAN GEERTII,
foliage of an attractive golden hue. 2s. 6d.

POTENTILLA, handsome double-flowered
kinds. 1s. 6d. and 2s. 6d.

**SPIRÆA ASTILBOIDES.**

One of the most handsome of hardy herbaceous perennials, which has been certificated both by the Royal Horticultural and Royal Botanic Societies on account of its great merit. The stems grow from two to three feet high, and are terminated by compound feathery branches of elegant white flowers, produced in the greatest profusion. A charming plant for pot culture. This is one of the Twelve New Plants with which Mr. W. B. gained the First Prize at the Great Show of the Royal Horticultural Society, held at Kensington, in 1882. 10s. 6d.

SPIRÆA PALMATA ELEGANS.

A very distinct and pretty variety, in habit and foliage similar to *Spiræa palmata*, but with white flowers and conspicuous red stamens, which render it extremely effective. 2s. 6d.

STAPHYLEA COLCHICA, 2s. 6d. and 3s. 6d.

STATICE LATIFOLIA, 1s.

STAUNTONIA LATIFOLIA, 2s. 6d.

STYRAX CALIFORNICA, 7s. 6d.

STYRAX JAPONICA, 3s. 6d.

SYRINGA HYBRIDA HYACINTHIFLORA PLENA, 1s. 6d.

VULGARIS FLORE-PLENO LEMOINEI, *vide* page 84

SYRINGA VULGARIS FLORE-PLENO ALPHONSE LAVALLEE.

A very handsome and attractive variety bearing enormous thyrses of double flowers, much branched the shape of the bunch being all that could be desired. The buds are purple, opening a beautiful sky blue shaded with violet. 10s. 6d.

SYRINGA VULGARIS FLORE-PLENO LE GAULOIS.

An extremely attractive variety producing large close thyrses of very double flowers, of a dark peach colour, light centres. 5s.

SYRINGA VULGARIS FLORE-PLENO MATHIEU DE DOMBASLE.

A splendid double-flowered variety, producing immenso thyrses nearly a foot long and from seven to nine inches broad; the expanded flowers of a beautiful reddish mauve colour. 3s. 6d.

SYRINGA VULGARIS FLORE-PLENO MICHEL BUCHNER.

A grand variety, producing fine erect pyramidal shaped thyrses of beautiful double flowers. The petals are prettily imbricated, pale lilac margined with rose; a vigorous grower of superior merit. 10s. 6d.

SYRINGA VULGARIS FLORE-PLENO RENONCULE.

A fine variety, giving long erect thyrses of very full double flowers, which are of an azure-mauve colour and have a very strong perfume. 2s. 6d.

SYRINGA VULGARIS RUBELLA PLENA.

An extremely floriferous variety, producing long erect thyrses of full double flowers, of a clear reddish violet colour; the buds are purple. 2s. 6d.

TIGRIDIA CONCHIFLORA, 3s. per dozen.

GRANDIFLORA, 4s. per dozen.

— ALBA, 4s. per dozen.

— AURANTIACA, 4s. per dozen.

TRICYRTIS HIETA, 1s.

HIETA FLORE-NIGRO, 1s.

TRITOMA BURCHELLII, 1s.

GRANDIS, 2s. 6d.

ROOPERI, 1s. 6d.

} These can be supplied, when dormant, by the dozen or hundred at the proper season.

TRITOMA UVARIA GLAUDESCENS, 1s. 6d.

UVARIA GRANDIFLORA, 2s. 6d.

TRITONIA AUREA, *vide* CROCOSMA AUREA.

UMBILICUS LIEVENII, 2s. 6d.

VERONICAS.

Where the climate is mild these make handsome decorative shrubs for the open border, and produce freely an abundance of showy flowers. They are well adapted for training against low walls or trellises. *Vide* page 72.

VIBURNUM SIEBOLDII.

A bold and effective evergreen shrub, with dark brown warted branches, and opposite dark green flat leaves, which are thick, coriaceous, and laurel-like in character. The leaf-stalks are about an inch long, the blades broadly oblong oval, entire in the lower half, and obscurely and bluntly serrated towards the apex. It is a native of Japan. 5s.

VITIS JAPONICA, *vide* Ampelopsis triancspidata

VINIFERA PURPUREA, 5s.

WEIGELA ABEL CARRIERE, 1s. 6d.

AMABILIS LOOYMANSII AUREA, 1s. 6d.

WEIGELA AUG. WILHELM, 2s. 6d.

BERANGER, 2s. 6d.

DOCTEUR BAILLON, 1s. 6d.

EDOUARD ANDRÉ, 1s. 6d.

WEIGELA CANDIDA.

An extremely distinct variety, of vigorous habit and very free-blooming, producing fine large pure white flowers. 1s. 6d. each; 12s. per dozen.

WEIGELA DIDEROT.

A very attractive and free-blooming variety, with large brilliant red flowers. 5s.

WEIGELA EMILE GALLÉ, 2s. 6d.

GLOIRE DES BOSQUETS, 3s. 6d.

WEIGELA GRATISSIMA, 2s. 6d.

HORTENSIS NIVEA, 1s. 6d.

SYRINGA VULGARIS FLORE-PLENO LEMOINÉ.

A beautiful variety of the *Lilac*, producing large branched spikes, well furnished with double rosette-like flowers; the buds before opening are rose-coloured, and the fully expanded flowers are of a soft lilac shade; but the plant is more particularly charming when forced, in which state the blossoms are pure white; exceedingly useful for all kinds of decoration. 3s. 6d. each; 30s. per dozen.

WEIGELA JEAN MACE.

A distinct and free-blooming variety, producing fine large purple flowers; the buds are of a very dark crimson-purple colour; it is the darkest Weigela in cultivation. 3s. 6d.

WEIGELA MONTESQUIEU.

Fine reddish crimson flowers of perfect shape; a very handsome and distinct variety. 5s.

WEIGELA LAVALLEI, 1s. 6d.

PECHEUR FILS, 2s. 6d.

PURPUREA, 2s. 6d.

WISTARIA FRUTESCENS MAONIFICA, 2s. 6d.

MULTIJOEA, a magnificent species, bearing bunches of bloom from two and a half to three feet long, 2s. 6d.

— **VARIEGATA**, 7s. 6d.

OFFICINAL AND MEDICINAL PLANTS, TROPICAL FRUITS, &c.

Mr. WILLIAM BULL's collection of living economic plants contains specimens of nearly all the spices and condiments in domestic use, many of the most highly esteemed tropical esculent fruits, many of those from which furniture and other woods are obtained, the principal gums and medicinal products, the poison trees from Java, Brazil, and Madagascar, at one time only heard of in tales of fiction, and plants which supply our daily beverages and food, as well as many of historical interest.

The individual prices of the following depend upon the size of the plants and rarity of the species, particulars of which can be furnished on application.

Selections left to W. B. at 2, 3 and 4 guineas per dozen; collections made at 5, 7 and 10 guineas.

Abyssinian Banana	Musa Ensète	Abyssinia
African Mangosteen	Garcinia Livingstonii	Africa
✓ African Rubber	Landolphia Watsonii	Africa
Allspice	Eugenia Pimenta	W. Indies
Arabian Coffee	Coffea arabica	Yemen
Arrowroot	Maranta arundinacea	S. America
Arnotto Dye Plant	Bixa Orellana	Tropical America
Australian Banyan	Ficus macrophylla	Australia
Avocado Pear	Persea gratissima	West Indies
Balsam of Peru	Myroxylon Pereira	Peru
Banyan Tree	Ficus indica	E. Indies
Bark of Commerce	Cinchona officinalis	Tropical America
Bengal Quince	Ægle Marmelos	E. Indies
Betle Pepper	Piper Bétlo	E. Indies
✓ Bitter Quassia	Quassia amara	Guiana
Black Pepper	Piper nigrum	E. Indies
Brazil Nut	Bertholletia excelsa	Brazil
✓ Butter Tree	Bassia butyracea	E. Indies
Cabbage Palm	Eutérpe edulis	Brazil
Camphor	Camphora officinalis	Japan
✓ Candle Tree	Parmentiera cecifera	Panama
Cannon Ball Tree	Couroupita guianensis	British Guiana
Caoutchouc	Castilleja elastica	Honduras
Capo Chestnut	Calodendron capense	Cape Colony
✓ Captain Cook's Tea Plant	Leptospermum scoparium	New Zealand
Cardamon	Amomum Cardamomum	E. Indies
✓ Cascarilla Bark	Croton Elutéria	Bahama Islands
Cassia	Cinnamomum Cassia	East Indies
✓ Ceara Rubber	Manihot Glaziovii	Brazil
Chinese Plantain Tree	Musa Cavendishii	China
Cinnamon	Cinnamomum zeylanicum	Ceylon
✓ Clove Tree	Caryophyllus aromaticus	E. Indies
✓ Coca	Erythroxylon Coca	Peru

Cocoa	Theobroma Cacao	Tropical America
Coffee	Coffea arabica	Yemen
Contrainerva Root	Dorstenia Contrainerva	S. America
✓ Cuba Bast	Paritium elatum	W. Indies
Cubeb Pepper	Piper Cubeba	Java
Cundurango	Gonolobus Cundurango	S. America
Date	Phoenix dactylifera	Levant
✓ Durian	Durio zibethinus	India
Edible-fruited Passion Flower	Passiflora edulis	Brazil
✓ Edible Vangueria	Vangueria edulis	Madagascar
Elephant Apple	Feronia elephantum	E. Indies
Fiddlo Wood	Citharexylon quadrangulare	Jamaica
Fig, Sacred	Ficus religiosa	E. Indies
Flamo Tree	Brachychiton acerifolium	New South Wales
Fustick Wood	Maelura tinctoria	W. Indies
Gambogo	Zanthoxylum pictorius	E. Indies
Gigantic Granadilla	Passiflora macrocarpa	Rio Negro
Ginger	Zingiber officinale	E. Indies
Granadilla	Passiflora quadrangularis	W. Indies
✓ Guarana Tea Plant	Paullinia sorbilis	Brazil
Guava	Psidium Cattleianum	Brazil
Gun Arabic Tree	Acacia arabica	Arabia
Ipecacuanha	Cephaelis Ipecacuanha	Brazil
Ivory Nut Palm	Phytelephas macrocarpa	Peru
Jack Fruit	Artocarpus integrifolia	W. Indies
✓ Jalap	Exogonium purga	Mexican Andes
Japan Cinuamon	Cinuamomum sericeum	Japan
Japanese Pepper	Piper Funtokadsura	Japan
✓ Kokum Oil	Garcinia indica	E. Indies
Kola Nut	Cola acuminata	Niger
Latania Palm	Latania borbonica	Bourbon
Ledger's Bark	Cinchona Ledgeriana	S. America
Lemon Grass	Cymbopogon Schoenanthus	E. Indies
Liberian Coffee	Coffea liberica	Africa
Logwood Tree	Hæmatoxylon campechianum	S. America
Loquat	Eriobotrya japonica	Japan
Mahogany Tree	Swietenia Mahagoni	W. Indies
✓ Malabar Silk Cotton Tree	Bombax malabaricum	Malabar
Mango	Mangifera indica	E. Indies
Mangosteen	Garcinia Mangostana	Java
Manilla Hemp	Musa textilis	Philippine Isles
Matico	Artauto elongata	Peru
✓ Milk Tree	Galaetodendron utile	S. America
✓ Moreton Bay Chestnut	Castanospermum australe	Australia
✓ Mustard Tree of Scripture	Salvadora persica	Persia
✓ Nardoo	Marsilea macropus	Australia
✓ Natal Plum	Arduina grandiflora	Natal
Netted-leaved Custard Apple	Anona reticulata	S. America
✓ New Caledonian Apple	Eugenia magnifica	New Caledonia
New Zealand Tea Plant	Leptospermum scoparium	New Zealand
✓ Nutmeg	Myristica moschata	E. Indies
✓ Palissander Wood	Machernum firmum	S. America
Para Rubber	Hevea brasiliensis	Brazil
Patchouli Scent Plant	Pogostemon Patchouli	E. Indies
Poison Bulb	Buphane (Brunsvigia) toxicaria	Natal
Poison Nut	Thevetia nerifolia	W. Indies
Queensland Nut	Macadamia ternifolia	Queensland
✓ Queensland Plum	Davidsonia pruriens	Queensland
Rhea Fibre Plant	Böhmeria nivea	India
Rhubarb	Rhëum officinale	China
Sand Box Tree	Hura crepitans	S. America
✓ Sandal Wood	Santalum album	E. Indies
Sarsaparilla	Smilax Sarsaparilla	N. America
✓ Satin Wood	Chloroxylon Swietenia	E. Indies
Snake Wood	Cecropia palmata	S. America
Soap Berry	Quillaja Saponaria	S. America
Sour Sop	Anona muricata	W. Indies
South American Papaw	Carica cundinamaricensis	Colombia
Star Apple	Chrysophyllum Cainito	W. Indies
Sugar Cane	Saccharum officinarum	India
Sweet Sop	Anona squamosa	S. America.

Sycamore Tree of Scripture	Ficus Sycomorus.....	Egypt
Tamarind Tree.....	Tamarindus indica.....	E. Indies
Tea	Thea Bohéa.....	China
Telegraph or Moving Plant	Desmodium gyrans.....	E. Indies
✓ Tonga	Epipremnum mirabile	South Sea Islands
✓ Tonquin Bean	Dipterix odorata.....	Guiana
Traveller's Tree	Ravenala madagascariensis	Madagascar
Turpentine Tree	Pistacia Terebinthus	S. Europe
Vanilla	Vanilla aromática	S. America
Zerumbet Ginger.....	Zingiber Zerumbet	E. Indies

Purchasers of Official and Medicinal Plants, Tropical Fruits, &c., can have selections of living specimens made by W. B. from the preceding at 2, 3 and 4 guineas per dozen; or collections made at 5, 7 and 10 guineas. The difference in price principally depends upon the size of the plants, and the rarity of the species.

ORCHIDS.

In Mr. WILLIAM BULL'S Establishment will be found the largest and best stock in Europe of good established plants—tens of thousands of plants to select from. His Orchid Houses are always quite a sight, from the large number of plants in flower, and he will be pleased to show them to anyone interested in this beautiful class.

Mr. W. B. recommends those desirous of having their houses gay with Orchid flowers to purchase good, established well-cultivated plants, which bloom well, are more satisfactory, and comparatively cheaper than newly-imported or semi-established plants.

Besides plants at the prices enumerated, Mr. W. B. has a large quantity of very fine specimens (some of them unique), at 5, 10, 15 and 20 guineas each, and upwards.

S, distinguishes the stove kinds; I, intermediate house; C, cool house.

Those marked thus (*) are winter-blooming kinds.

ODONTOGLOSSUM VEXILLARIUM INSIGNE.

A splendid variety of this popular Orchid. The flowers are of a deep rosy blush colour, with a prominent transverse band of bright yellow across the base of the lip, above the yellow band are two parallel crimson lines, and below the band on the white basal part of the lip is a broad transverse semicircular blotch of deep purplish red. Price on application.

CHOICE ORCHIDS.

EAST INDIAN
MEXICANWEST INDIAN
PERUVIANCOLOMBIAN
BRAZILIAN

Collections made at 3, 4, 6, 9 and 12 guineas per dozen.

ORCHIDS FOR COOL HOUSES.

It being well known that many Orchids can be easily and successfully cultivated in a cool temperature, with scarcely any artificial heat during a great part of the year, Mr. W. B. has devoted several houses to this beautiful and desirable class, and will be pleased to make good selections of them at
3, 4, 6, 9 and 12 guineas per dozen.

SPHAGNUM MOSS FOR ORCHIDS.

3s. 6d. per bushel; 12s. per sack.

BEST FIBROUS PEAT FOR ORCHIDS.

10s. per sack.

NEW AND CHOICE ACHIMENES.

VIOLETTA, a very pretty and free-flowering new variety of vigorous growth, producing an abundance of rich violet-purple flowers, the centre of each lobe and the mouth of the throat being very darkly veined. 5s.

Good selections made at 6s., 9s. and 12s. per dozen, according to sorts.

New and choice sorts, 18s. and 30s. per dozen, according to sorts.

GESNERAS (NÆGELIAS).

The value of Gesneras as decorative plants can scarcely be over estimated. Most of them have rich velvet-like foliage, which, in the respective kinds, varies from green to crimson. If only grown for the foliage they are very attractive, but they produce splendid pyramidal spikes of blossom, which are extremely handsome. Originally, however, the principal colour was orange-scarlet; now, as the result of fertilisation, there are various colours and shades, added to which the spotting on the flowers of some of the varieties is extremely pretty. Selections of good varieties at 30s. and 42s. per dozen, according to sorts.

GESNERAS, see also page 36.

NEW HYBRID GESNERAS.

LE PRODIGE, a distinct variety with handsome foliage; the flowers which are fringed, being of a rose colour shaded with purple, fading towards the edge into rosy-salmon. 5s.

MADAME HEINE, flowers of large size and perfect shape, freely produced in fine pyramidal branching racemes, the tube and outside lobes being of a rich violet-purple colour, the centre white shaded with rose and spotted with purple, while the interior of the throat is orange-yellow with crimson spots. The plant is remarkable on account of the lower flowers often producing a number of petaloid segments, thus giving to the blooms a semi-double appearance. 5s.

MADAME JEHENNE, a variety of vigorous growth, producing large showy flowers of a dark rosy-violet colour, resembling in shape those of an Achimenes. 5s.

PYRAMIDAL, a vigorous growing variety, freely developing numerous lateral branches, which become covered with rose coloured flowers, shaded with purple; the throat is golden-yellow with small crimson spots. 5s.

SOUVENIR DE MADAME JOIGNOT, this variety has handsome bronze-green leaves, the Achimenes-like flowers, which are abundantly produced, being of a rich carmine-purple colour. 5s.

NEW AND CHOICE GLOXINIAS.

For New Varieties, offered for the first time, *vide* page 9.

NEW VARIETIES OF 1885.

WITH ERECT FLOWERS.

ACTIVE, white lobes freckled with bluish purple, the markings smaller and lighter towards the margin; light throat spotted with purple. 5s.

AMETHYST, azure blue, lighter towards the edges of the lobes; throat pure white, extending to the centre of each lobe. 5s.

CYGNET, pure white, the lobes broadly margined with soft pink; very pretty. 5s.

HYDRA, white, the lobes margined with pale rose, marked with bright rose at the intersections of the lobes. 5s.

MALABAR, lobes pale rose; centre of lobes and mouth bright crimson; light throat, shaded with violet. 5s.

SABRINA, intensely deep crimson, the lobes margined with pale rose; light throat freckled crimson. 5s.

Choice selections made by Mr. W. B. at 18s., 30s. and 42s. per dozen according to sorts.

GLOXINIA INSONIS, this distinct variety produces its flowers during the autumn and winter; colour bluish lilac, marked with a large crimson blotch at the base of the tube. 2s. 6d.

MACULATA SCEPTRUM, a magnificent hybrid, with extra large erect cordate foliage; it produces a rigid terminal inflorescence, exceeding 20 inches in height, which bears majestically its large, clear lilac, well-formed blooms. 1s. 6d.

TYDÆAS.

These can be cultivated so as to produce an abundance of bloom throughout the winter, their flowering season principally depending on the time of year their tubers are started into growth. With a little management a succession of blooming plants can be had nearly throughout the year. 18s., 24s., 30s. and 42s. per dozen, according to sorts.

NEW AND CHOICE REGAL PELARGONIUMS.

This name is applied to that magnificent group of Pelargoniums, the flowers of which are of large size, with very rich and showy colours, and which, although they are not really double, yet have the appearance of being so from their full and crispy form, and the extra number of their frilled petals.

ALEXANDRE DE NAPADIEWICZ, a fine flower of a salmon-carmine colour, widely margined with white; upper petals blotched with maroon; large white centre. 3s. 6d.

BEAUTY OF OXTON, upper petals rich maroon, darkly blotched; under petals dark crimson, shaded with maroon; light centre, tinted with rose; all the petals regularly margined white, and beautifully fringed. 1s. 6d.

CAPTAIN RAIKES, a fine large full flower; upper petals deep fiery crimson, flaked with purplish black, and bordered with carmine; lower petals clear bright fiery crimson. 2s. 6d.

COUNTESS OF ROSEBERRY, a desirable variety, producing large trusses of pure white flowers, with a spot of delicate rose in the upper petals, the margin of the flower being prettily fringed. 2s. 6d.

NEW AND CHOICE REGAL PELARGONIUMS—continued.

- DR. MASTERS**, the upper petals have large black blotches in the centre, with a narrow margin of rich crimson; the lower petals have a smaller blotch, with a broader margin of the same colour as the upper. 1s. 6d.
- DUCHESS OF BEDFORD**, a very useful and charming variety; its blossoms are of the purest white, prettily fringed, with feathered spot of delicate rose on upper petals. 1s. 6d.
- DUKE OF ALBANY**, deep rich crimson-maroon, margined with rosy lake; light centre surrounded with violet-rose shading; all the petals beautifully undulated and fringed; fine full flower; extremely showy. 2s. 6d.

CAPTIVATION, bright scarlet shaded with crimson; a large flower borne in immense trusses. 1s. 6d.
CELLA, soft rosy purple, upper petals shaded with scarlet, quite a novel and distinct flower. 1s.
CHELSEA GEM, of compact and free growth, a most profuse bloomer, and an excellent bedder; the foliage is bright green, with a broad marginal variegation of pure white; large trusses of full double flowers of a charming rose-pink colour. 1s. 6d. & 2s. 6d.; 12s. & 18s. per dozen.

NEW AND CHOICE DOUBLE-FLOWERED ZONAL PELARGONIUMS—continued.

- CRATINUS**, bright cerise-scarlet, a very fine flower; trusses immense. 1s.
DR. PHINNEY, a splendid variety, intense scarlet, shaded very deep crimson. 1s.
ELATHEUS, a large full flower of a bright crimson colour, shaded with purple. 1s.
ESPERANCE, very pretty delicate blush flowers. salmon centre. 3s. 6d.
EURIPIDES, bright cerise-scarlet, a large flower; very showy and attractive. 1s. 6d.
FRIANT, fine large yellow cinnabar flowers, a beautiful variety. 2s. 6d.
GÉNÉRAL DE COURCY, large trusses of very double flowers, brick red in centre shading to salmon, marbled with white. 3s. 6d.
GIL BLAS, fine compact truss of bright cherry-coloured flowers, brightened with fiery crimson. 2s. 6d.
GLOIRE DE FRANCE, very large double flowers, centre dark salmon, shading to whitish rose; extra large trusses. 3s. 6d.
GORDIUS, bright salmon-pink, the colour becoming deeper towards the centre of the flower. 1s.
HARMONIA, a very large full flower of a light cerise colour, shaded with vermilion. 1s.
HOMER, extremely floriferous, flowers of a rich soft magenta-crimson. 1s. 6d.
KHEDIVE, a fine full flower of a soft rose colour; dwarf and free-blooming. 2s. 6d.
L'ABBÉ GRÉGOIRE, dark crimson, marked bright reddish amaranth in the upper petals. 3s. 6d.
L'ANDALOUSE, large trusses of creamy white flowers, very free. 2s. 6d.
LA JEANNETTE, dwarf and free; large full flowers of the most pure snowy whiteness. 2s. 6d.
LA PERLE, enormous trusses of rosy lilac flowers, bordered with deep rose, very fine. 3s. 6d.
LE CYGNE, a pure white variety with perfect double flowers. 1s. 6d.
LYSIAS, large trusses of flowers of a deep salmon colour, flushed with vermilion. 1s. 6d.
MADAME DE NAUROS, rosy carmine flowers, maculated with white, light centre. 3s. 6d.
MARIE TALLANDIER, of dwarf vigorous habit, fine full pure white flowers. 1s.
M. J. DELAUX, rosy purple, shaded with carmine, upper petals marked with white. 3s. 6d.
MRS. E. G. HILL, pale blush, shaded with delicate lavender; flowers large, trusses immense. 1s.
ODYSSEUS, deep magenta-crimson the upper petals marked with scarlet; immense trusses. 1s. 6d.
PANAMA, large trusses of rosy salmon flowers, the centre being salmon-vermilion. 1s.
PAUL DE SAINT VICTOR, enormous trusses of fine large flowers of a carmine-rose colour. 1s.
PETER HENDERSON, bright orange-scarlet, base of the petals white; of good habit. 1s.
PETIT JEAN, enormous trusses of Solferino coloured flowers, the upper petals fiery red. 2s. 6d.
PICCO, light pink, a fine large showy semi-double flower. 1s.
PROUVÉ, very large trusses of bright cerise flowers, darkly blotched on the upper petals. 2s. 6d.
REMARKABLE, rich deep violet-crimson flowers of very fine shape; trusses immense. 1s.
RICHARD BRETT, immense trusses of fine full flowers of a very bright orange colour. 1s.
ROBERT GEORGE, deep crimson-scarlet, flowers of great size and freely produced. 1s.
SERGEANT BLANDAN, very large trusses of rich orange-madder flowers. 3s. 6d.
SERGEANT BOBILLOT, beautiful rosy purple flowers; fine trusses. 3s. 6d.
SIR GARNET WOLSELEY, enormous trusses of rich salmon-red flowers. 1s.
SOLEILLET, rich violet-lake, with bright scarlet marking in the upper petals. 1s.
SOPHOCLES, rosy carmine, shaded with scarlet, fine large flowers, borne in immense trusses. 1s. 6d.
STENYO, remarkably attractive, huge trusses of fine large flowers of a soft rosy carmine colour. 1s. 6d.
THE BLONDE, salmon, shaded with orange, fine large flowers and immense trusses. 1s.
TOSILOS, a fine full flower of a rich magenta-crimson colour, shaded with scarlet. 1s.
TRITON, soft rosy pink, lighter in the centre of the flower; trusses large and fine. 1s.
TRIOMPHE DE FRANCE, enormous trusses of carmine-amaranth flowers, shading to rose. 3s. 6d.
TYNDARUS, a large full flower of an exceedingly rich shade of magenta-crimson colour. 1s.

Selections of other good varieties can be made from Mr. W. B.'s general collection at 9s., 12s. and 18s. per dozen.

SWEET-SCENTED LEAVED PELARGONIUMS.

Selections made by Mr. W. B. at 18s. and 24s. per dozen, according to sorts.

NEW AND CHOICE VARIEGATED, GOLD AND SILVER TRICOLOUR PELARGONIUMS.

Selections made by Mr. W. B. at 12s., 18s. and 30s. per dozen, according to sorts.

NEW AND CHOICE BRONZE, GOLD AND SHADED YELLOW PELARGONIUMS.

Selections made by Mr. W. B. at 9s., 12s., 18s. and 30s. per dozen, according to sorts.

CYATHEA SMITHII.

CYATHEA DEALBATA.

DICKSONIA ANTARCTICA.

Vide next page.

TREE FERNS.

Of these majestic plants the stock is very large. They have stems varying in height from one foot to twelve feet, and having been imported from Australia and New Zealand, they are such as will succeed well in any ordinary greenhouse. Their fine graceful habit and singularly distinct appearance render them peculiarly adapted for the decoration of conservatories. They range in price according to sorts, sizes, and strength of the specimens. It may, however, be as well to remark that they are not merely newly imported trunks, but well established plants with fine heads, many of them having been grown in this country several years. The measurements of some of the plants are given below :—

Prices on application, or an inspection invited.

DICKSONIA ANTARCTICA.			DICKSONIA ANTARCTICA.

CHOICE STOVE FERNS.

MR. WILLIAM BULL'S general collection of these elegant decorative plants is of considerable extent, and comprises kinds that are moderate in price, as well as many that are extremely rare and unique.

Selections for the Stove can be supplied at 18s., 30s. and 42s. per dozen.

ADIANTUM ANEITENSE.

A very elegant free-growing species of Maiden-hair Fern, introduced from the Island of Aneiteum. It has a creeping rhizome clothed with dark coloured scales, and divided deltoid fronds. The numerous segments of which the fronds are made up are rhomboidal, nearly sessile, firm in texture, with a glabrous surface, subglaucous beneath, and shallowly lobed along the upper and outer edges, where the roundish reniform sori are borne in the centre of the lobes. It is a distinct and ornamental evergreen Stove Fern, and was one of the twelve New Plants with which Mr. W. B. gained the First Prize at the Great Show of the Royal Horticultural Society, held at Kensington in 1880. 3s. 6d. and 5s.

ADIANTUM AMABILE, 2s. 6d.

BAUSEI, 3s. 6d.

BELLUM, 3s. 6d.

CARDIOCHLÆNA, 3s. 6d.

CILIATUM, 3s. 6d.

CONCINNUM, 1s. 6d. and 2s. 6d.

— LATUM, 2s. 6d. and 3s. 6d.

CURVATUM, 3s. 6d.

DOLABRIFORMIS, 3s. 6d.

ADIANTUM FARLEYENSE, 2s. 6d., 3s. 6d. and 5s.

FARLEYENSE ALCICORNE, 5s.

GIESBRECHTII (SCUTUM), 3s. 6d.

LATHOMI, 3s. 6d.

LEGRANDII, 3s. 6d.

LUNULATUM, 3s. 6d.

MACROPHYLLUM, 3s. 6d.

PENTADACTYLON, 3s. 6d.

ADIANTUM OBLIQUUM MINUS.

An elegant dwarf evergreen Stove Fern from the United States of Colombia. It has a creeping rhizome, thickly furnished with pinnate fronds, which have blackish stipes, and a lamina composed of shortly-stalked pinnae, curved upwards at the point, which is acuminate. In the sterile fronds the pinnae are inciso-dentate, the fertile ones bear close set, but distinct oblong sori. 10s. 6d.

ADIANTUM PERUVIANUM, 3s. 6d. and 5s.

PRIONOPHYLLUM, 3s. 6d.

RHODOPHYLLUM, 5s.

RUBELLUM, 3s. 6d.

SANCTÆ CATHERINÆ, 3s. 6d.

SPECIOSUM, 5s.

TENERUM, 2s. 6d.

TETRAPHYLLUM GRACILE, 7s. 6d.

TINCTUM, 3s. 6d.

TRAPEZIFORME, 3s. 6d.

VICTORIÆ, 3s. 6d.

ANEMEDICTYON PHYLLITIDIS, 1s. 6d. and 2s. 6d.

PHYLLITIDIS TESSELLATA, 5s.

ANGIOPTERIS ERECTA.

ANTIGRAMMA BRASILIENSIS, 7s. 6d. and 10s. 6d.

ASPIDIUM TRIFOLIATUM, 2s. 6d. and 3s. 6d.

ASPENIUM ALATUM, 3s. 6d.

BELANGERI, 2s. 6d.

CICUTARIUM, 2s. 6d.

FERNANDEZIANUM, 3s. 6d.

HETEROCHEIROM, 5s.

HOOKERIANUM, 3s. 6d.

PROLONOTUM, 3s. 6d. and 5s.

SIEPHERDII, 2s. 6d. and 3s. 6d.

VIVIPARUM, 3s. 6d.

BLECHNUM BRASILIENSE, 3s. 6d.

INTERMEDIUM, 3s. 6d.

POLYPODIODES, 2s. 6d. and 3s. 6d.

CHEILANTHES CHLOROPHYLLA.

A free-growing cool Stove Fern, imported from Brazil. The fronds are ovate lanceolate tripinnatifid, the pinnae distant lanceolate, the pinnules lanceolate, and the lobes entire linear oblong. The stipes are dark chestnut-brown and polished. 5s. and 7s. 6d.

CHEILANTHES ELEGANS, 2s. 6d. and 3s. 6d.

HIRTA ELLISIANA, 3s. 6d.

CIBOTIUM SCHIEDEI, 5s. and 7s. 6d.

CYATHEA (CIBOTIUM) PRINCEPS, *vide* page 123.

DAVALLIA FENICULACEA.

A charming evergreen Stove Fern, introduced from the Fiji Islands. It forms a short, thick, decumbent caudex, from which arise the finely cut fronds, which are from 1½ to 2 feet high, and about 9 inches or a foot broad in the fully developed state; they are lanceolate in outline, quadri-pinnate, of stout herbaceous texture, the ultimate segments cut down to the rachis into undivided or forked divisions, which are quite narrow, about equalling the rachis itself in breadth. These lateral segments bear a few half-cup-shaped or short boat-shaped indusia, in which the spore cases are developed. From its distinct and evergreen habit, and its graceful finely-cut fronds, this Fern will be found a decided acquisition. It has been awarded two First-class Certificates. 1 guinea.

DAVALLIA FIJIENSIS.

A charmingly elegant evergreen Fern, free in growth, firm and durable in texture, and bright green in colour, introduced from the Fiji Islands. The fronds grow two or three feet in height, and have a deltoid outline, the points of the fronds and of the pinnae being gracefully deflexed; they are compoundly divided, the whole frond being split up into lanceolate pinnules and pinulets, and finally cut into narrow linear bifid divisions. This was one of the New Plants with which Mr. W. B. gained the First Prize at the International Horticultural Exhibition, held at Ghent, and at the Great Show of the Royal Horticultural Society, held at Kensington in 1880. 5s.

DAVALLIA FIJIENSIS PLUMOSA.

This is certainly one of the most charming forms of a remarkably ornamental species. It has creeping rhizomes, from which spring up at intervals the gracefully-drooping, feathery plumose fronds growing on stalks a foot or more in length. It will be a grand subject for all decorative purposes, especially useful for cutting, and a noble Fern for exhibition. In speaking of the best novelties, the *Gardeners' Chronicle* (Jan. 7th, 1882, page 10), remarks: "The *Davallia fijiensis plumosa* is, perhaps, one of the most elegant of all known Ferns." It has received a First Class Certificate from the Floral Committee of the Royal Horticultural Society. 7s. 6d.

DAVALLIA BULLATA, 2s. 6d.

CILEROPHYLLA, 3s. 6d.

HEMIPTERA, 5s.

LORRAINII, 10s. 6d. and 15s.

CYATHEA DEALBATA.

The Silver Fern of New Zealand, 3s. 6d., 5s. and 7s. 6d. For large plants, *vide* page 120.

CYATHEA DREGEI.

A very fine South African greenhouse Fern, with bipinnate fronds of stoutish texture, and having the pinnules lanceolate, with oblong-ovate falcate segments, bluntnish at the point, and the sori in the lower half immersed in rufous wool. 5s. and 7s. 6d. For large plants, *vide* page 120.

CYATHEA SPINULOSA.

A fine Tree Fern, found throughout India and in Japan. The stipes are dark brown, strongly aculeated, the rachis being muricated. The fronds are large, glabrous, and bipinnate, the lobes of the pinnules oblong acute and serrulate. An ornamental and desirable species. 10s. 6d.

CYATHEA MENULARIS, 3s. 6d. and 5s.
(CIBOTIUM) PRINCEPS, 3s. 6d. and 5s.

DIDYMOCHLENA TRUNCATULA, 3s. 6d.
DORYOPTERIS PALMATA, *vide* page 122.

DOODIA ASPERA MULTIFIDA.

A handsome crested Fern, of neat dwarf evergreen habit, with prettily arched fronds rendered drooping by the dense tassel at the apex; the young fronds are prettily tinted with pink. This was one of the twelve New Plants with which Mr. W. B. gained the First Prize at the Provincial Show of the Royal Horticultural Society, held at Preston. 5s.

TODEA (LEPTOPTERIS) HYMENOPHYLLOIDES.

This pretty New Zealand Filmy Fern, commonly called *Todea pellucida*, can be supplied in nice plants at 3s. 6d. and 5s.

ALSOPHILA REBECCE.

An elegant Tree Fern introduced from Queensland. The stem is very slender; the fronds are elliptic, bipinnate, the larger pinnae bearing on each side numerous pinnules, which are stalked, linear acuminate, with an unequal subcordate base and an inciso-crenate margin. The texture of the frond is firm, the surface glabrous; the rachis clothed on the upper surface with black fibrillose scales. It is very distinct from all other Australian Tree Ferns, and a very elegant addition to the group. Handsome specimens, 2 and 3 guineas; young plants, 5s. and 7s. 6d.

TODEA (LEPTOPTERIS) SUPERBA.

Any attempt at description must fall far short of conveying an adequate notion of the exquisite beauty of this lovely Fern, which is unquestionably one of the most handsome yet known. It should be seen to be justly appreciated. The fronds which are fifteen to eighteen inches in length, are of a bright green, of transparent texture and of a lanceolate outline, spreading, beautifully arching and feathered down to the very base; the pinnae are crowded and cut into narrow segments, which, instead of lying flat, as in *Todea hymenophylloides*, are turned upwards, giving the fronds a frilled surface, and producing an effect distinct from that of any Fern in cultivation. This is probably the most beautiful of all the dwarf-growing New Zealand Ferns. 3s. 6d. and 5s. Fine strong plants, 10s. 6d., 15s. and 1 guinea.

TRICHOMANES RADICANS.

(THE KILLARNEY OR IRISH BRISTLE FERN).

This is a British species, but it must, as far as culture is concerned, be included among the greenhouse kinds, as it is almost impossible to succeed with it if treated as an ordinary hardy Fern. 7s. 6d. and 10s. 6d.

WOODWARDIA ORIENTALIS, 2s. 6d. and 3s. 6d.

NEW HARDY FERNS.

LASTREA PROLIFICA.

A most interesting hardy evergreen Fern, introduced from Japan, and described by Mr. T. Moore, in the *Gardeners' Chronicle*, December 9th, 1882, where a letter of Mr. Lafosse is quoted in which the plant is highly eulogised for its beauty. It has triangular, bipinnate, coriaceous, shining green fronds, with the pinnules narrow, often pointed, usually with a lobe or two at the base, but in different plants and parts of the same plant extremely variable in their actual form and character. The sori are large and cover the narrow segments, and these sori are themselves covered by large persistent indusia, which are red in the centre and lead-coloured at the margin. 2s. 6d., 3s. 6d., & 5s.

POLYSTICHUM POLYBLEPHARUM.

A fine hardy evergreen Fern from Japan. The fronds are of moderate size, ovate-lanceolate, bipinnate, with the lower pinnae deflexed, the pinnules marginate, trapezio-ovate or oblong, with a few coarse deep teeth. The lower anterior pinnules are considerably larger than the rest, narrow oblong, and deeply inciso-lobate. The sori are numerous, and covered with thick rufescent indusia. 2s. 6d., 3s. 6d. & 5s.

CHOICE HARDY FERNS.

Selections of good kinds can be supplied at 18s., 30s. and 42s. per dozen.

SELAGINELLA VICTORIZÆ. For description and price, *vide* page 128.

SELAGINELLAS (LYCOPODIUMS.)

G, greenhouse; *H*, hardy; *S*, stove.

Selection of good kinds can be supplied at 18s. per dozen.

SELAGINELLA AMÆNA.

A beautiful Club-Moss, belonging to the caulescent group. It grows about a foot high, the erect stem being furnished with small scattered leaves; the upper portion is triangular and pinnately branched, the branches themselves, which are set on horizontally, being bipinnate, and the whole plant of a bright and cheerful green. The upper part of the stem and the branches have spreading distant acuminate leaves, with smaller intermediaries. It has been introduced from Mexico. 5s. and 7s. 6d.

SELAGINELLA INVOLVENS VARIEGATA.

SELAGINELLA INVOLVENS VARIEGATA.

A dwarf dense-growing variegated form of greenhouse Club-Moss, introduced from Japan ; some of the branchlets are creamy white, and these, being mixed in freely with the green branchlets, produce an elegant variegation. The plant forms a pretty dwarf tuft, consisting of an overlapping series of branches, surrounding the central axis. A well-grown specimen is a very pleasing object amongst the dwarf forms of the Club-Moss family. This was one of the twelve New Plants with which Mr. W. B. gained the First Prize at the Royal Horticultural Society's Exhibitions, in 1880, 1881, and 1882. 7s. 6d. and 10s. 6d.

SELAGINELLA CANALICULATA.

A remarkable handsome species of Club-Moss, introduced from the Islands of the South Pacific. It is of scandent habit, the tetragonal sulcate stems, rooting freely from the base, tinted with pale brownish red, and furnished with scattered appressed ovate-oblong unequal-sided leaves; the branches are tripinnate; the larger leaves are distant semi-ovate, while the leaves of the alternate divisions are close set, ovate-oblong acute, with the smaller intermediate ones acuminate. 3s. 6d. & 5s.

SELAGINELLA CAULESCENS GRACILIS.

A remarkably neat and pretty Indian Club-Moss. It has creeping rhizomes from which the erect arching stems spring up; these are distinctly branched, the branches ovate with about six or seven divisions, each of which is three or four times parted. Its bright green colour and elegant dwarf growth combine to give a most pleasing character. 5s.

SELAGINELLA COGNATA.

A very fine species, of sub-climbing habit, named provisionally as above. It has stoutish erect rooting stems, which are furnished with obliquely-ovate spreading leaves, set on at about half an inch apart. The branches are ovate, eight to ten inches long, alternately pinnate, the primary branchlets ovate, about three inches long, with six or eight alternating secondary branchlets. The leaves become gradually smaller on the successive series of branchlets, the small intermediate ones converging with the point upcurved, which gives the surface a somewhat bristly appearance. It has been introduced from the Isles of the South Pacific Ocean. 5s. and 7s. 6d.

SELAGINELLA VICTORIÆ.

An elegant sub-scandent species, introduced from the South Sea Islands. It has erect stems, which produce alternate lateral branches of an ovate outline, flat and closely pinnate, like the frond of a Fern. The colour is a dark green, the spikelets and young growth being of a paler hue. It is allied to *S. Wallichii*, but is a still more elegant plant, and differs essentially in having a long terminal pinnulet to each branch, instead of diminishing gradually to the end. For Illustration, *vide* page 126. 2s. 6d. and 3s. 6d.

PALMS, CYCLANTHS AND CYCADS,

Including **ENCEPHALARTOS, MACROZAMIA, &c.**

The Palms constitute the most noble family in the vegetable kingdom, and afford sufficient diversity of aspect to allow of selections being made from them for the greenhouse, stove, or conservatory, to either of which Palms impart a richer tropical character than any other plants. Some of the miniature dwarf-growing kinds are, from their light and graceful forms, admirably adapted for table decoration, for vases, and for almost every purpose in which ornamentation is desired. The more hardy and larger kinds can be used for sub-tropical gardening, to which they impart a most luxuriant grandeur, evidence of which has been given in Battersea Park, and in other places where Palms have been thus used.

Selections of Stove Palms, 6, 9 and 12 guineas per dozen.

Selections for the Greenhouse, at 6, 9 and 12 guineas per dozen.

Larger specimens, from 2, 3, 4 and 5 to 10 guineas each.

*Those marked with an asterisk * are kinds that will succeed in a greenhouse.*

- ACANTHOPHENIX CRINITA** (ARECA CRINITA) 10s. 6d., 15s. & 1 guinea
ACANTHORRHIZA ACULEATA (CHAMEROPS STAURACANTHA) 15s. and 1 guinea
 * **ARCHONTOPHENIX ALEXANDRÆ** (PTYCHOSPERMA ALEXANDRÆ) 2s. 6d., 3s. 6d. & 5s.
 * **CUNNINGHAMIANA** (SEAFORTHIA ELEGANS, PTYCHOSPERMA CUNNINGHAMIANA) a most useful conservatory or cool greenhouse plant, possessing a highly decorative character; scarcely anything can equal the effect of a large plant of this noble Palm.
 In all sizes 2s. 6d., 3s. 6d., 5s. and 7s. 6d. to 1, 1½, & 2 guineas
ARECA ALICÆ, this name has been given by Dr. Mueller to a North-east Australian Palm, found in Trinity Bay by Mr. Walter Hill, and commemorates the late Grand Duchess of Hesse—Princess Alice. The leaves are pinnatisect, the pinnule-like segments sessile. Its comparatively dwarf habit will render this pinnate Palm, a valuable one for decorative purposes 1 guinea.

WIGHTII 1 guinea.
ASTROCARYUM GRANATENSE 10s. 6d.
MALYBO (A. ARGENTEUM) 1, 1½ and 2 guineas.
BACULARIA MONOSTACHYA, "Walking Stick Palm," (ARECA MONOSTACHYA,
 LINOSPADIX MONOSTACHYA) 2s. 6d., 3s. 6d. & 5s.
BENTINCKIA CONDAPANNA (ARECA DICKSONI) 7s. 6d., 10s. 6d. and 15s.
BISMARCKIA NOBILIS 3 and 4 guineas.
BOWENIA SPECTABILIS SERRULATA, a distinct and remarkable Australian Plant, Bowonia being the only-known Cycad with bipinnate fronds. It has a short thick caudex, from the crowns of which are developed its large and handsome leaves, which differ materially from the typical and only other known Bowenia in having the margins distinctly toothed or serrated. This was one of the twelve New Plants with which Mr. W. B. gained the First Prize at the International Horticultural Exhibition at Carlisle, and the First Prize at the International Horticultural Exhibition at Ghent 5s. and 7s. 6d.
CALAMUS CILIARIS 1, 1½ and 2 guineas.
 (DÆMONOROPS) FISSUS 10s. 6d., 15s. & 21s.
 (—) MELANOCHLATES 10s. 6d., 15s. & 21s.
MICRANTHUS 7s. 6d. and 10s. 6d.
 (DÆMONOROPS) PALEMBANICUS, one of the most elegant of Palms, exceedingly appropriate for table decoration and other ornamental purposes. The leaves are broadly ovate, pinnate, consisting of many narrow elongated segments, and are supported by leaf-stalks bearing numerous deflexed spines, which are thickened at the base. The young leaves are of a bright cinnamon-brown, and the contrast between this warm colour and the deep green of the matured leaves renders the plants exceedingly beautiful at the time they are in course of development. It is a native of Java. 10s. 6d., 15s. and 21s.
 (—) PERIACANTHUS 10s. 6d., 15s. and 21s.
 (—) PLUMOSUS 10s. 6d., 15s. and 21s.
SIKKIMENSIS, an elegant Palm, introduced from Sikkim. The leaves are ovate in outline, pinnate, with many narrow lanceolate segments, supported by spiny leaf-stalks. The young leaves are of a pleasing cinnamon-brown colour, contrasting in a very marked manner with the deep green of the mature leaves. This handsome Palm will be exceedingly valuable for all decorative purposes 1½ guinea.
TRINERVIS, a thoroughly distinct-looking stove Palm from the East Indies. Its leaf-stalks are thorny and clothed with brown scale-like tomentum, the petiolar sheath being continued up the stem, and ending in a fringe of pointed brown scales. The leaves are pinnate, with alternate leaflets, which are sessile, lanceolate, with an acuminate apex, and having three prominent nerves, hairy on the upper surface 3 guineas.
CALYPTROGYNE SARAEUENSIS (GEONOMA SARAEUENSIS) 15s. and 1 guinea.
SWARTZII "Mountain Hatch Palm" (CALYPTRONOMA SWARTZII) 7s. 6d., 10s. 6d. to 21s.
TERES, a useful and ornamental stove Palm, imported from British Guiana. It has smooth terete green petioles, and spreading or drooping leaves, which in the young plants consist of two pairs of linear-oblong tapered leaflets about two inches wide, bright green, and having the principal ribs raised on both surfaces 1 and 1½ guinea.
CALYPTRONOMA SWARTZII, *vide* CALYPTROGYNE SWARTZII
CARLUDOVICA DRUDEI, a noble and decorative stove Cyclanth, introduced from the United States of Colombia. In habit it somewhat resembles a Fan Palm, with handsome and effective deep green lustrous leaves. The flowers are borne on a stalked erect spadix of cylindrical form and of ivory-white colour, and resemble a bottle brush by reason of the long stamens which project horizontally from the female flowers 10s. 6d. and 15s.
PALMATA 10s. 6d. and 15s.
PLUMIERI, a remarkably interesting plant. It has an erect waving caudex, with alternate leaves. The leaf blades are bipartite, the divisions lanceolate, plicate, with the ribs raised on the upper surface, bright green above, paler beneath. The pendulous spadices are four inches long, axillary, pedunculate, and covered with twisted threads 10s. 6d.
WALLISII, a Palm-like stove plant. It has erect semi-terete petioles, which support the spreading ovate blade of the leaf, which is two-lobed and plicate. Each division of the leaf is about a foot long and six or eight inches broad. Flowers white, remarkably sweet-scented. Introduced from the United States of Colombia 7s. 6d. and 10s. 6d.

CARYOTA URENS "Wine Palm" 7s. 6d. and 10s. 6d.

CATAKIDOZAMIA HOPPEI 7s. 6d. and 10s. 6d.

DENISONI, *vide* LEPIDODZAMIA

CERATOZAMIA FUSCO-VIRIDIS, a noble species, introduced from Mexico, and belonging to the Cycads. The leaves are broadly pinnate, and of arching habit, the pinnae deep green, sessile, lanceolate, and tapering to a longish point. The young leaves are of a rich bronzy-chocolate colour, gradually changing to olive-green, and ultimately developing into deep green 3 and 4 guineas.

CEROXYLON NIVEUM, *vide* DIPLOTHEMIUM CAUDESCENS

CHAMEDOREA ELEOANTISSIMA 7s. 6d. and 10s. 6d.

FORMOSA 7s. 6d. and 10s. 6d.

CHAMEDOREA GRAMINIFOLIA .. 10s. 6d. and 15s.

* **POLITA**, a neat-habited greenhouse Palm. The stems are quite smooth, as also are the petioles, which are terete, the leaves being bifid, or when a stage more advanced breaking up into two pairs of green pinnae, with the terminal leaflet larger than the others. It has been imported from Mexico. 10s. 6d.

* **CHAMÆROPS** EXCELSA, *vide* TRACHYCARPUS EXCELSUS

* **FORTUNEL**, *vide* TRACHYCARPUS FORTUNII

* **HUMILIS**, this useful decorative Palm can be supplied in all sizes, from 5s., 7s. 6d., 10s. 6d., 15s. and 1 guinea to 2, 3 and 4 guineas each.

* ——— **ORACILIS** 15s. and 1 guinea.

* ——— **ROBUSTA** 15s. and 1 guinea.

* ——— **TOMENTOSA** 15s. and 1 guinea.

STAUROCANTHIA, *vide* ACANTHOPHORBIA ACULEATA

CHRYSLIDOCARPUS LUTESCENS (*ARECA LUTESCENS*, *HYOPHORBE INDICA*, *H. COMMERSIONIANA*), in all sizes 1s. 6d., 2s. 6d., 3s. 6d., 5s. to 1 guinea.

* **COCOS** AUSTRALIS (*DIPLOTHEMIUM CAMPESTRE*), 5s. and 7s. 6d.

* **CHILENSIS**, *vide* JUBÆA SPECTABILIS

* **INSIGNIS** (*GLAZIOVA INSIGNIS*), 7s. 6d. and 10s. 6d.

* **PLUMOSA** 2s. 6d., 3s. 6d. and 5s.

* **COCOS** WEDDELLIANA (*GLAZIOVA ELEGANTISSIMA*, *LEOPOLDINA PULCHRA*), perhaps the most elegant of all the smaller Palms, of which so many charming species are now to be found in cultivation. Its slender erect stem is not of rapid growth, but is freely furnished with its gracefully arching leaves, made up of innumerable long narrow pinnae or segments, of a rich green colour. In all sizes 1s. 6d., 2s. 6d., 3s. 6d., 5s. to 1 guinea.

* **CORYPHA** AUSTRALIS, *vide* LIVISTONA AUSTRALIS

CYCAS ALMSTRONHII 1½ and 2 guineas.

CIRCINALIS 1½ and 2 guineas.

MERIA, a noble form of Cycad introduced from intertropical New Holland. The trunk is both stout and tall, cylindrical, and tolerably even in outline, the surface closely dotted by the scar-like marks which indicate the places whence leaf-stalks have been removed. This stem produces a grand head of leaves, which are of a large size, and somewhat variable in form and character in different specimens. Trunks in various sizes. Prices on application.

NORMANBYANA 10s. 6d. and 15s.

PLUMA

REVOLUTA, in all sizes, 7s. 6d., 10s. 6d., 15s. and 1 guinea; fine specimens, 3, 4 and 5 guineas each.

RUMPHII

SIAMENSIS

CYCLANTHUS DISCOLOR 1 guinea.

CYPHOKENTIA GRACILIS, *vide* KENTIOPSIS OLIVIFORMIS

MACROCARPA, *vide* KENTIOPSIS MACROCARPA

ROBUSTA, *vide* CYPHOSPERMA VIEILLARDI

DICTYOSPERMA AUREUM (*ARECA AUREA*) a fine and graceful Palm, with yellowish stems 10s. 6d. and 15s.

RUBRUM (*ARECA RUBRA*) 3s. 6d., 5s. and 7s. 6d.

DIOON RHULE

DIPLOTHEMIUM CAMPESTRE, *vide* COCOS AUSTRALIS

CAUDESCENS (*CEROXYLON NIVEUM*) 5s. and 7s. 6d.

DRYMOPLÆUS SINGAPORENSIS (*PTYCHOSPERMA SINGAPORENSIS*). Truly a "most elegant" Palm. It has slender stems, and rich green leaves on smooth green petioles. The leaves are elegantly drooping in habit and ovate in form, consisting of numerous narrow leaflets, tapering to a long slender point. It has been introduced from Singapore.

- * **ENCEPHALARTOS ALTENSTEINII**
 * (ZAMIA) BRACHYPHYLLUS
 * CAFFRA
 * (ZAMIA) CYCADIFOLIUS
 * FRIDERICI-GUILLELMI, this is a very distinct-looking South African species; the leaves are

oblong-obtuse, arching and conduplicate; the petiole and rachis are terete and somewhat flattened on the upper surface, destitute of spines but covered with woolly down, the segments closely crowded, nearly opposite, linear-oblong, and of glaucous hue. At first sight this distinct Cycad would give the impression of being an intermediate species between *Dioon edule* and *Cycas revoluta*

- * **ENCEPHALARTOS GHELINCKII (GRACILIS)**
 * HILDEBRANDII, this fine Cycadaceous plant has been introduced from Eastern Africa.

* **HEDYSCEPE CANTERBURYANA "Umbrella Palm"** (KENTIA CANTERBURYANA) 3s. 6d., 5s. and 7s. 6d.

HETEROSPATHE ELATA (METROXYLON ELATUM), a very elegant smooth-stemmed Palm from Java, remarkable for the length of the tapered segments of its pinnate fronds. The leaflets are half an inch broad, with somewhat wider intervals between them, bright green on both the surfaces, narrowing upwards into a long slender tapering point. The plant has a naturally graceful spreading habit, and ranks among the most ornamental of the pinnate-leaved series 10s. 6d., 15s. & 1 guinea.

* **HOWEA BELMOREANA**, "Curley Palm," (KENTIA BELMOREANA, GRISEBACHIA BELMOREANA), in all sizes 2s. 6d., 3s. 6d., 5s. to 1 guinea.

* **FORSTERIANA**, "Flat or Thatch-Leaf Palm," (KENTIA FORSTERIANA, GRISEBACHIA FORSTERIANA) 2s. 6d., 3s. 6d. & 5s.

HYDRIASTELE WENDLANDIANA (KENTIA WENDLANDIANA), a noble Palm, belonging to the pinnate-leaved series, introduced from Queensland. The leaves have numerous unequal segments, usually toothed at the apex. This was one of the twelve New Plants with which Mr. W. B. gained the First Prize at the International Horticultural Exhibition at Ghent.

- LEOPOLDINA PULCHRA**, *vide* COCOS WEDDELLIANA
- LEPIDOZAMIA PEROFFSEYANA** (MACROZAMIA DENISONI)
- LIGUALA GRANDIS** (PRITCHARDIA GRANDIS). As a new introduction, scarcely any plant has made a greater sensation than this remarkable Palm. When exhibited by Mr. W. B. at the International Horticultural Exhibition, held at Brussels, it won the First Prize for a new Palm not in commerce. At the same time another specimen was also shown in the six New Plants with which Mr. W. B. gained the First Prize. Again at the International Horticultural Exhibition, held at Ghent, it was one of the twelve New Plants with which Mr. W. B. won the First Prize. It was discovered in the South Sea Islands by one of Mr. W. B.'s Plant Collectors, and takes rank amongst the most distinct and attractive Palms ever introduced 4 and 5 guineas.
- PELTATA** 6s. and 7s. 6d.

- MACROZAMIA CORALLIPES**
- CYLINDRICA**, a distinct and well-marked Cycad, introduced from Queensland. It has a long-necked stem, and dark green coriaceous leaves; the pinnae are glossy on the surface, each being marked at the base with a large ivory white patch, which strongly contrasts with the dark green mid-rib which lies between the two rows of ivory markings.
- DENISONI**, *vide* LEPIDOZAMIA PEROFFSEYANA
- FRASERI**
- MACKENZII**, a handsome and ornamental Cycad from Queensland. The leaves are ovate in outline, with numerous pairs of narrow tapering segments of a dark green colour, and nine to ten inches in length. The rachis is strongly convex behind, slightly so in front, with the segments of the central portion set on at about half an inch apart, the upper ones being more closely, the lower ones more distantly placed. For Illustration, *vide* page 134 3, 4 and 5 guineas
- PLUMOSA**, this beautiful Cycadaceous plant has been imported from Queensland. From a small ovate stem, the scales of which are woolly, rise the erect spirally-twisted leaves, which have a flattened petiole. These leaves are furnished nearly to the base with narrow linear leaflets, which are set on at intervals of about a quarter of an inch, and are from six to eight inches long. The plant is remarkable for its distinct and elegant character. It has been awarded a First Class Certificate by the Royal Horticultural Society. 2, 3, and 4 guineas
- SPIRALIS**
- MARTINEZIA EROSA** 2 and 3 guineas
- GRANATENSIS** 10s. 6d. and 15s.
- MAXIMILIANA REGIA** 7s. 6d. and 10s. 6d.
- METROXYLON ELATUM**, *vide* HETEROSPATHE BLATA
- MOLINIA OHILENSIS**, *vide* JUBEA SPECTABILIS
- GENOCARPUS BACABA** 31s. 6d.
- EDULIS** 31s. 6d. and 42s.
- ORANIA MACROCLADUS** 5s., 7s. 6d. and 10s. 6d.
- OREODOXA GRANATENSIS**, a very ornamental pinnate-leaved Palm, introduced by one of my collectors from the United States of Colombia. The stem is smooth, and the leaf pinnate, with long narrow leaflets, which are more or less drooping. It is a very elegant plant, and in the young state is admirably adapted for table decoration 1 guinea
- SANCONA**, *vide* BUTERPE EDULIS
- PHENICOPHORUM SECHELLARUM**, *vide* STEVENSONIA GRANDIFOLIA

***PHENIX COMPACTA**, a dwarf-growing hybrid, the result of a cross between *P. equinoctialis* and *P. leonensis*; its dense compact habit of growth will render it extremely useful for decorative purposes 5s., 7s. 6d. and 10s. 6d.

* **DACTYLIFERA** (THE DATE PALM)

10s. 6d., 15s. & 1 guinea

* **HYBRIDA**, this elegant Palm is a hybrid between *P. dactylifera* and *P. farinifera*. It has a short stout stem, somewhat similar to *P. dactylifera*, but with the more slender and less rigid fronds of *P. farinifera*. The fruits are not much larger than the last named, and are of a glaucous red colour when mature 15s.

* **INTERMEDIA**, an interesting hybrid between *P. sylvestris* and *P. equinoctialis*. It is of dwarf compact habit, and will be found a useful and effective Palm for the decoration of the greenhouse and conservatory

5s., 7s. 6d., and 10s. 6d.

* **RECLINATA** 3s. 6d., 5s., 7s. 6d. & 10s. 6d.

***PHENIX RUPICOLA**, this is one of the most exquisitely graceful among the smaller Palms, and in elegance takes a similar place among Phoenixes to that of *Cocos Weddelliana* among Coesces. It is of acaulescent habit, with wide-spreading arching pinnate leaves, broadly lance-shaped in out line, with long narrow pinnae, the lower of which become gradually reduced to spines. It comes from India, and is a most valuable acquisition ... 2s. 6d. and 3s. 6d.; fine plants, 21s., 31s. 6d. and 42s.

* **SYLVESTRIS**, a Sugar-yielding Palm 1s. 6d., 2s. 6d., 3s. 6d. & 5s.

PHYTELEPHAS MACROCARPA, this Palm yields the Vegetable Ivory of commerce.

PINANGA MACULATA 7s. 6d., 10s. 6d. to 1 guinea

SANDERIANA 1 guinea

SPECTABILIS, vide page 9.

PRITCHARDIA AUREA 1½, 2 and 3 guineas

GRANDIS, vide *LICUALA GRANDIS*

PACIFICA 1 and 1½ guinea

***PTYCHOSPERMA ALEXANDRE**, vide *ARCHONTOPHENIX ALEXANDRE*

COCINEA, vide *CYRTOSTACHYS RENDA*

* **CUNNINGHAMIANA**, vide *ARCHONTOPHENIX CUNNINGHAMIANA*

LÆVIGATA 10s. 6d., 15s. & 1 guinea

MACARTHURII (*KENTIA MACARTHURII*) 3s. 6d., 5s. and 7s. 6d.

RUPICOLA, vide *LOXOCOCCUS RUPICOLA*

SINGAPORENSIS, vide *DRYMOPHILEUS SINGAPORENSIS*

REGELIA PRINCEPS, vide *VERSCHAFFELTIA SPLENDIDA*

***RHOPALOSTYLIS BAUERI** (*ARECA BAUERI*, *SEAFORTHIA ROBUSTA*) 5s., 7s. 6d. and 10s. 6d.

SAPIDA, "NIKAU PALM" (*ARECA SAPIDA*, *KENTIA SAPIDA*) 3s. 6d., 5s. and 7s. 6d.

***RHAPIS FLABELLIFORMIS** 7s. 6d., 10s. 6d. to 1 guinea

ROSCHERIA MELANOCHLETES (*VERSCHAFFELTIA MELANOCHLETES*)

SABAL ADANSONI "DWARF PALMETTO" 3s. 6d. and 5s.

CÆRULESCENS, a remarkably bold and handsome Palm introduced from the United States of Colombia. The leaves are palmately divided, the segments broad, with a plicate surface, and having a bluish or glaucous tinge of green, which is very strongly marked on the under surface

7s. 6d. and 10s. 6d.

GRANATENSIS 3s. 6d. and 5s.

TENUIS 3s. 6d., 5s. and 7s. 6d.

UMBRACULIFERA (*BLACKBURNIANA*), noble and very distinct 3s. 6d. and 5s.

***SEAFORTHIA ELEGANS**, vide *ARCHONTOPHENIX CUNNINGHAMIANA*

* **ROBUSTA**, vide *RHOPALOSTYLIS BAUERI*

STANGERIA PARADOXA small plants, 7s. 6d.; strong specimens, 1½, 2 and 3 guineas

STEVENSONIA GRANDIFOLIA (*PHENICOPHORUM SECHELLAEUM*) 1, 1½, 2 to 5 guineas

THRINAX ARGENTEA, "SILVER THATCH PALM" 5s. and 7s. 6d.

THRINAX BARBADENSIS, a very elegant neat-growing Fan Palm. The petiole terminates in a digitately multipartite blade, the numerous segments of which are of a lively green colour. It is, as its name implies, a native of the Island of Barbadoes. This was one of the twelve New Plants with which Mr. W. B. gained the First Prize at the Great Show of the Royal Horticultural Society, at Kensington

1½ and 2 guineas.

ELEGANS, very handsome for exhibition purposes 5s., 7s. 6d. and 10s. 6d.

ELEGANTISSIMA, an exceedingly elegant and graceful Palm 15s. and 1 guinea.

* **PARVIFLORA** 3s. 6d., 5s. and 7s. 6d.

TRACHYCARPUS EXCELSUS (*CHAMEROPS EXCELSA*), in all sizes, from 3s. 6d., 5s., 7s. 6d., 10s. 6d. and 15s. to 2, 3, 4 and 5 guineas each

MACROZAMIA MACKENZII. For description and price, *vide* page 132.

TRACHYCARPUS FORTUNEI (*CHAMEROPS FORTUNEI*), in all sizes, from 3s. 6d., 5s., 7s. 6d. 10s. 6d., and 15s. to 2, 3, 4 and 5 guineas each

VERSCHAFFELTIA MELANOCHLETES, *vide* *ROSCHERIA MELANOCHLETES*
SPLENDIDA (*REGELIA PRINCEPS*), a magnificent and very distinct Palm
 from the Island of Seychelles

ZALACCA NITIDA, *vide* page 9.

* **ZAMIA BRACHYPHYLLUS**, *vide* *ENCEPHALARTOS BRACHYPHYLLUS*

* **BREVIFRONS** 1½ and 2 guineas

* **CYCADÆFOLIA**, *vide* *ENCEPHALARTOS CYCADÆFOLIUS*

* **FURFURACEA** 2 and 3 guineas

* **INTEGRIFOLIA** 2 and 3 guineas

* **LEHMANNI**, *vide* *ENCEPHALARTOS LEHMANNI*

LINDENI

***ZAMIA MIQUELII**, this species has been imported from Queensland. It has a short stout stem, spindle-shaped below, and producing from the crown remarkably elegant fronds, which are erect and somewhat spirally twisted, the smooth bright green pinnae being of an ivory white colour at their point of juncture with the rachis. It is known in some collections as *Z. Fraseri* and *Z. tenuifolia*..... 5s. and 7s. 6d.

NEW AND CHOICE CALADIUMS.

Mr. WILLIAM BULL'S Selection of Twelve Varieties, 24s., 30s. and 42s.

New and Choice Varieties 5s., 7s. 6d., 10s. 6d., 15s. and 21s. each.

ADOLPHE ADAMS, green, densely speckled with white; rose-coloured mid-ribs. 2s. 6d. and 3s. 6d.

ADOLPHE ANDRIEN, a very attractive variety with large richly coloured foliage. 3s. 6d.

AGRIPPINE DIMITRY, white ground, green margin and veins, pink centre. 5s.

AIDA, transparent ruddy rose tissue with a network of green ribs. 10s. 6d.

ALBO-LUTEUM, yellowish white with green tint, very long leaves. 7s. 6d.

ALCIBIADE, crimson-rayed centre, surrounded with pale green and blotched with pure white; green margin. 5s.

ALFRED BLEU, green, with white spots and flesh-coloured centre. 2s. 6d. and 3s. 6d.

ALFRED MAME, carmine-red, bordered with white and spotted with rose. 7s. 6d.

ALPHAND, green, spotted with red; crimson centre. 2s. 6d. and 3s. 6d.

ALPHONSE KARR, carmine centre and red spots. 2s. 6d.

ALZIRE, 15s.

AMENUM, transparent rose, with red ribs, violet-rose veins and green margin. 10s. 6d.

ANNA DE CONDEIXA, rose centre, with clear green margin, and white, yellow and dark green zone. 7s. 6d.

- ANNIBAL**, 3s. 6d.
ARETHUSE, 5s.
ARGYRITES, pale green with white spots. 1s. 6d. & 2s. 6d.
ARISTIDE, light green; crimson centre. 3s. 6d. and 5s.
ARSINOË, 3s. 6d. and 5s.
ARTÉMISE, silvery white with rosy-crimson ribs. 3s. 6d.
AUBER, green ground, marked with white spots and central pink ones. 2s. 6d. and 3s. 6d.
AUGUSTE CARPENTIER, carmine-red centre, surrounded with reddish-maroon and margined with golden green; very effective. 10s. 6d.
AUGUSTE LEMOINIER, soft green centre and rosy-crimson rib and veins. 3s. 6d.
AUGUSTE REVIÈRE, white centre and rays, and crimson spots. 2s. 6d. and 3s. 6d.
AURORE BORÉALE, dark red, spotted with bronzy-green, reddish carmine ribs. 10s. 6d.
BARAQUINII, crimson centre, dark green margin. 2s. 6d. and 3s. 6d.
BARAQUINII SUPERBUM, 5s.
BARILLET, green, bright rosy crimson centre and ribs. 3s. 6d. and 5s.
BARONNE JAMES DE ROTH-SCHILD, young leaves of a bright rose colour; the more matured foliage soft rose, with red veins. 10s. 6d.
BARRAL, bright green, with a fine red centre, and large spots of rose. 3s. 6d. & 5s.
BEETHOVEN, ground colour white, intersected and veined with green, centre rib delicate rose. 2s. 6d. and 3s. 6d.
BELLEYMEI, white variegated leaves. 2s. 6d. and 3s. 6d.
BELLINI, mottled pale green ground, with rosy centre and spots. 2s. 6d. and 3s. 6d.
BELLONE, centre carmine-rose, shading off to reddish maroon and metallic brown. 10s. 6d.
BEROSE, 5s.
BICOLOR, 1s. 6d.
BICOLOR FULGENS, 3s. 6d.
BICOLOR SPLENDENS, 2s. 6d. and 3s. 6d.
BOIELDIEU, like *Bicolor splendens*, but superior. 3s. 6d.
BOSPHORE, 15s.
BRONGNIARTII, 2s. 6d. & 3s. 6d.
BUREL, dark bluish green veined bright rose, marked with rosy violet and spotted orange-red. 3s. 6d.
CALYPSO, dark green margin, bright crimson centre and veins and pink spots. 3s. 6d. & 5s.
CANDIDUM, white ground with strongly marked ribs. 7s. 6d.
CANNERTII, leaves flushed with salmon-red, and spotted white. 2s. 6d. and 3s. 6d.
CARDINALE, brilliant red, dotted with golden yellow and greenish yellow. 10s. 6d.
CERES, rich green with rosy salmon centre. 5s.
CHANTINII, reddish ground, spotted with white. 2s. 6d.
CHANTINII FULGENS, rich metallic green, with crimson centre and white spots. 5s.
CHARLEMAGNE, large rosy-red leaves, nerves dark red. 21s.
CHARLES VERDIER, fine green, with blush-pink centre and spots. 2s. 6d. & 3s. 6d.
CHELSONI, bright glossy green, suffused with brilliant red, and blotched with crimson. 2s. 6d. and 3s. 6d.
CLIO, ground colour deep rose shaded white; green ribs, and narrow green margin. 7s. 6d.
COMTESSE DE CONDEIXA, white ground shaded rose; carmine red veins; narrow green margin. 7s. 6d.
COMTESSE DE MAILLE, white ground, veined with bright rosy red and green. 7s. 6d.
COMTESSE DU BERTHIER, 5s.
COYPEL, 7s. 6d.
CYPRIS, 3s. 6d.
DE CANDOLLE, rich green, rose-coloured spots and creamy white centre rays. 3s. 6d.
DE HUMBOLDT, glossy green, spotted with scarlet. 3s. 6d.
DELICATISSIMUM, 21s.
DEVINCK, leaves heart-shaped; delicate pink centre ribs, with white spots. 3s. 6d.
DONIZETTI, rich red centre, green border, rose spots. 3s. 6d.
DR. BOISDUVAL, centre rayed crimson; snow-white blotches on a green ground. 3s. 6d.
DR. LINDLEY, crimson centre, the green ground marked with rose blotches. 3s. 6d.
DUC DE CLEVELAND, red centre, surrounded with pea-green; red spots. 3s. 6d.
DUC DE MORNY, deep green leaf borders with large crimson-rayed centre. 3s. 6d.
DUC DE NASSAU, brilliant red centre and ribs, white spots. 2s. 6d. and 3s. 6d.
DUC DE RATIBOR, green with red mid-ribs and white spots. 2s. 6d. and 3s. 6d.
DUCHARTRE, leaf ground white, flushed rose, green veins and red spots. 3s. 6d.
EDOUARD ANDRÉ, crimson centre, rose blotches. 3s. 6d.
EDOUARD MOREAUX, mottled green ground, with lake centre. 3s. 6d. and 5s.
EDOUARD RODRIGUES, deep carmine, margined with light green, and spotted with rose. 3s. 6d. and 5s.
E. G. HENDERSON, green, with transparent rose spots and mottled crimson rays and centre. 3s. 6d.
ELSA, silvery rose, with red spots; fine. 7s. 6d.
ELVINA, bright green, blotched with red; grey centre and veins. 3s. 6d.
EMILIE VERDIER, leaves of a light transparent rose colour, spotted with red. 3s. 6d.
ETOILE D'ARGENT, green, mid-ribs and veins creamy white, shaded grey. 5s.
EUCHARIS, rose centre with violet reflections margined with bright green. 5s. & 7s. 6d.
EUTERPE, 5s.
FAUST, 10s. 6d.
FELICIEN DAVID, carmine centre, surrounded white, and veined with red on green ground. 3s. 6d. and 5s.
FERDINAND DE LESSEPS, dark carmine-red ground with violet-rose ribs, and deep green spots. 7s. 6d.
FLORE, 5s.
GAZE DE PARIS, translucent leaves, green ribs. 7s. 6d.
GERARD DOW, pale yellow ground, carmine mid-rib, deep red veins, narrow green margin. 10s. 6d.
GOLDEN QUEEN, pale golden yellow. 5s.
GLUCK, 10s. 6d.
GRATIOSUM, 3s. 6d.
GRETRY, carmine centre, with white spots. 3s. 6d.
HELEVY, white mid-ribs and crimson blotches. 3s. 6d.
HEROLD, dark carmine veins, surrounded by light green, blotched pure white. 3s. 6d.
HOULETTII, green with white spots. 2s. 6d. and 3s. 6d.
IBIS ROSE, a magnificent variety, with beautiful rich rose-coloured foliage. 15s.
IMPERATRICE EUGENIE, light green with greyish pink centre, and rose-coloured veins. 2s. 6d. and 3s. 6d.
ISADORA LEROY, rich metallic green, with crimson-red centre rays. 3s. 6d.
ISIS, bright rose, veins violet-carmine. 15s.
JOHN R. BOX, red and greenish maroon ground; carmine-red veins; violet-rose centre. 10s. 6d.

- JULES DUPLESSIS**, bright rose centre, shaded with red and bordered with green. 5s.
- JULES PUTZEYS**, rich green with crimson mid-rib and veins, and red spots; centre mottled grey. 3s. 6d. and 5s.
- JUNON**. 7s. 6d.
- JUPITER**. 5s.
- KETELEER**, spotted white, upon emerald-green; large crimson centre. 3s. 6d.
- LAINGII**, reddish carmine centre; the whole of the leaf sprinkled with white. 3s. 6d.
- L'ALBANE**. 5s.
- LAMARTINE**, crimson centre white and red spots. 3s. 6d.
- LA PERLE DU BRÉSIL**, white, delicately tinted with rose, mid-rib and veins dark green. 5s. and 7s. 6d.
- L'AUREOLE**, orange red, carmine veins, creamy white margin. 15s.
- L'AUTOMNE**, creamy white, with bluish maculations. 21s.
- LAVINIA**, bright green with grey centre and veins. 3s. 6d.
- LEOPOLDII**, green, with rich crimson-rayed centre. 3s. 6d.
- LEOPOLD ROBERT**, rosy white ground; carmine-red veins shaded with reddish-brown; green margin. 5s.
- LEPESCHKINEI**, leaves marked with rich rose spots; bright red centre. 3s. 6d.
- LEPLAY**, leaves marked with white, and beautifully veined with rosy violet. 3s. 6d.
- LE TITIEN**, ground network of red and rich green, pure magenta ribs. 10s. 6d.
- LOUISE DUPLESSIS**, red rays and veins on a white ground; green margin. 3s. 6d.
- LOWII**, *vide* ALOCASIA LOWII.
- LUCY**, pea-green; crimson centre; white spots. 3s. 6d.
- LUDEMANNI**, deep crimson ribs; the leaf blotched with magenta and white. 3s. 6d.
- LULLII**. 3s. 6d. and 5s.
- MADAME ALFRED BLEU**, deep green, with large white blotches, and broad crimson-scarlet veins. 3s. 6d. & 5s.
- MADAME ALFRED MAME**, light green, covered with large white spots; rosy carmine centre. 3s. 6d. & 5s.
- MADAME DE LA DEVAN-SAYE**, leaves white, shaded rose, and veined with red and green. 3s. 6d. and 5s.
- MADAME DOMBRAIN**, centre and ribs pale yellowish green, shaded rose, and spotted with white and rose. 3s. 6d.
- MADAME FRITZ KÖEHLIN**, white ground, violet-rose ribs, green veins. 3s. 6d.
- MADAME HEINE**, silvery white, stained and edged with pale green; distinct. 3s. 6d.
- MADAME HOULLET**, large leaves, with clustering bluish-white blotches. 3s. 6d.
- MADAME HUNNEBELLE**, leaves veined with garnet on white ground, and margined with green. 3s. 6d. & 5s.
- MADAME JULES MENO-REAU**, white centre, tinted rose, veined rich bright rose, margined green. 5s. & 7s. 6d.
- MADAME JULES PICOT**, translucent rosy violet leaf. 21s.
- MADAME LAFORGE**, centre and ribs reddish crimson, with green margin. 5s.
- MADAME LEMOINIER**, pale rose with darker ribs; veins and centre encircled with creamy white. 7s. 6d.
- MADAME MARJOLIN SCHEFFER**, white foliage, charmingly veined and netted with rosy lake. 5s.
- MADAME MITJANA**, transparent reddish-crimson rose centre. 10s. 6d.
- MADAME T. DE VIGIER**, rosy white, carmine nerves. 21s.
- MADAME WILLAUME**, delicate salmon-rose-coloured transparent leaves. 5s.
- MARCHANDII**. 5s.
- MARQUIS DE CAUX**, red centre and veins, with rose blotches on margins. 3s. 6d.
- MARS**, clouded crimson centre, the whole leaf spotted with crimson. 3s. 6d.
- MARTERSTYGINUM**, crimson centre and white spots. 2s. 6d. and 3s. 6d.
- MAXIME DUVAL**, fine broad crimson centre and ribs, green margin. 3s. 6d.
- MAX KOLB**, light green ground with pale centre; distinct. 2s. 6d. and 3s. 6d.
- MERCADANTE**, pale copper-coloured centre and veins, bordered with green. 3s. 6d.
- MEYERBEER**, white leaf ground, green veins and red mid-ribs. 2s. 6d. and 3s. 6d.
- MINERVE**, silvery white mid-rib and rays, surrounded with greyish white; green margin, with white spots. 5s.
- MITHRIDATE**, crimson-lake with darker ribs, and dark bronze-green margin. 7s. 6d.
- MONSIEUR A. HARDY**, rich reddish carmine veins on white ground, tinted with rose and spotted with green. 5s.
- MONSIEUR D'HALLOY**, delicate rose, bright rose centre, carmine and green veins. 10s. 6d.
- MONSIEUR J. LINDEN**, fine large whitish leaf, with metallic reflections, coral-rose veins and reticulated green border. 5s.
- MOZART**, rose centre and veins on green ground. 3s. 6d.
- MRS. LAING**, white ground; deep rose centre and veins; green margin. 5s. and 7s. 6d.
- NAPOLÉON III**, flamed crimson centre, with forked rays, and carmine-red spots. 3s. 6d.
- ONSLow**, deep rosy crimson centre with broad green margin, spotted with rose. 3s. 6d.
- ORNATUM**, golden yellow ground; carmine ribs encircled with rosy lake; red-violet veins. 7s. 6d.
- PAUL VERONESE**, pinkish white centre, deep scarlet ribs and green margin. 3s. 6d. & 5s.
- PETROPOLIS**. 5s.
- PETSCHKAU**. 5s.
- PHILIPPE HERBERT**, deep mottled crimson rays and clear green margin, spotted with crimson. 2s. 6d.
- PHILIPPE SCHULTZ**. 5s.
- PICTUM**, green, blotched and spotted with white. 3s. 6d.
- PRINCE ALBERT EDWARD**, dark emerald green, rich crimson radiating mid-rib, white spots. 2s. 6d. & 3s. 6d.
- PRINCE OF WALES**, large golden yellow leaves. 5s.
- PRINCESS ALEXANDRA**, rosy salmon leaf, green centre rib, bordered with magenta-crimson; green margin with light pink chain. 3s. 6d.
- PRINCESS OF TECK**, bright orange-yellow, veins suffused with deep red. 5s. and 7s. 6d.
- PRINCESS OF WALES**, golden yellow, spotted with crimson. 5s.
- PRINCESS ROYAL**, leaves of a golden ground colour, with crimson centre. 5s.
- PROSERPINE**. 3s. 6d.
- PYERHUS**, centre and ribs deep crimson, pea-green margin. 3s. 6d. and 5s.
- QUADRICOLOR**, centre of leaf pale yellowish green, ribs white, edged rosy crimson, and margined green. 3s. 6d.
- RAMEAU**, centre and ribs deep reddish crimson, surface covered with white blotches, shaded red. 3s. 6d. & 5s.
- RAOUL PUGNO**, very transparent, pale flesh colour, margin dark green. 10s. 6d.

NEW AND CHOICE CALADIUMS—continued.

- RAULINII**, rich red centre and veins, finely spotted with white. 3s. 6d.
- REGALE**, silvery grey centre, rosy red ribs, vermilion-red spots. 2s. 6d. and 3s. 6d.
- REINE MARIE DE PORTUGAL**, violet-rose centre with red veins, dark maroon zone green border. 5s. & 7s. 6d.
- REINE VICTORIA**, green veins and margins, spotted with white and rich crimson. 2s. 6d. and 3s. 6d.
- ROSSINI**, pale centre, pink mid-ribs, red blotches. 3s. 6d.
- ROUILLARD**, green margin, pale green centre, mid-rib and rays violet-plum; whole of leaf spotted crimson. 3s. 6d.
- RUBENS**, golden green ground, shaded bright red and veined with dark brown. 7s. 6d.
- RUBRUM METALLICUM**, violet red, rose centre, shaded violet, margin copper red. 21s.
- SALVATOR ROSA**, bright red centre tinted with rosy violet; light green margin. 5s.
- SANCHONIATHON**, crimson centre; deep crimson ribs and pea-green margin. 3s. 6d.
- SANGUINOLENTUM**, green with white mid-rib and red spots. 3s. 6d.
- SIEBOLDII**, rich green, with fiery red crimson-rayed centre and claret-red spots. 3s. 6d.
- SIRIUS**, centro scarlet-red, spotted with rosy red and golden green. 10s. 6d.
- SIR WALTER SCOTT**, 5s.
- SOFIA**, 21s.
- SOUVENIR DE LILLE**, translucent delicate rose leaves, nerves bright rose. 21s.
- SOUVENIR DE MADAME BERNARD**, bright red centre, dotted with golden yellow, green and white; light green border. 7s. 6d.
- SOUVENIR DE MADAME E. ANDRE**, green marbled with white, veined with rosy crimson. 3s. 6d. and 5s.
- SOUVENIR DES TOUCHES**, carmine shaded violet; red veins, rose spots surrounded with white. 7s. 6d. & 10s. 6d.
- SOUVENIR DU DOCTEUR BLEU**, reddish scarlet centre; pale green border shaded with rich red. 10s. 6d.
- SPONTINI**, pea-green, with white spots and rosy pink ribs and veins. 5s. and 7s. 6d.
- TRICOLOR**, grey-green with red-lake centre and carmine mid-ribs. 5s. and 7s. 6d.
- TRIOMPHE DE L'EXPOSITION**, crimson centre, red ribs, green border. 3s. 6d.
- URANUS**, 3s. 6d.
- VAN DYCK**, transparent rosy-lake, pale rose centre, grey green margin. 7s. 6d.
- VELLEDA**, 3s. 6d.
- VERDI**, crimson-lake centre, with small green zone and apple-green margin. 7s. 6d.
- VESTA**, greenish white veins, surrounded with crimson; leaf spotted rose. 3s. 6d.
- VICOMTESSE DE LA ROQUE-ORDAN**, red mid-rib and rays bordered white; green margin. 3s. 6d.
- VILLE DE MULHOUSE**, greenish white, shaded rose; rich green centre. 5s.
- VIRGILE**, 5s.
- VIRGINALE**, shining white, veined dark bluish green; a grand variety. 5s. and 7s. 6d.

BEGONIAS.

HANDSOME-FLOWERED, TUBEROUS-ROOTED SECTION.

- ALFONSO**, a fine flower; colour cinnamon, shaded with salmon. 2s. 6d.
- AURELIA**, a very fine large flower of a cinnamon-rose colour; very distinct. 2s. 6d.
- BERTHA**, a splendid flower with broad petals, of a soft salmon-pink colour. 5s.
- BRILLIANT**, rich bright orange, a dazzling colour; flowers large and fine; very showy. 3s. 6d.
- CALYPSO**, a fine flower with very broad petals of a bright rose colour, shaded with magenta. 3s. 6d.
- CARDINAL**, a magnificent variety, producing large flowers of a deep rich magenta-rose colour. 3s. 6d.
- CAROLINE**, deep rosy pink, a very fine showy flower with broad petals. 2s. 6d.
- CHELSEA GIANT**, light carmine-scarlet; a huge flower. 5s.
- CLEOPATRA**, rosy lake, shaded with magenta; a very large flower with fine broad petals. 3s. 6d.
- CLIMAX**, deep rich rosy carmine; the two outer petals extremely broad; a beautiful variety. 2s. 6d.
- CORONET**, rich rosy carmine; a large flower with broad petals. 3s. 6d.
- CORSAIR**, rosy salmon; a most profuse blooming variety. 2s. 6d.
- DAPHNE**, a fine large flower of a pretty pink colour, with purple shade. 5s.
- DAVISII**, a very dwarf growing species, freely producing attractive bright scarlet flowers. 1s. 6d.
- DEFIANCE**, a showy variety, producing fine large flowers of a light orange-scarlet colour. 5s.
- DELICATA**, a charming variety, with beautiful blush-white flowers. 2s. 6d.
- DRAGON**, a beautiful flower, with fine long petals; colour rich bright rose; very effective. 3s. 6d.
- DR. MASTERS**, an effective variety, with very rich carmine-crimson flowers. 2s. 6d.
- EMBLEM**, a large flower with broad petals, of a deep rose colour, shaded with magenta. 2s. 6d.
- ENSIGN**, bright pink; a beautiful shade of colour; flowers large; a very elegant variety. 2s. 6d.
- ETHEL**, a beautiful flower of a light salmon-pink colour. 5s.
- FIREFLY**, an exceedingly attractive variety, producing fine flowers of a bright scarlet colour. 5s.
- FLAMBEAU**, bright crimson, shaded with rose, fine round flower. 5s.
- FLAMMETTA**, bright orange-scarlet; a remarkably large and fine flower. 3s. 6d.
- FRÆBELLI**, a splendid species from Ecuador, producing brilliant scarlet flowers. 1s.
- FRÆBELLI INCOMPARABILIS**, a magnificent variety with large brilliant scarlet flowers. 1s. 6d.
- GEM**, light cream colour, the reverse of petals light pink; extremely distinct and attractive. 3s. 6d.
- GLITTER**, vivid orange-scarlet; an extremely bright and showy colour; a fine large flower. 3s. 6d.
- HERMINE**, light orange-cinnamon, a very distinct and attractive shade of colour. 2s. 6d.
- ICARUS**, a very fine large flower of a bright salmon colour. 3s. 6d.
- IMPERIALIS**, splendid flower, dark rosy crimson. 7s. 6d.

HANDSOME-FLOWERED BEGONIAS.

- LUCINDA**, a large and fine flower, with remarkably long petals of a deep rose colour. 3s. 6d.
MABEL, delicate salmon-pink; a fine flower of good shape. 5s.
MAGENTA QUEEN, a beautiful variety, with large pendent flowers of rich deep rose colour. 2s. 6d.
MAGNET, beautiful light pink, the reverse of the petals deep pink; a charming variety. 2s. 6d.
MARATHON, deep crimson; a very fine large flower. 3s. 6d.
MARTHA, soft delicate rose-pink; a beautiful flower. 5s.
MAZEPPA, very light cream colour, the reverse of the petals tinted with orange-pink. 2s. 6d.
MINIATA, a fine showy variety, producing flowers of a bright rosy carmine colour. 2s. 6d.
MODIOLA, bright rose, shaded with salmon; a very large flower with fine broad petals. 3s. 6d.
MONT BLANC, white, slightly tinted, very pretty. 3s. 6d.
MRS. H. COPPIN, very clear bright yellow. 3s. 6d.
OBERON, bright crimson, shaded with orange-scarlet; a splendid variety. 3s. 6d.
ORESTES, deep rosy carmine; a magnificent flower with fine large petals. 3s. 6d.
PEARCEI, flowers large, bright yellow, and borne on slender stems well above the foliage. 1s. 6d.
PEARCEI GRANDIFLORA, fine large flowers, of a bright golden-yellow colour. 2s. 6d.
PHYLLIS, a beautiful variety, with blossoms of a delicate sulphur colour, tinted with pink. 2s. 6d.
PINK BEAUTY, fine large bright rosy pink flowers, beautiful shape. 7s. 6d.
QUEEN OF WHITES, a desirable variety, with lustrous leaves, and pure white flowers. 3s. 6d.
REGALIS, a beautiful salmon-rose flower, of good form and substance. 7s. 6d.
RUBESCENS, a fine variety, giving a profusion of large rich salmon-tinted red blossoms. 3s. 6d.
SERAPH, a fine flower of a soft pink colour; the two outer petals suffused with rose. 2s. 6d.
SPARKLER, a splendid flower with fine broad petals of a bright crimson colour. 3s. 6d.

- STARLIGHT**, a beautiful variety, with large flowers of a pretty shade of blush-pink. 3s. 6d.
SUNRISE, a magnificent variety, producing large flowers of a bright rosy scarlet colour. 2s. 6d.
SUNSET, rich crimson; a fine large showy flower. 3s. 6d.
SURPRISE, a beautiful variety, producing pretty bright pink flowers in great profusion. 2s. 6d.
TEMPLAR, a fine flower, with broad petals of a rosy pink colour. 3s. 6d.
TROJAN, an effective variety, freely producing fine flowers of a light rosy pink colour. 2s. 6d.
VEITCHII, this species produces blooms of a vivid vermilion or cinnabar red colour. 2s. 6d.
VERONA, bright rosy pink; a very pretty variety. 3s. 6d.
VESTA, pure white; very large flower. 7s. 6d.
VESUVIUS, a fine variety, producing very large flowers of a rich orange-scarlet colour. 1s.
VICTORY, a magnificent flower, with broad petals of a dazzling vermilion-scarlet colour. 7s. 6d.
VIVICANS, a very graceful plant, with brilliant orange-scarlet bell-shaped flowers. 2s. 6d.
WHITE QUEEN, a beautiful variety, producing ivory-white flowers tinted with rose. 2s. 6d.

Selections of good single-flowering Varieties can be made by Mr. W. B. at 18s., 30s. and 42s. per dozen. Unnamed Seedlings raised from the best varieties, when dormant, 6s. and 9s. per dozen, 2 and 3 guineas per 100.

DOUBLE-FLOWERING BEGONIAS.

Selections of choice double-flowering varieties made at 2, 3, and 4 guineas per dozen.

BEGONIA BALMISIANA.

This very distinct Begonia has been imported from Mexico. It is a handsome flowering tuberous-rooted species and freely produces quantities of large and attractive flesh-coloured flowers of good substance. The succulent stems are dark-red in colour, the leaves being thick and fleshy, with dentate margins. 3s. 6d.

BEGONIAS.

VARIEGATED-FOLIAGED SECTION.

These are remarkable for their variegated and beautifully coloured ornamental foliage.

- ANTONA**, dark centre, surrounded with silver-grey and margined with bronze. 5s.
BARANA, leaves a beautiful silver, marked in the centre and at intervals round the margin with olive-green. 5s.
LEDA, leaf bright silver, marked in centre with bronzy-green, and prettily margined with bronze. 5s.
MADAME HENRI GACHE, the finest of the variegated leaved section; the middle of the leaf is of a glistening greyish silver, shaded in a most remarkable manner with bright rosy-crimson, the margin being olive green spotted with silver; centre rich olive brown. 3s. 6d.
SYLVIA, silver-grey leaves, beautifully marked in centre and round the margins with bright-bronzy green venations. 5s.
VESTAL, bright green, blotched and spotted with silver and margined with bronze; centre bright bronze. 5s.
VIRGINIA, silver-grey, dark green venation in centre, the marginal venation of a bronzy-green. 5s.

BEGONIA ALBO-PICTA.

BEGONIA ALBO-PICTA.

A neat and pretty species, introduced from Brazil, distinct in character from all the cultivated kinds whether species or varieties. It is shrubby in habit and of compact growth, having elliptic lanceolate leaves shortly stalked. The leaves are glossy green, freely spotted with bright silvery white, the nebulous markings becoming smaller towards the margins. It has small and elegant foliage and will make a really useful and pretty plant for decorative purposes. 3s. 6d.

BEGONIA SCEPTRA.

BEGONIA SCEPTRA.

This is a very handsome and distinct species, a native of Brazil. The leaves are obliquely ovate in outline, deeply lobed on one side, the lobes oblong obtuse, the veins sunk, and the raised spaces between marked with large silvery blotches, and numerous smaller dots of silvery grey. The leaf-stalks are red, this colour passing up the ribs of the under surface. 10s. 6d.

PRINCE OF WALES, 2s. 6d.	STARLIGHT, 5s.	ZENOBIÉ, 3s. 6d.
PROGNE, 5s.		

BEGONIA BEDDOMEI (ASSAMICA).

A neat-growing species, introduced from Assam. It has short fleshy stems, short pale green softly hairy leaf-stalks, and oblique ovate olive-green leaves, marbled with silvery blotches above, and of a pale purplish pink beneath. The flowers are of a pinkish flesh-colour. 3s. 6d.

BEGONIA GLOIRE DE SCEAUX.

A new hybrid winter-flowering bulbous variety raised between *B. socotrana* and *B. subpetula*. The plant is most prolific, the flowers being of a beautiful bright rose colour. The glabrous leaves are cordiform, and of a dark metallic green. Flowering as this does from the beginning of January to the end of April, it will be found a very desirable acquisition. 10s. 6d.

BEGONIA HYBRIDA COCCINEA.

A pretty and desirable hybrid variety, belonging to the winter-flowering section. It is of dwarf compact habit, bearing in the greatest profusion its beautiful bright scarlet flowers, making it admirably adapted for the decoration of greenhouses and conservatories during the dull winter months. 3s. 6d. and 5s.

BEGONIA RUBELLA.

A very ornamental Indian species, with stout decumbent stems; the leaves are numerous and freely covered with deflexed red scales on a pallid ground, which gives to them a reddish appearance. The leaf blades are of a bronzy green with a broad pale green band down the principal costa, and smaller bands of the same along the other main ribs, the whole dotted over with oblong blotches of purplish brown; the under surface is red. 5s.

CHRYSANTHEMUMS.

These popular plants have now become so numerous that to give detailed descriptions of each they would of themselves form a catalogue, and by giving descriptions purchasers could form but little idea of the comparative merit of varieties; it has therefore been thought best to give simply a list of names in their various sections. When the selection is left to Mr. W. B., the utmost care will be taken to send only varieties of the greatest merit.

NEW CHRYSANTHEMUMS OF 1886.

Price 30s. per dozen.

NEW AND CHOICE FUCHSIAS.

Those marked () are double-flowered varieties.*

- ***ADAIR**, short tube and well reflexed sepals of a bright crimson colour; short, double, bluish purple corolla, occasionally flaked with rose at the base. 5s.
ADDISON, tube and sepals bright crimson; the sepals very broad and horizontally reflexed; fine large corolla of a rich deep purple colour striped and flaked with rose. 1s. 6d.
ADINE, white tube and sepals, completely reflexed, rosy magenta corolla. 1s.
 ***ADMIRAL COURBET**, tube and sepals dark red, immense double corolla of a very dark violet colour. 3s. 6d.
 ***ADMIRAL MIOT**, tube and sepals bright red, large double plum-coloured corolla; very free and of good habit. 7s. 6d.
 ***ALPHONSE DAUDET**, bright red recurved sepals and bluish violet corolla. 1s.
AMADEO, bright rosy pink tube and sepals; tube very short; bright bluish corolla. 1s.
AMBROSIA, bright crimson tube and broad sepals; large rich purplish plum corolla, marked with rosy crimson. 1s.
 ***ANITA**, rosy crimson tube and sepals, the latter being well reflexed; large double corolla of a rich plum colour. 2s. 6d.

- ***ARAB**, short bright crimson tube and well-reflexed sepals; fine large deep bluish purple double corolla. 7s. 6d.
ARLEQUIN, tube and sepals reddish scarlet, corolla rosy carmine, bordered with violet flaked and marked with rose and violet. 1s.
ARIA, tube and sepals rosy crimson; corolla of a deep rich purple colour. 1s. 6d.
 ***ARPA**, tube and sepals bright carmine; the sepals broad and horizontally reflexed; large double corolla of a violet-red colour. 1s. 6d.
 ***AUGUSTE FLAMENG**, large reflexed rosy carmine sepals, large and compact double dark lilac corolla; of good habit. 1s.
 ***AVOCA**, short tube and sepals, completely reflexed and of a bright rosy crimson colour; double rich bluish purple corolla. 2s. 6d.
 ***AZUREA SUPERBA**, tube and recurved sepals of a bright reddish coral colour; enormous double azure-violet corolla. 1s.
BEAUTY OF GLYFFE HALL, a very fine large flower; tube and sepals bluish white; corolla rich carmine-pink. 1s.
BEAUTY OF LAVINGTON, white tube and petals, corolla bright rosy carmine, shaded with violet. 3s. 6d.

NEW AND CHOICE FUCHSIAS.—continued.

- BLUE KING**, bright crimson tube, well-reflexed sepals, and fine blue corolla. 1s.
- BULGARIE**, large brilliant red well-shaped sepals; very large extended corolla of a violet plum colour. 7s. 6d.
- BULRUSH**, light crimson tube and sepals; tube long, and sepals horizontally reflexed; light rosy purple corolla. 1s.
- CAMILLE FLAMMARION**, a large flower; with reflexed sepals of a rosy red colour, and well-formed reddish violet corolla. 1s.
- *CIEL D'AZUR**, short tube and well reflexed bright red sepals, very large sky-blue double corolla, flaked with rosy carmine. 2s. 6d.
- CISSIE**, bright crimson tube and sepals, the latter prettily recurved; fine full corolla of a rich dark purple colour. 1s.
- *CLARINDA**, huge double white corolla, short tube and broad sepals, dark crimson. 1s.
- COLONEL BORGNI-DESBORDES**, plant dwarf and very floriferous; large reflexed rosy salmon sepals; globular corolla of a clear violet colour. 7s. 6d.
- *COLONEL DOMINÉ**, clear red reflexed sepals; large imbricated corolla; white lightly suffused with rose, the base shaded with rose. 7s. 6d.
- COLOSSUS**, flower of gigantic size; tube and sepals very rich bright glossy crimson, a most intense shade of colour; the sepals very broad and thick, corolla well expanded, of immense size, and of a deep purplish plum colour; one of the largest and best single Fuchsias ever sent out. 3s. 6d.
- *CORMORANT**, short tube and fine large rosy-crimson sepals; long semi-double bluish purple corolla. 7s. 6d.
- CREUSA**, rich crimson tube, and reflexed sepals; fine large corolla of a rich dark purple-plum colour, shaded at the base. 1s.
- DIADEM**, bluish tube and sepals, corolla pale magenta, broadly edged with brilliant carmine, a fine showy variety. 3s. 6d.
- DORCAS**, short tube and large rosy carmine sepals well reflexed, immense soft bluish-purple corolla, veined and shaded with rose. 3s. 6d.
- *EDELWEISS**, a fine large flower with full and double white corolla; rich crimson sepals, broad, long and well reflexed. 1s.
- *ELFIN**, light crimson tube and sepals, the latter elegantly reflexed; rich purple corolla, flaked with rose; very full and double. 1s.
- EMILY BRIGHT**, creamy white tube and sepals; bright carmine corolla, of fine form. 3s. 6d.
- EMPEROR**, bright red tube and sepals, the latter long and broad; corolla maroon, shaded purple; a handsome and showy Fuchsia. 3s. 6d.
- *FATMA**, bright crimson tube and reflexed sepals; bluish-purple corolla. 3s. 6d.
- FLAMBEAU**, short tube, and well reflexed crimson sepals; very large and full corolla of a dark violet colour, shaded with azure, and striped and spotted with scarlet. 1s.
- FLOCON DE NEIGE**, well reflexed carmine sepals; large creamy white corolla. 1s.
- *FLORA**, very short tube, and large bright rosy crimson sepals fully reflexed, the large double corolla being bright purple, flaked at the base with rosy carmine. 5s.
- *FRANCISQUE SARCEY**, corolla bluish violet; large reflexed sepals, dark rose on the inside and bright red on the exterior. 1s.
- *FRAU EMMA TOPFER**, broad well reflexed rosy magenta sepals; double white corolla suffused and veined with rose; very floriferous, and of compact habit. 1s. 6d.
- GANNET**, short tube with long bright crimson reflexed sepals; bluish purple corolla, shaded with rosy crimson at the base. 3s. 6d.
- *GARNET**, completely reflexed bright carmine sepals; rich purple double corolla, marked at the base with rose. 2s. 6d.
- GAZELLE**, tube and sepals very bright crimson, very long corolla of a dark satiny purple colour; distinct and attractive. 1s.
- *GENERAL**, a fine showy flower with very large reflexed deep rose sepals, and large expanded double corolla of a rich violet colour flaked with rose. 1s.
- GERALD**, a very fine flower with rich crimson tube and sepals, the latter completely reflexed; large expanded corolla of a rich purplish crimson colour. 1s. 6d.
- GLORY**, tube and sepals very brightly coloured and completely reflexed, the very large violet corolla being beautifully formed and widely expanded. 5s.
- *GOLIATH**, tube and sepals deep red, enormous reddish purple corolla, surrounded with a row of bright red petals. 2s. 6d.
- HARLEQUIN**, a gigantic variegated flower; sepals rich carmine, broad and reflexed; immense bluish purple corolla striped with rosy pink. 5s.
- HARMONIE**, reflexed whitish rose sepals, corolla soft lilac; of good habit. 1s.
- HARIET LYE**, creamy white tube and sepals, lilac-pink corolla, edged with carmine. 1s.
- HERON**, short tube, and broad rosy carmine sepals; corolla rich bluish purple. 2s. 6d.
- *HOCHÉ**, rose sepals, completely reflexed; full rosy lilac corolla of good shape; a new colour. 7s. 6d.
- IMPERIAL**, well-formed corolla of a beautiful glossy plum colour, striped and flaked pink; tube and sepals bright rosy carmine. 1s. 6d.
- IRMA**, bright rosy carmine tube and sepals, the latter being horizontally reflexed, and of extraordinary length, slightly and elegantly curled; long rosy purple corolla. 5s.
- JAMES WELCH**, bright rosy red tube and sepals; the latter beautifully reflexed; corolla pale maroon shaded with bright purple; very handsome and of fine form. 3s. 6d.
- JASON**, fine corolla about 1½ inch long, and of an intense black-purple colour; sepals long and reflexed, of a deep crimson colour. 1s.
- *JUMNA**, short tube and very broad bright crimson sepals; enormous rich purple double corolla; the base marked with rosy crimson. 7s. 6d.

NEW AND CHOICE FUCHSIAS.—continued.

- JUNO**, a very attractive flower of good shape, having a short tube with large and broad well-reflexed crimson sepals, the corolla being deep purple marked with rosy pink at the base. 5s.
- ***KINGSBURYANA**, free bloomer, producing fine flowers with bright red tube and sepals, and large double white corolla. 1s.
- ***KLEBER**, sepals horizontally reflexed, rosy white tipped with green; double violet blue corolla. 7s. 6d.
- ***LA FRANCE**, large recurved bright red sepals; the large double corolla being of a beautiful cobalt blue; very fine. 1s.
- LADY HEYTESBURY IMPROVED**, an improvement on *Lady Heytesbury*, both in habit and flower. 1s.
- LAMUS**, tube and sepals rich deep scarlet; tube short, and sepals prettily recurved; corolla of a dark satiny purple colour. 1s.
- L'AVENIR**, short tube and recurved sepals, rosy crimson tipped with green; fine expanded tricolor corolla, blue, rose and white. 2s. 6d.
- LITRÉ**, corolla of a dark violet colour, whitish at the base; short tube, and large recurved sepals of a soft rose colour. 1s.
- LUSTROUS IMPROVED**, very large and most intense orange scarlet corolla, white tube and sepals. 1s.
- LYE'S EXCELSIOR**, creamy tube and sepals, well reflexed, corolla rich rosy magenta, flushed with carmine; very fine and distinct. 3s. 6d.
- LYE'S PERFECTION**, creamy white tube and sepals, the latter delicately suffused with pink and handsomely reflexed; corolla bright carmine; very showy. 3s. 6d.
- LYE'S RIVAL**, tube and sepals red; corolla rich violet-purple; very free blooming. 1s.
- ***MADAME GALLI-MARIE**, a very large full double flower, long recurved brilliant rosy red sepals, and alabaster white corolla. 1s.
- ***MADAME JULES CRÉTIEN**, brilliant crimson tube and sepals; pure snowy white corolla, flaked with carmine. 1s.
- MAGNUM BONUM**, a very showy variety, with broad stout brilliant red sepals, and large well-formed rich violet corolla. 1s.
- ***MARCEAU**, cream coloured tube and sepals, the latter well reflexed and tipped with yellowish green; long double corolla of a beautiful rosy amaranth colour, dwarf and very floriferous. 7s. 6d.
- ***MARVELOUS**, tube and sepal deep rose; full, double, bright blue corolla of pretty rosette-like form. 1s.
- MATCHLESS**, a magnificent flower; tube and sepals crimson, the latter broad and elegantly reflexed; well-formed corolla of a rich purple colour striped and flaked with rose. 1s. 6d.
- MEMPHIS**, tube and sepals of a rich crimson colour, the sepals gracefully reflexed; large and well-expanded rich purple corolla. 1s.
- MILTIADES**, deep crimson tube and sepals; the latter elegantly recurved; corolla of a deep rich purple colour. 1s. 6d.
- ***MINERVA**, a splendid flower with large and very full double white corolla, bright carmine tube, and reflexed sepals. 1s.
- ***MINSTREL**, tube and sepals bright rosy crimson; corolla very full and double, ivory white striped with rose at the base. 1s.
- ***MONSTRUOSA PLENA**, an enormous flower, with short tube and well-recurved dark coral-red, sepals immense, double reddish crimson corolla. 1s.
- M. DUFAURE**, rosy salmon corolla and elegantly recurved sepals of a yellowish salmon colour, with green tips. 1s.
- ***M. LOMBARD**, tube and sepals rosy carmine, the latter reflexed; fine double white corolla, the petals veined with carmine. 1s.
- MONTGOMERY**, short tube and reflexed sepals rich bright crimson; corolla rich purplish crimson flaked with rose. 1s. 6d.
- ***MONUMENT**, full double corolla of a deep purple colour, striped with rosy carmine; tube and sepals rosy crimson. 1s.
- MR. F. BRIGHT**, tube and sepals deep rosy pink, corolla rose with broad margins of rich bluish-purple. 3s. 6d.
- MR. F. GLASS**, tube and sepals bright crimson; corolla purplish-maroon; fine and distinct. 3s. 6d.
- MRS. BRIGHT**, waxy white tube and sepals, clear orange-scarlet corolla; a wonderfully free-blooming variety of fine habit. 1s.
- MRS. F. GLASS**, creamy white tube and sepals, fine stout deep pink corolla, shaded with violet. 3s. 6d.
- MRS. GRANT**, a beautiful flower, with blush tube and sepals, and orange-rose corolla. 1s.
- NELLIE**, creamy white tube and sepals, pink corolla of good form, suffused with mauve; very distinct. 3s. 6d.
- ***NESTOR**, tube and sepals carmine, the latter reflexed; large, double, much expanded corolla of a rich purplish crimson colour. 1s.
- ***NOVEAU MASTODONTE**, full double corolla dark violet veined with red; sepals reflexed, covering the brilliant red tube. 1s.
- PARACHUTE**, large and widely expanded corolla of a violet-lake colour marked with red; short, broad, recurved sepals of a reddish scarlet colour. 2s. 6d.
- ***PATTERN**, short tube and broad rosy-crimson sepals; enormous bluish purple double corolla, shaded and flaked with rose. 7s. 6d.
- PENELOPE**, tube and sepals bright red, long and large white corolla of good shape. 3s. 6d.
- PERA**, short tube and bright coral-red sepals, horizontally reflexed; long bluish purple corolla. 5s.
- ***PHENOMENAL**, short tube and reflexed sepals of a rich reddish crimson colour; enormous corolla, very full and double, of a beautiful azure-violet colour flaked with red. 1s.
- PINK PERFECTION**, creamy white tube and sepals, and rich pink and violet corolla, dashed with violet. 1s.
- PRESIDENT**, tube and well-recurved petals of a bright vermillion; beautiful formed corolla of the richest violet colour. 1s.
- ***PRÉSIDENT GRÉVY**, sepals rosy lake, of fine form and well reflexed; very large double corolla of a peculiar shade of rose; plant dwarf and free. 7s. 6d.

NEW AND CHOICE FUCHSIAS—continued.

- PROGRESS**, a large and showy Fuchsia, with very long bright red sepals and rich violet corolla. 5s.
- ***RANGER**, short tube and completely recurved rosy-crimson sepals; fine large double light bluish purple corolla, shaded with rose at the base. 7s. 6d.
- ***REAPER**, short tube and wide sepals, of a bright rosy carmine colour; short double corolla of a purplish crimson colour. 1s.
- ***REDWING**, short tube and bright red sepals; short and broad double rosy-purple corolla, flaked with carmine. 7s. 6d.
- ***SÉNATEUR BERLET**, long brilliant carmine broad sepals well reflexed, enormous double violet corolla of perfect globular shape. 1s.
- ***STARTLER**, tube and reflexed sepals deep crimson; large, double corolla of a rich purple colour, the outer petals striped and flaked with rosy carmine. 1s. 6d.
- ***SYLVANUS**, short tube and long recurved rosy crimson sepals; long bluish purple double corolla shaded with rose. 5s.
- SYROS**, tube and sepals deep rose, sepals broad and horizontally reflexed; corolla of a deep bluish purple colour. 1s.
- THOMAS KING**, tube and sepals soft coral-red; corolla rich deep purple, sometimes striped with pale red. 1s. 6d.
- ***TRITON**, short tube and long crimson sepals well reflexed, the double corolla being of a bright lavender colour beautifully flaked with light rosy pink. 5s.
- TULIP**, crimson sepals completely reflexed; large and much expanded tulip-shaped rich purple corolla, flaked with rose. 1s.
- UTERPE**, short tube and broad coral-red recurved sepals, dark plum-coloured corolla, shaded rosy crimson at the base. 3s. 6d.
- UTOPIA**, short tube and broad rosy carmine, horizontally reflexed sepals; bluish purple corolla, shaded with rose at the base. 2s. 6d.
- ***VILLE DE NANCY**, tube and sepals carmine red, wide and well recurved; fine large double brilliant dark violet corolla. 1s.
- ***VIOLET DE DUC**, a full double flower, with expanded corolla of a metallic violet colour, and short reddish reflexed sepals. 1s.
- VIRGO**, tube and sepals pure white; the latter gracefully reflexed, and forming a perfect crown above the magenta corolla. 1s.
- ***VOIX DU PEUPLE**, large flowers with fine expanded milky white double corolla; sepals well recurved, of a rosy carmine colour. 1s.
- ***WHITE GIANT**, a splendid variety, producing long racemes of flowers, of immense size; one of the largest double white corollas. 1s.
- WORDSWORTH**, short tube and broad recurved bright carmine-scarlet sepals; rich purplish plum-coloured corolla. 1s.
- ***WYVERN**, short tube and large rosy crimson sepals well-reflexed, long semi-double purple corolla. 3s. 6d.

Selections of other good Varieties can be made from Mr. W. B.'s General Collection at 9s. and 12s. per dozen.

FUCHSIAS.

HYBRIDS AND SPECIES.

- AMPLIATA**, a handsome large scarlet-flowered species, introduced from the Andes of South America. 5s.
- BOLIVIANA**, a remarkably ornamental and attractive species, of compact growth, producing large bunches of beautiful drooping rich carmine crimson flowers. 1s. 6d.
- BOLIVIANA GRANDIFLORA**, flowers bright vermilion, very long tube and immense sepals and corolla; twice the size of the typical variety. 5s.
- CANARY BIRD**, a showy and attractive variety; foliage of a golden yellow colour; leaves prettily veined; flowers well formed; tube and sepals scarlet; corolla a rich dark purple colour. 1s. 6d.
- CRIMSON BEDDER**, a distinct variety with bronzy crimson leaves, the bright colouring of which will make it a useful, novel, and effective bedding plant; the flowers are pale red. 3s. 6d.
- DEPENDENS**, of free trailing habit and somewhat pendulous growth, dark crimson flowers. 2s. 6d.
- GRACILIS VARIEGATA**, an elegant variety; leaves broadly margined with white. 1s. 6d.
- PROCUMBENS**, a distinct and interesting species; the flowers are about three-quarters of an inch long; orange-yellow tube and sepals of a deep violet colour edged with green. It has been figured in the *Botanical Magazine*, tab. 6139. 1s. 6d.
- ***RAINBOW**, an extremely pretty variety with attractively variegated leaves, the colours of which are rose, white and crimson on a light green ground; the flowers have a double white corolla contrasting well with the bright carmine tube and sepals, the latter being nicely reflexed. 3s. 6d.
- ***RUBENS**, a bushy growing variety with attractively variegated foliage, the leaves being marked with yellow in the centre and bordered with golden yellow; flowers double, very dark violet corolla, clear red recurved sepals. 1s.
- SPLENDENS**, a free-blooming attractive species, producing rich crimson flowers with the ends of the sepals light green; of free growth and easy cultivation. 1s. 6d.
- SUNRAY**, a beautiful plant, with leaves of a rich bright crimson, white and bronzy green, in about equal parts; the flowers are of fine form; scarlet tube and sepals; light purple corolla. 1s. 6d.
- TRIPHYLIA**, flowers at every growth in trusses of orange scarlet or Indian-red colour; a very distinct and beautiful species. 5s.

NEW COLEUS.

ALFONSE BERNOUD, centre of the leaves rosy red maculated white, dark green border maculated with maroon. 3s. 6d.

BEAUMARCHAIS, large purplish maroon leaves, centre carmine, red, and magenta, veined with white. 3s. 6d.

CELINE CHENU, large fringed leaves centre shaded and dotted with red, green, and gold; green border maculated with red. 3s. 6d.

CRÉBILLON, very large bright reddish magenta leaves, bordered with green and maroon. 3s. 6d.

EMILIE CHRÉTIEN, large dark rose-coloured leaves lightly shaded. 3s. 6d.

LINA CHRÉTIEN, centre reddish magenta, dotted with white, green border maculated with maroon. 3s. 6d.

LOUISE CHRÉTIEN, white centre, green border lined with gold. 3s. 6d.

LOUIS KETELEER, large leaves spotted and striated with gold, red, and green. 3s. 6d.

MADAME DE LA LARDIÈRE, reddish magenta, bordered with maroon, margined with green. 3s. 6d.

MON CAPRICE, very large leaves, centre pale green, veined with bright red, white, and clear yellow. 3s. 6d.

M. BOUTARD, bright rose, bordered with maroon and light green. 3s. 6d.

TINTORET, very large leaves, centre cream, speckled with rosy violet; maroon border reticulated with green. 3s. 6d.

BOUVARDIA LEIANTHA CINNABARINA.

A vigorous and floriferous variety, producing large globular umbels of brilliant cinnabar-red flowers, with flesh-coloured throat; the tubes are of a vermilion colour, and three quarters of an inch in length. 3s. 6d.

BOUVARDIA THOMAS MEEHAN.

This new variety is a hybrid between *B. leiantha* and *B. Alfred Neuner*, and freely produces pretty bright red semi-double flowers. 3s. 6d.

NEW DOUBLE BOUVARDIAS.

HOGARTHI, FL. PL., a beautiful double-flowered form, of the useful and well-known *B. Hogarthi*, having the same vigour and the same free-flowering qualities as the type. The flowers are of a bright red colour, very double, and prettily imbricated. A most desirable acquisition. 3s. 6d.

SANG LORRAINE, a free-flowering variety, producing fine corymbs of large double flowers of a brilliant vermilion colour. 1s. 6d.

TRIOMPHE DE NANCY, a vigorous and floriferous variety, with large compact corymbs of well-formed double flowers of a beautiful orange salmon colour. 1s. 6d.

V. LEMOINE, the fine imbricated double flowers of this variety are of a fiery scarlet colour, produced in large corymbs in the freest manner, the plant being extremely floriferous. 1s. 6d.

CALADIUM ESCULENTUM.

An effective plant for sub-tropical gardening. 2s. 6d. and 3s. 6d.

CALCEOLARIA BURBIDGEI.

A free-flowering variety, the result of a cross between *C. Fuchsifolia* and *C. Pavoni*; it is of bushy habit, and produces its golden yellow flowers during the autumn and winter months. 3s. 6d.

CALCEOLARIA GLUTINOSA.

A pretty free-flowering species, producing a profusion of bright lemon-yellow coloured flowers. 1s. 6d.

CANNA IRIDIFLORA EHEMANNI.

A splendid variety, with handsome ornamental foliage and magnificent flowers, which are of an extremely rich crimson-scarlet colour; the blossoms are of large size and exceedingly effective. 3s. 6d.

CANNAS.

These are striking foliage plants, very effective for sub-tropical gardening and border grouping. 12s., 18s. and 30s. per dozen.

CHRYSANTHEMUM FRUTESCENS, 1s.
FRUTESCENS ALICE CROUSSE, 1s. 6d.
— COMTE DE CHAMBORD, 1s. 6d.

CHRYSANTHEMUM FRUTESCENS ETOILE
D'OR, 1s. 6d.
CARNATIONS, Tree of sorts, 30s. and 42s. per doz.

DAHLIAS.

Choice Exhibition Varieties, 9s., 12s., 18s. and 30s. per dozen.

Choice Exhibition Varieties, Fancy Flowers, 9s., 12s., 18s. and 30s. per dozen.

Dwarf Bedding Varieties, 9s. and 12s. per dozen.

Bouquet or Pompon Varieties, 9s. and 12s. per dozen.

SINGLE-FLOWERED DAHLIAS.

These are extremely effective as decorative plants for grouping in beds or borders, and their blossoms are very useful for cutting; they bloom so continuously and profusely that they are highly attractive. 9s., 12s. and 18s. per dozen.

ECHEVERIAS, vide page 143.**GAILLARDIA ADMIRATION.**

A very fine free-blooming variety, producing large reddish crimson flowers bordered with citron-yellow. 2s. 6d.

HELIOTROPE ALBERT DÉLAUX.

A dwarf-habited variety of free growth, producing profusely fine heads of bloom of a violet colour shaded with rose, deliciously fragrant; the foliage is beautifully marbled with golden yellow; a charming novelty. 5s.

HELIOTROPE PRESIDENT GARFIELD, 1s.

WHITE LADY, 1s.

HELIOTROPIMUM INCANUM, 3s. 6d.

LANTANAS, of sorts, 18s. per dozen.

LOBELIA ERINUS OMEN, 1s.

IBERIS SEMPERVIRENS FLORE-PLENO.

This pretty double variety of the well-known perennial Candytuft will be found a most desirable and welcome addition to the Herbaceous border. Its beautiful white flowers are borne in the greatest profusion, and being most persistent, will be found of the greatest value for cut purposes. 2s. each.

LOBELIA SYPHILITICA.

These are perennial, perfectly hardy and wonderfully effective. The flowers are borne in spikes 12 to 18 inches long; varying from white, through every shade of ruby and purple, to brilliant crimson or scarlet crimson.

AMETHYST, deep purplish-blue
APOLLO, rosy-purple, medium size
ARGUS, bluish-purple, distinct eye
COMET, large; brilliant scarlet
CERES, robust; crimson-scarlet
CHALLENGER, large and fine; rosy-purple
DON JUAN, mauve-purple
EMPRESS, rosy-purple
JASON, rosy-purple, white centre
JUPITER, rosy-purple, medium size
LANCELOT, purplish-rose, white eye
NIZZA, large crimson-purple flowers; very brilliant
ORION, crimson-scarlet
PALLIDA, bluish-lilac, medium size
PHILOMEL, purple-crimson
PURPLE EMPEROR, deep rosy-purple
QUEEN OF WHITES, pure white; fine
REGINA, lilac-purple
RUBY, ruby scarlet
STROMBOLI, magenta; very large
SUNRISE, cherry colour
VESTA, magenta, distinct white eye
VESUVIUS, deep crimson-scarlet

The above 2s. 6d. each; 24s. per dozen.

MIMULUS.

The new and improved varieties of this showy flower are very handsome, many of them blotched or freckled and spotted, on white, sulphur and yellow grounds; the lobes margined with crimson and maroon. Selections at 9s., 12s. and 18s. per dozen.

MIMULUS GRANDIFLORUS BRILLIANT, freely produces large and finely-formed flowers of an intense bright crimson colour. Awarded a First Class Certificate by the Royal Horticultural Society. 2s. 6d.

MIMULUS MOSCHATUS.

GRANDIFLORUS, a new and robust hybrid Musk, an excellent bedding plant, freely producing large pure yellow flowers of fine shape. Awarded First Class Certificate by the Floral Committee of the Royal Horticultural Society. 2s. 6d.

RUBER, this remarkable novelty is a hybrid Musk of very dwarf and compact growth, producing large flowers of a reddish buff colour. 2s. 6d.

PENTSTEMON FOLIO-VARIEGATIS.

A pretty variety with purple flowers, the foliage being variegated in a most pleasing manner with yellow and cream colour. 5s.

PENTSTEMON CORDIFOLIUS, an extremely showy species from California, giving fine spikes of beautiful scarlet-flowers. 3s. 6d.

PENTSTEMONS.

The modern varieties of Pentstemons are exceedingly attractive as decorative plants, either for flower-beds or borders, their cultivation being of the easiest description, while they are suitable to almost any soil, and their large and showy flowers are given with a remarkable redundancy from June to September. Choice sorts, 12s. and 18s. per dozen.

PETUNIAS.

Choice Selections of Double-flowered kinds, including blotched, fringed and variegated varieties, 18s. and 30s. per dozen; choice new kinds, 42s. per dozen.

Choice Selections of Single-flowered kinds, including striped and blotched varieties, 12s. and 18s. per dozen.

Mr. WILLIAM BULL'S SEED CATALOGUE,

Published in January, contains descriptions and prices of all the most desirable novelties in Flower and Vegetable Seeds, and includes descriptions and prices of the best and most popular seeds that can be offered for the Kitchen Garden, Flower Garden, Conservatory, &c., &c.

PLANTS FOR SUB-TROPICAL GARDENS.

These have either ornamental and attractive foliage, or are of graceful habit and growth, such as Bamboos, &c., and are very effective when planted in groups; many of them forming striking objects as single specimens.

Good Selections made at 30s. and 42s. per dozen.

"The Calceolaria seed we received from you has given our customers the greatest satisfaction, and we have much pleasure in recommending it."

"The Calceolaria I had from you proved a first-rate strain."

"The seeds I had from you I am happy to say turned out well, especially the Primula, Calceolaria, and Cineraria."

"The Calceolaria from the seed we had from you are the finest we have ever seen in this locality; they have been much admired; hope you can send the same strain again."

"The Calceolaria has been all that could be desired."

CALCEOLARIA, HERBACEOUS (Bull's Prize Strain.) *Vide* page 156.

"I have had some flowers $2\frac{1}{2}$ in. in diameter on your Primulas, and of good substance, and the plants 18 in. across."

"We have much pleasure in informing you that the Primula seed which we had of you has given great satisfaction to our customers."

"My Primulas from your seed were the admiration of everyone who saw them."

"The Premier mixture of Primula that we had from you last season has turned out to be extremely fine, especially the doubles. Please send us another packet."

"Your Primulas have been a splendid lot, strong in growth, throwing their flowers well above the foliage, a capital strain."

"The Primulas from seed we had from you turned out to be extremely fine."

PRIMULA SINENSIS FIMBRIATA. For choice varieties, *vide* page 156.

"Your strain of Cineraria has been exceedingly fine with me this season; the flowers have been rich in colour, varied, and remarkably large."

"The Cineraria seed I had from you was a really good strain."

"The plants from the Cineraria seed you sent us were admired by every one who saw them."

"The Cineraria seed sent me last year has given great satisfaction, the flowers have been rich in colour, remarkably large, and from 2 to $2\frac{1}{2}$ in. in width; they have been greatly admired, and said to be the finest strain seen in this locality."

"The Cineraria seed which you sent me has given great satisfaction; the plants have been admired by all who have seen them."

CINERARIA (Bull's Prize Strain.) *Vide* page 156.

GLADIOLUS.

(HYBRIDS OF GANDAVENSIS.)

There are few flowers more showy and beautiful than the Gladiolus, and the varieties of the *Gandavensis* section are perfectly hardy and easily grown, whilst their erect and stately growth, and long spikes of flowers, developing themselves successively, never fail to win admirers.

To facilitate the cultivation of this highly decorative plant, a few remarks may be necessary to some :—

The best and safest time for planting is from the beginning of April to the end of May, when a continuous bloom may be assured from July to September.

Soil is not much a point for consideration, so long as it is not stiff and consolidated ; but it is important that it should be deeply dug previous to planting.

Large bulbs should be planted from 3 to 4 inches, and smaller bulbs 2 inches deep.

During excessively dry weather, copious waterings are recommended.

When any bulbs show signs of growth before the time mentioned above, they should be potted and kept in a cool frame until the proper season for planting out.

CHOICE GLADIOLUS.

This beautiful tribe of plants should be largely planted everywhere, because—

They are perfectly hardy and easily grown.

They are gorgeously beautiful.

Their handsome spikes of flowers are useful for decorating vases and epergnes.

Their flower buds expand and last a long time when cut and placed in water.

They are charming when introduced into borders among Evergreens.

Planted by hundreds among Rhododendrons, they brighten and enliven the beds during the summer and autumn months.

Orders for the above are booked throughout the year at the following prices, and the bulbs supplied in January, February or March.

100	in	12	Choice named varieties	50s.

12	..	6	Ditto, ditto	6s.

GLADIOLUS, Finest Mixed Hybrids.

Various colours, 14s. per 100 ; 2s. per dozen.

GLADIOLUS BRENCHLEYENSIS.

This beautiful and showy bright scarlet species is most effective when planted in quantity in beds or borders. Gigantic selected bulbs can be supplied by the 100 or 1,000 at 1*l.* each.

GLADIOLUS COLVILLEI.—Purplish lilac with white stripe, 5s. per 100.

GLADIOLUS COLVILLEI ALBA (The Bride).—Produces charming spikes of pure white flowers, specially useful for cutting, easily grown in pots or borders, 15s. per 100.

MR. WILLIAM BULL'S SEED CATALOGUE,

Published in January, contains descriptions and prices of all the most desirable novelties in Flower Seeds, saved from extra fine carefully selected stocks. Also Ornamental-foliaged Plants, so much used now for sub-tropical gardening.

Descriptions and prices of the best and most popular seeds that can be offered for the Kitchen Garden, Flower Garden, Conservatory, &c., &c.

MR. WILLIAM BULL'S BULB CATALOGUE,

Published in September, contains Priced Lists of all the finest Dutch and other Flower Roots, selected from the Stocks of the best Continental Bulb Growers, including Hyacinths, Tulips, Crocus, Narcissi, Lilliums, &c., with a choice selection of other Bulbous and Tuberous-rooted Plants.

FOREIGN ORDERS.

Plants, seeds, &c., for transmission abroad, selected and packed with the greatest possible care in Bull's Patent Plant Cases or closed boxes, according to the nature of the goods, and despatched by the best Routes, Mail Steamers, Clipper Ships and Railways to any part of the world.

A REMITTANCE MUST ACCOMPANY ALL FOREIGN ORDERS.

EXPORTING.

Mr. W. B. is continually receiving the most gratifying accounts of the excellent condition in which both the plant and seed orders entrusted to him reach their destinations, and the satisfaction given by the selections made.

Post-office Orders to be made payable at 365, KING'S ROAD, CHELSEA, S.W.

Cheques to be crossed "LONDON JOINT STOCK BANK."

Telegraphic Address: "WILLIAM BULL, LONDON."

ORCHID EXHIBITION.

THE ORCHID EXHIBITION AT

Mr. WILLIAM BULL'S Establishment

FOR

NEW AND RARE PLANTS,

536, KING'S ROAD, CHELSEA, LONDON, S.W.,

WILL OPEN

TO

PATRONS OF THE ESTABLISHMENT

AND

THOSE RECEIVING CARDS OF INVITATION,

TUESDAY, MAY 4th, 1886,

And continue on view every TUESDAY, THURSDAY and SATURDAY,
throughout MAY, JUNE and JULY.

The following are a few short extracts from the Press respecting Last Season's Exhibition:—

“THE TIMES.”

“The researches of Collectors and Travellers in the East, in the West, and in the Southern latitudes, supplemented by the skill of the English Horticulturist, have contributed to make the annual Exhibition of Orchids in Mr. William Bull's Conservatory one of the sights of London.”

“THE MORNING POST.”

“The Annual Exhibition of Orchids at Mr. William Bull's Establishment is not only a flower show of unsurpassed variety and interest, but presents a glimpse of Tropical vegetation, the aggregate beauty of which it would be difficult to imagine possible outside the realms of fairyland. Varieties may be counted by the hundred, and individual examples by the thousand, and at every turn some special feature of colour, form, or marking arrests attention.”

“THE GARDENERS' CHRONICLE.”

“The display of Orchids at Mr. William Bull's Establishment during the early summer months is, if possible, finer than that witnessed last year, whether estimated by the number of plants of choice species and varieties, or by the excellence of the plants themselves. The arrangements, which must have caused no small amount of trouble, indicate excellent taste, and show the teachings of experience, with results that strike the observer as being very pleasing.”

“THE STANDARD.”

“Mr. Bull has excelled himself. Such a glow of colour strikes the eye on entering, that even the expert is perplexed for a moment. One's notes about this astonishing display would make a volume. Space fails us to deal with such a collection, so rich, so new, so dazzling in endless diversities of beauty. The list alone of Orchids, new, rare, and supreme in eccentric loveliness, which we should like to furnish, would occupy much space.”

“THE GARDEN.”

“Mr. Bull's show of flowering Orchids is as fascinating as any of its predecessors, and there is a freshness about it which is quite delightful. The crowds of everyday Orchids, which it contains, are so leavened with all that is new and rare, that connoisseurs must derive much interest from it. From now, onwards to the close of the London season, this charming Exhibition will be a great attraction.”

“THE GARDENER'S MAGAZINE.”

“The Exhibition of Orchids held in the Nurseries of Mr. William Bull, last year, was so vast in extent and immensely attractive that it was generally supposed to be impossible to effect improvement upon it. But that of this season is of so magnificent a description that there is a general concurrence of opinion amongst experts that Mr. Bull has far surpassed all his previous efforts, and has produced an exhibition which, for extent, richness of colouring, and tasteful arrangement, is without a parallel in the history of Orchid culture.”
